MORPHY
AUCTIONS

DENVER, PA | LAS VEGAS, NV

Welcome to MORPHY AUCTIONS

DAN MORPHY
President & Founder

MORPHY AUCTIONS in Lancaster County, Pennsylvania & Las Vegas, Nevada, has become one of the great success stories of the antiques trade. Founded by Dan Morphy in 1997, Morphy's has realized tremendous growth and set numerous auction world records in many categories, while attracting a global following of buyers that grows exponentially with each successive sale.

Our goal is to provide the best overall buying and selling experience for our customers. With one of the largest under-roof auction houses in the country, the Morphy Auctions east coast headquarters spans over 45,000 sq. ft. The building is customized to meet the growing and changing needs of the antiques industry. Our west coast location in Las Vegas, NV has recently undergone extensive renovations and facility upgrades. Upon entering either of our locations you will notice an inviting customer service area conveniently staffed with full-time, knowledgeable employees and antiques experts who are happy to assist you. Whether you visit us on the east or west coast, Morphy Auctions takes pride in providing you with quality antiques, professional service, and an enjoyable consignment experience.

Morphy Auctions has a world class team of experts to assess your collection and assist you in every step of the consignment process. Our expert team includes specialists from all collecting categories, including: advertising, coin-op, toys, cast iron, dolls, fine and decorative arts, jewelry, firearms, plus many more.

With our headquarters located in Denver, Pennsylvania, our proximity to Philadelphia, New York, Baltimore and Washington, D.C., makes us easily accessible to potential auction bidders and consignors. Similarly, our west coast location in Las Vegas, NV makes us easily accessible for those located in Los Angeles, San Francisco, and Sacramento.

Morphy Auctions is grounded in the values of honesty and integrity. We continue to be the discriminating collector's #1 choice when it comes to buying or selling antiques.

In a Stunning Move, Morphy Auctions Merges with James D. Julia Inc.

JAMES D.
JULIA
INC.
Fairfield, Me.

MORPHY AUCTIONS HAS MERGED WITH JAMES D. JULIA, TO BE AN INTERNATIONAL LEADER IN MULTIPLE COLLECTING CATEGORIES

Effective December 14th, 2017, Dan Morphy of Morphy Auctions, proudly announced that he has successfully merged with the renowned international auction company of James D. Julia, Inc., which will become a division of Morphy Auctions.

Morphy Auctions and James D. Julia, Inc. share a common purpose of delighting collectors worldwide with aligned missions and unparalleled customer service standards. Joining forces creates a synergistic team of passionate staff members to better serve our customers and strengthen the antiques and collectibles industry.

Both companies take pride in having the most talented and knowledgeable experts in the industry. One of the biggest advantages to this merger is blending both teams of leading experts to enhance processes, descriptions and valuations. Morphy Auctions realized annual sales of $35 million within the last year. Within this same time, Julia’s generated $43 million in annual sales; for a combined gross of $78 million. With this combined total of annual sales, Morphy Auctions is one of the largest antique auctions house in North America.

Morphy Auctions has experienced tremendous growth over the years. The combination of the highly experienced and much acclaimed Julia team together with the outstanding auction team that Morphy has already formed, will make Morphy Auctions the ultimate place to go for rare firearms and important lamp & glass; as well as, toys, dolls, advertising, coin-op, automobilia and petroliana, and all forms of decorative arts.

Dan Morphy, Founder and President of Morphy Auction Company stated, “*I have literally spent all my life watching and learning from Jim. With nearly 50 years in the industry, Jim has an undisputed reputation and I admire and will emulate his business approach towards his clients and employees. It is an honor and privilege to have this new association with someone I have considered to be a mentor and leader in the industry.*

Over the years, Jim Julia crafted an extraordinary team and unique auction company as a result of his philosophy, business acumen and direct, honest approach with his clients whether they be buyers or sellers. I have always tried to incorporate the same approach. In merging with Julia’s extraordinary team, I intend to make the transition as seamless as possible. The bottom line is that I not only want to merge Jim Julia’s company and his people but I want to expand the philosophy of our business to include much of what created extraordinary success for Jim."

Jim Julia, Founder and President of James D. Julia, Inc., shared, “*I had never considered not being in the auction business and I have, for many years, contended that I, like my father (who passed away at nearly 90 years old this past year), would continue to auction well into my 80s, provided my health allowed it. The limitation in my mind had always been my personal health. But in November of 2016, my wife received a devastating diagnosis of incurable brain cancer. I immediately realized that as much as I loved the people, the antiques, and the excitement of the auction, there was nothing more important in this world to me than my wife, and I elected to devote my time to my wife, Sandy. From November of 2016 until today, my auction company never skipped a beat and has been extremely successful under the leadership of my good friend and CEO, Mark Ford, who continued to lead, improve and expand our company.*

A short while ago, Dan Morphy called to speak with me and asked if I would consider selling the company or doing some sort of joint venture. I explained to him that there were 3 things that were incredibly important to me; first, of course, was what was in the best interest of me and my wife, secondly, my obligation to my incredibly loyal and dedicated team of employees, and thirdly, wanting to do what would best serve all of the wonderful consignors and buyers that the company had developed over the years. The ensuing conversations with Dan, and ultimately the deal we were able to put together, allowed me to cover all three of these factors.

I have always admired Dan, his youth, his energy, his tremendous drive and his success. I knew and did business with Dan before he became an auctioneer and watched him as he entered the auction business and the subsequent dramatic growth he experienced. Dan is a superb leader and this was very clear and obvious during our negotiations about the melding of the two companies."

Julia’s Fine Arts, Asian & Antiques auction will be held February 8 & 9, 2018 and their Firearms auction will take place on March 1 & 2, 2018. To facilitate a seamless transition, the Julia team will manage and conduct both sales in Fairfield, Maine, as they have in the past. Morphy’s will hold all future auctions and accept consignments in their Pennsylvania and Nevada locations.

MORPHY AUCTIONS offers a wide range of categories from Tiffany to mechanical banks, specializing in "fresh to the market" collections. We work hard to create a welcoming atmosphere that encourages optimal financial results for our consignors. We are committed to taking the utmost care in handling the items, giving our consignors the personalized attention and dedicated staff support they deserve, and making every auction a high-profile event in every sense. From the extended preview to the prime auction location and professional advertising and marketing campaign, it's easy to see why your collection should be entrusted to the experts at Morphy's.

We never cut corners, and to ensure proper attention is given to each collection, a minimum of four months' lead time is required for all consignments. All consignments are entered into a custom-designed inventory system and auction database in order to ensure proper documentation and inventory tracking. Throughout the entire process, all auction items are fully insured, from the moment we take possession of goods until ownership has transferred on the date of sale.

> *"We have known and dealt with the Morphy family for the past 25 years. We have always found the whole family helpful and welcoming. Dan is a driving force and energetic personality who will professionally represent your collection in the marketplace. With the close support of his whole family, you can be confident that you and your collection will receive direct personal attention. You will always enjoy a friendly welcome and be assured that you will be treated fairly. The result will be a great auction experience."*

Morphy Auctions is one of the largest under-roof auction houses, spanning over 45,000 sq. ft. The facility is customized to meet the growing and changing needs of the antiques industry. Our goal is to provide the best overall buying and selling experience for our customers.

The clean, well-lit, fully carpeted and climate-controlled gallery is customized to ensure the ideal atmosphere for the antiques and collectibles housed within. Whether large or small, all of the antiques are properly secured and professionally displayed to maximize their eye appeal.

Attributes of the facility include executive and staff offices, a conference room, holding area for loading/unloading goods, custom-built storage space, and a dedicated shipping and packing area.

The pride of the facility is the stylish auction room, featuring comfortable theater-style seats, a marble-style floor and decorative tin ceiling with ambient lighting. With technology continually evolving, Morphy's offers state-of-the-art options for bidding and auction participation. The auction room's design features the latest telecommunications, wireless technology and custom acoustics for the best auction experience possible.

Adjacent to the auction room is a sleek and comfortable dining facility equipped with an audio-feed function and windows to enable bidders to monitor the auction activity while dining. The facility also has an outdoor patio area.

Ample parking and all-weather canopy over the front door allow for easy customer deliveries and pickups. Morphy's utilizes a fully enclosed loading/unloading dock with hydraulic lift for larger-scale antiques and tractor-trailer deliveries and pickups. No collection is too large or too small for Morphy Auctions.

BIDDER

Terms & Conditions

We advise all bidders to read the Terms and Conditions of the Sale before bidding with Dan Morphy Auctions LLC and/or its affiliates Morphy Firearms LLC, and Morphy Auctions, Las Vegas collectively referred to below as MORPHY'S. Those who bid are bound by those Terms and Conditions of the Sale, as amended by any oral announcement or posted notices, which together form the contract of the sale between the successful bidder (purchaser), MORPHY'S and the seller (consignor) of the lot.

TERMS OF SALE

When bidding on any lot offered by MORPHY'S, the bidder indicates acceptance of the following Terms of Sale. Any participation in the auction binds you to agreement of these terms whether or not you read or understand said terms.

CONDITION OF ITEMS

MORPHY'S makes every effort to accurately describe all items offered in its sales, however all items for sale are "as is," and it is the bidder's responsibility (present or absentee bidders) to determine the exact condition of each item. MORPHY'S will not be held responsible for typographical errors. Neither we nor the consignor, make any guarantees, warranties, or representation expressed, or implied, in regard to the property or the correctness of the catalog or other description of the authenticity of authorship, physical condition, size, quality, rarity, importance, provenance, exhibition, literature or historic relevance of the property or otherwise. No statement anywhere whether oral or written, shall be deemed such a guarantee, warranty or representation. Prospective bidders should inspect the property before bidding to determine its condition, size and whether or not it has been restored. It is the bidder's responsibility to initiate contact with Morphy's in request for additional information regarding the items. Submit all questions regarding upcoming auction items at least 48 hours prior to the date of auction. We will make every effort to answer all submitted questions in a timely manner. However, we cannot guarantee that questions submitted within 48 hours of the auction date will be answered prior to the auction. The consigner and we make no representation or warranty as to whether the purchaser acquires any reproduction rights in the property. Returns will not be accepted under any circumstances. All items will be available for preview approximately one (1) month prior to the auction.

All items are sold for display purpose. If electrical, mechanical, or other working parts are inoperable, even if working at the time of sale, we are not liable due to the inherent nature of the age of these antiques and items.

Submit all questions regarding upcoming auction items at least 48 hours prior to the date of auction. We will make every effort to answer all submitted questions in a timely manner. However, we cannot guarantee that questions submitted within 48 hours of the auction date will be answered prior to the auction.

AUTOMOBILES – These terms do NOT apply to our automobile auctions. To view the terms and conditions for our Automobile Auctions, please go to: www.morphyauctions.com/autoterms

FIREARMS – All firearms transfers will be in strict accordance with all International, Federal, State and local laws. Be sure to check your country, state and local laws before bidding. If you are unable to import, purchase or own a firearm according to your residency laws, do not bid on these items. If you bid and find out later you cannot legally own/accept delivery, the bid is still a valid contract that the buyer must pay.

- Condition of Firearms and Related Items
    - Condition is always a subjective evaluation. Final responsibility rests with the buyer to assess the condition of items.

It is not possible to adequately describe in text or photos an antique or collectible item, and many modern items, that have seen use and show wear. MORPHY'S's goal at all times is to be as fair and honest in our catalog descriptions. MORPHY'S recommends that you personally inspect all items, or enlist a trusted professional to do so for you.

- MORPHY'S will only consider a refund when there is a major description discrepancy or authenticity issue that has a major effect on value. Examples that apply are major restoration or repair not described, counterfeits, reproductions or major fabrications.
- MORPHY'S will not refund sales with buyers that have disputes regarding a firearm's bore condition.
- If the discrepancy is less than major, MORPHY'S will not under any circumstance provide a refund. This means that if you are purchasing an item and find undisclosed blemishes, finish differences, wood-to-metal fits issues, surface cracks or chips in wood, dings and dents, and other similar differences, it will not qualify for refund consideration.
- Should the buyer have a major dispute regarding an item, the buyer must notify MORPHY'S within three (3) days of receipt of the item to receive consideration. MORPHY'S in its sole discretion may provide refunds for major description discrepancies or authenticity issues. Should MORPHY'S deny an authenticity issue dispute of the buyer, and the buyer is not satisfied, the buyer may, at his or her own expense, obtain the written opinion of two mutually agreed upon recognized experts in the field of the disputed item. The final decision of those experts will determine any refund consideration.
- There will be no options for refunds of any type beyond 35 calendar days from the auction date.
- Paying late and thus receiving items late will not change the limitation on the dates above for refund consideration. MORPHY'S ships items in order of payment.
- These terms are available only to the original buyer of record. All sales are final.

- Firearms Catalog Designations
    - A: antique
    - M: modern (post 1898), Federal Firearms License (FFL) requirements apply
    - C: curio & relic eligible
    - N: National Firearms Act / Title II Gun Control Act of 1968 (Class III SOT) requirements apply
    - ^:Modern firearm imported from Canada, will have an unassuming marking that contains at least "BV LYNDEN WA" and any of the following not already marked on the firearm: serial number, caliber, country of manufacture, manufacturer name and model. Marking letters are 1/16" tall and just over 3" deep. Buyers must consider this in their bidding. Marking will not appear on antique firearms imported from Canada.

- Checkout and pickup at our location:
    - The same person to whom the bidder number is registered must be the person to pick up the firearm(s) at the conclusion of the sale – Federal Law disallows anyone else from accepting the transfer.
    - Modern firearms sales to non-licensed bidders who are picking up guns at our location will require the completion of a form 4473 background check.
    - PA auctions only - Handgun purchases also require an

(continued...)

additional PICS form/background check for each handgun purchased. This process to fill out forms and obtain a response may take 5-10 minutes. Any applicable state fees associated with these checks will be added to the customer's invoice.

o NV auctions only – If you have a Conceal & Carry permit issued July 1, 2011 or later, you do not need to complete the background check.

o If you are "Denied" by FBI / PICS background check you will not be able to take possession of the firearm and the firearm will be consigned to the next available firearm auction. Dealers and Individuals that bid on and win items own the items and are fully responsible for payment within terms regardless of whether the FBI / PICS approves their taking physical possession of the items. MORPHY'S will not cancel the sale due to disapproval for any reason.

o If you are appealing a "Denied" decision, we will hold the firearm only if you pay in full.

o Licensed bidders, i.e. Federal Firearms licensees or Curios & Relics license holders must present a current signed copy of their license. C&R licensee purchases must conform to the BATF C&R requirements.

o National Firearms Act (NFA) Class 3 Weapons Processing

 Dealers: Buyer must provide MORPHY'S with a copy of their active FFL and SOT license. Estimated time for processing and approval of the required Form 3 normally takes two months.

 Individuals: Law requires a completed Form 4, or Form 5 for deactivated guns. MORPHY'S will prepare and sign the front of the applicable transfer form, and send to the individual buyer. Individual is responsible for completing requirements for fingerprints, photo, and a fee of $200, as well as completing applicable portions of the reverse side of the form. Estimated time for processing and approval of Form 4 is 6-8 months.

 Dealers and Individuals that bid on and win NFA items own the items and are fully responsible for payment within terms regardless of whether the Bureau of Alcohol, Tobacco, Firearms and Explosives (BATF) approves their taking physical possession of the items. MORPHY'S will not cancel the sale due to BATF disapproval for any reason.

• Shipping

o PA auctions only - Non-Residents of Pennsylvania may not pickup modern handguns. Any firearms shipped are legally required to be shipped to an ATF licensed FFL dealer within your state of residence for transfer and pickup. You will be responsible for all shipping and transfer costs incurred.

o NV auctions only - Non-Residents of Nevada may not pickup modern handguns.

o Modern handguns are required to be shipped via FedEx 2-Day Air.

o Modern long guns are shipped via FedEx ground to the FFL dealer.

o Upon paying for the firearm you can contact a licensed dealer to send their FFL to firearms@morphyauctions.com with the paid invoice number notated.

o MORPHY'S will not be responsible for exporting modern firearms or any ammunition. Buyer may contact Borderview International Firearm Logistics or another third party provider. Borderview may be contacted prior to bidding for pricing, process and timeline information.

• Long guns will only be sold to persons 18 years of age, or older. Handguns will only be sold to those persons 21 years of age, or older. Dealers are bound by these minimum age requirements.

• Since all firearms sold are "collectible" items, MORPHY'S does not test the safety or warrant functionality of these firearms. All firearm purchases should be examined by a certified gunsmith prior to shooting.

• MORPHY'S reserves the right to deny the sale of a firearm to any buyer.

GOODS MADE FROM OR CONTAINING MATERIALS FROM PROTECTED SPECIES - MORPHY'S does not accept any responsibility or liability for the sale of items containing materials from protected species or for any omission in marking or labeling goods as containing materials from protected species. Such material includes, but is not limited to, ivory from elephants and walruses, tortoise shell, crocodile skin, whalebone, rhinoceros horn, some species of coral and certain woods. Restrictions on the importation, exportation, sale, transfer, and/or possession of goods containing materials from protected species derive from international, federal, and state laws and regulations promulgated thereunder. Laws include, but are not limited to, the Convention on International Trade in Endangered Species of Flora and Fauna (CITES), the Endangered Species Act (ESA) and the Marine Mammals Protection Act (MMPA). States currently restricting trade of protected species include, but are not limited to, California, New York and New Jersey.

Prospective purchasers are on notice that several countries completely prohibit importation of property made, all or in part, of protected materials. Some countries require special permits, such as a CITES permit, from the relevant regulating authority in the countries of exportation and importation as well. Potential purchasers intending to import the property into another country should be familiar with the relevant customs laws and regulations prior to bidding on goods containing material from protected species. Regulations may vary as
the U.S. generally prohibits importation of articles containing material(s) from species it has designated endangered or threatened if the articles are less than 100 years old, subject to certain exceptions.

It shall be the potential purchaser's sole responsibility to research and satisfy the requirements of any laws and regulations that apply to the import and export of property as described in the aforementioned paragraphs. All purchasers agree to comply with any and all domestic and international restrictions on the trade of protected species as a condition of the sale. Please note that the ability to obtain an export license or certificate does not ensure the ability to obtain an import license or certificate in another country, and vice versa. It is the purchaser's responsibility to obtain any export or import licenses and/or certificates as well as any other required documentation. MORPHY'S is not able to assist the purchaser in attempting to obtain the appropriate licenses and/or certificates, and there is no assurance that an export license or certificate can be obtained. The inability or delay in obtaining permits, licenses or other permissions to import or export goods containing material from protected species will not constitute a basis for rescission or cancellation of the sale of said goods or the delay in payment of purchased items in accordance with these Bidder Terms and Conditions.

BIDDING
RIGHTS & RESPONSIBILITIES

The auctioneer will determine the highest bidder. The auctioneer

(continued...)

alone has the right to reopen the bidding of an item if deemed necessary due to a dispute. If there is a tie bid between the floor and Internet or absentee bid, the floor bid takes precedence. MORPHY'S and its representatives reserve the right to remove those attendees who impede preview and/or the auction. Title to all merchandise shall pass to the highest bidder at the fall of the auctioneer's hammer. The buyer will then assume all risk and full responsibility of the lot purchased once ownership has changed. We recommend that you arrange insurance for your items immediately upon becoming the highest bidder. MORPHY'S is not responsible for any errors in bids, omissions of bids, or failure to execute bids and shall have no liability to any bidder for any technical or other failure associated with the internet, absentee bidding, or telephone bidding.

- **ABSENTEE BIDDING** - MORPHY'S will accept absentee bids if pre-authorized by mail, fax or through www.morphyauctions.com online. Absentee bidders must use the absentee bid form and clearly mark the lot number, title and maximum bid amount. Absentee bidding forms may be accessed online at www.morphyauctions.com. If there are two (2) identical bids placed on the same item, priority will be given to the first bid received. All bids must be left in increments as explained on our bid form. If a bid is "out of increment," the auctioneer has the right to round the bid up to the next correct increment. Bidders may preview, register and place bids online through our website, www.morphyauctions.com. Absentee and online bids placed through www.morphyauctions.com will be auto charged to the credit card entered 48 hours after the end of the sale. If you wish to pay by another method please contact us within 48 hours after the sale. Seller(s) agree to allow the Auctioneer to accept and execute absentee bids in a competitive manner for potential buyers and under the Morphy Auctions absentee bidding terms and conditions. During the live sale, the auctioneer will execute your absentee bid competitively up to the maximum amount you have indicated.
- **ONLINE BIDDING** - Online bidding through www.morphyauctions.com, Live Auctioneers, Bidsquare, Proxibid, or other bidding platforms may be available; all Terms and Conditions still apply. A surcharge may be added for third party online platforms. Refer to your bidding platform of choice for the final buyer's premium. If there is a tie bid between the internet bidding venues and the floor, the floor bid takes precedence. If a credit card has been provided to one of the online bidding platforms, MORPHY'S reserves the right to use and charge the credit card if the winning bidder has not paid via another method by the 7 day term in Payment Terms below. Due to our fast paced auctions and bids coming from floor bidders, phone bidders, internet bidders and absentee bids, the auctioneer has the final word on all item(s) sold. You (the bidder) assume the risk of winning an item online and not having the item actually sell to you. This is due to the final call of the auctioneer and the operator not being able to re-open that lot. Online bidders are responsible for accidental bidding as if they bid normally.
- **BID RESULTS** – MORPHY'S will only contact successful bidders. Please allow 24-48 hours post auction to receive your official invoice from Morphy Auctions. The invoice will include item, hammer price, premium, packing and handling, shipping, insurance, and any other charges that apply. Please hold phone inquiries regarding bid success until after receiving your invoice. For verifications, MORPHY'S cannot provide winning bid information until the second business day after the auction. MORPHY'S will not provide bidder information to any outside sources.
- **TELEPHONE BIDDING** - **Requests for phone lines must be received at least three (3) days prior to the auction date.** MORPHY'S cannot guarantee phone lines but will make every attempt to accommodate those who wish to participate through that method. Phone lines are provided on a first come first served basis. Please visit www.morphyauctions.com or call 877-968-8880 to request a call from our representatives during the live auction.

BID INCREMENTS

Bid increments listed are a general guideline. Actual increments are at the auctioneer's discretion. If a lot does not receive a bid of 25% of the low estimate, the lot will be passed by the auctioneer.

$0 - $500	*$25*
$500 - $1,000	*$50*
$1,000 - $2,000	*$100*
$2,000 - $5,000	*$250*
$5,000 - $10,000	*$500*
$10,000 +	*Auctioneer's discretion*

RESERVES

The majority of our items are unreserved, but occasionally items may carry a moderate reserve. Please note that when a lot carries a reserve, the reserve is usually somewhere below our low estimate. In the case of a reserved item, the seller has authorized the auctioneer to bid on their behalf until the reserve price is reached.

BUYER'S PREMIUM

A 23% buyer's premium will be added to all successful bids and is payable by the purchaser as part of the total purchase cost. If payment by cash, check, money order or wire transfer is made within 7 days of the sale a 3% discount may be taken on the Hammer price by the buyer. **DISCOUNT IS ONLY AVAILABLE IF INVOICE IS PAID WITHIN 7 DAYS from the sale date.** Split payments are subject to a 23% buyer's premium if a credit card is used as any form of total payment.. A surcharge will be added for certain third party online bidding platforms the bidder utilizes. Refer to your bidding platform of choice for the final buyer's premium.

SALES TAX

Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with MORPHY'S. Bidder agrees to pay MORPHY'S the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by MORPHY'S five days prior to Auction, or tax must be paid; only if such form or certificate is received by MORPHY'S within 4 days after the Auction can a refund of tax paid be made. Lots from different auctions may not be aggregated for sales tax purposes.

PAYMENT

Any invoice totaling more than $100,000 must be paid within three (3) days. All other merchandise must be paid in full within seven (7) days of the date of the sale. If payment by cash, check, money order or wire transfer is made within 7 days of the sale, a 3% discount on the Hammer price may be taken by the buyer. **DISCOUNT IS ONLY AVAILABLE IF INVOICE IS PAID WITHIN 7 DAYS from the sale date.** No discount is permitted on split payments where a credit card is used as any form of total payment. Payments can be made by going to your account online at www.morphyauctions.com, call 877-968-8880 or mail payment to: Dan Morphy Auctions LLC 2000 N Reading Rd, Denver, PA 17517.

Absentee bids placed through www.morphyauctions.com will be auto

(continued...)

charged to the credit card entered 48 hours after the end of the sale. If you wish to pay by another method please contact us within 48 hours after the sale.

We accept Visa, MasterCard, Discover, American Express, personal checks, certified checks, wire transfers, money orders, and cash.

- We accept cash, wire transfer, check, certified checks and money orders only. No credit cards.
- CREDIT CARD – For first time buyers and credit card charges greater than $2,500 buyers must complete the bottom portion of the invoice and must specifically sign the acknowledgement of our terms of sale before we will accept payment via credit card. We do offer the convenience of paying automatically by credit card. If you wish have your card automatically charged for all purchases please complete our "Authorization for Automatic Credit Card Use." We have this form available online or upon request. Split payments are subject to a 23% buyer's premium if a credit card is used as any form of total payment.
- **CHECK** - There will be a $30 service charge for returned checks. Make checks payable to: Dan Morphy Auctions LLC. MORPHY'S reserves the right to hold items paid for by personal or company check until said check clears (14 days). MORPHY'S has the right to hold all checks over $2,000. Customers who have an established successful buying history with MORPHY'S may be exempt from this. We will accept
  a personal or company check >$2,000 and/or from a first time buyer if you provide a Bank Letter of Credit, available on our website, www.morphyauctions.com.
- **WIRE TRANSFERS** – There will be a $30 charge added to all wire transfers less than $2,000. Please add this amount to your invoice total before sending a wire transfer.

In the few situations where a successful bidder does not remit payment when due, MORPHY'S will proceed with the legal steps necessary to protect its interests and will block the bidder from future auction participation.

PACKING/SHIPPING

- It is the bidder's responsibility to take shipping and handlings & insurance costs into consideration when bidding on items.
- **BIDDERS PRESENT AND TAKING ITEMS AFTER AUCTION** – Since item liability transfers upon a successful bid, items paid for must be packed, transported and/or removed by the purchaser at his/her own risk after the close of the sale. We recommend that you arrange insurance for your items immediately upon becoming the highest bidder. If any employee or agent of MORPHY'S shall pack or transport the merchandise, it is fully at the risk and responsibility and expense of the purchaser. MORPHY'S shall not be held liable for any loss or damage that may be caused by the said agent or employee.
- **ITEMS NOT PICKED UP THE DAY OF THE SALE** – Packaging, shipping, and insurance on items will be made available as an added courtesy and cost. We recommend that you arrange insurance for your items immediately upon becoming the highest bidder. Again, if any employee or agent of MORPHY'S shall pack or transport the merchandise, it is fully at the risk and responsibility and expense of the purchaser. MORPHY'S shall not be held liable for any loss or damage that may be caused by the said agent or employee. All applicable charges will be applied. Shipping will be based on actual costs via FedEx, FedEx Freight, or USPS (best way). Handling and insurance will vary in cost depending on each invoice. All packages will be shipped with insurance. Items will ship seven to fourteen (7-14) business days after payment is received.
- **SHIPPING TERMS** - Morphy will ship all items to the buyer at the listed address via FedEx or other carriers, FOB Denver, Pennsylvania or FOB Las Vegas, NV or FOB other auction locations. Any risk of loss or damage to the item(s) during transit via FedEx, or any other carrier, in excess of the insurance provided by or purchased from Morphy, is at the risk of the buyer. Any additional insurance coverage should be purchased by the buyer through the carrier. Buyer releases Morphy from any and all claims for loss or damage to any item during transit and agrees to pay all costs of defense, including attorney's fees, for any claims brought against Morphy for loss or damage occurring during transit.
- **INSURANCE** – Shipping insurance is automatically added up to $1,000 for every package. If your package is valued at >$10,000 we will also automatically add "Additional Insurance", which you can decline by contacting us. If you wish to arrange for "Additional Insurance" for packages valued between $1,000 and $10,000 please contact us prior to payment and we can quote this additional insurance amount for you. Insurance for all 3rd party shipments must be arranged through that carrier. Insurance provided or purchased through MORPHY's applies only to shipments to the United States and Canada. Buyers must purchase their own insurance for shipments to other countries.
- **INTERNATIONAL SHIPMENTS** – MORPHY'S has the capability to ship to international bidders. By law, MORPHY'S cannot, and will not, declare lesser values for any international purchases and all shipments will include the invoice with purchase totals including the buyer's premium and shipping cost. All international bidders are responsible for knowing their country's laws on importing items and for paying all customs and duties on the items.
- **3RD PARTY SHIPPING** of Large Items – Bidders MUST arrange and pay for 3rd party shipping when packages are a certain weight, length, or dimensional size.
  · Dimensional size is length (the longest measurement) + (height x 2) + (width x 2). For example a 36" x 36" x 12" package = 36 + (36 x2) + (12 x 2) = 132"
  · USA home shipments must be <70 lbs. and <108" length and <165" dimensional size
  · USA business shipments must be <150 lbs. and <108" length and <165" dimensional size
  · International shipments must be <150 lbs. and <108" length and <130" dimensional size
  · There may be certain shipments that meet these requirements that will still require 3rd party shipping, and we will communicate the reason in those cases.
- **BREAKABLE, DELICATE, FRAGILE ITEMS -** MORPHY'S reserves the right to choose items and orders that it will pack, ship, and/or insure directly using our shipping department. Those items that MORPHY'S will not ship will require that the winning bidder either pick up the items personally or arrange a 3rd party shipping service. Examples of items that may apply after determination by our shipping department include but are not limited to: items with neon of any type (working or non-working), all glass display cases of any size; coin-operated, arcade and vending items with fragile parts and/or glass; signs with parts or protrusions beyond the main body of the sign, oversized vases (guideline – larger than fit in a 20" x 20" x 40" box), high value lamps and glass of all sizes, high value artwork including but not limited to paintings, statuary, sculpture, figurines, dioramas, and other intricate items; and items subject to impact by moisture and known handling issues in the supply chain. Under no circumstances will MORPHY'S be responsible for shipping damage to picture frames of any kind.
- **STORAGE FEE** – MORPHY'S will charge a storage fee of $50/week for any items awaiting pickup for more than 14 days following the auction date.

BIDDER
TERMS & CONDITIONS

AGREEMENT REGARDING GOVERNING LAW, VENUE, AND LEGAL RIGHTS

I hereby understand and agree that any controversy or claim arising out of or relating to MORPHY'S Bidder Terms & Conditions, which includes this provision (hereafter referred to as "Terms & Conditions"), MORPHY'S, or the breach thereof (hereafter referred to as "Claims"), shall be governed by and construed in accordance with the laws of the State of Pennsylvania, without regard to its conflict of law provisions. I hereby irrevocably submit to the personal jurisdiction of the appropriate court in Lancaster County, Pennsylvania in any action or proceeding arising out of or relating to the Claims and their enforcement, and I agree that any and all Claims must be adjudicated, heard, determined, and resolved in said court, and I hereby irrevocably waive any objection on the ground that any such action or proceeding in said court has been brought in an inconvenient forum. MORPHY'S failure to exercise or enforce any right or provision of these Terms & Conditions or any other legal rights, shall not constitute a waiver of such right or provision. Any waiver of any provision of these Terms & Conditions by MORPHY'S must be made in writing and signed by an authorized representative of MORPHY'S specifically referencing the provision(s) contained within the Terms & Conditions to be waived. Headings used in the Terms & Conditions are for convenience only and are not to be relied upon. If any provision of the Terms & Conditions is found by a court of competent jurisdiction to be invalid, the parties nevertheless agree that the court should endeavor to give effect to the parties' intentions as reflected in the provision, and the other provisions of the Terms & Conditions shall remain in full force and effect. These Terms & Conditions will inure to the benefit of, and are intended to be, enforceable by MORPHY'S, its parents, subsidiaries, affiliates, successors, assigns, members, directors, officers, and licensees. There are no third party beneficiaries to these Terms & Conditions; a person or entity who is not a party or signatory to these Terms & Conditions has no rights under the Contracts (Rights of Third Parties) Act 1999 to rely upon or enforce any term or provision of these Terms & Conditions.

POST SALE RETURN POLICY

MORPHY'S engages knowledgeable experts to provide catalog descriptions on the merchandise we sell. Every effort is made to ensure those descriptions are accurate and that they fully disclose any exceptions to condition. Any buyer who has made their payment within the due date of 7 calendar days who wishes to report a problem must notify MORPHY'S within three calendar (3) days of receipt of their purchased item. Buyers who have not made their payment within the due date of 7 days may not return any items under any circumstances. No lots purchased by floor bidders (including those bidders acting as agents for others) may be returned. A Return Authorization Number (RA#) must be issued by MORPHY'S before you ship anything back to our address. Any items arriving without a return authorization will not be given a refund. The item in question must be shipped with the RA# on the outside and inside of the package, with full insurance, so it arrives at MORPHY'S within one week of the aforementioned authorization

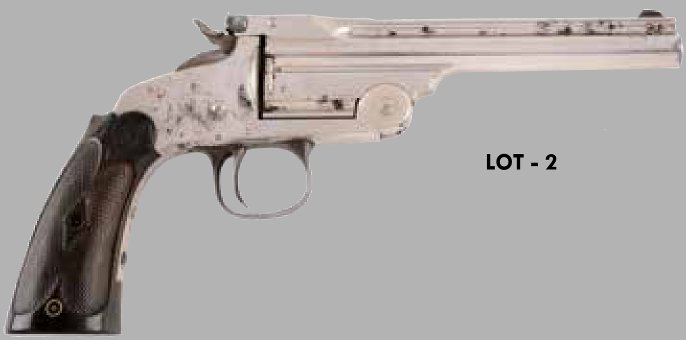
LOT - 1

1 - (A^) RARE S&W MODEL 91 SINGLE SHOT PISTOL WITH FACTORY THREADED BARREL.

Manufacturer: Smith & Wesson
Model: 91
Serial No. 19764
Caliber/Bore: .22 LR
Barrel Length: 8”
FFL Status: Antique

This is a First Model made from 1893 to 1905. Has a 5/8” threaded barrel end for indoor shooting parlor silencer. The Paine front sight sits at outer edge of rib. Canadian proof marks on frame and barrel. It is a single shot top break made on revolver frame with intact recoil shield and Smith & Wesson black hard rubber extension grips, factory high polish blue finish and case colored hammer and trigger guard. This pistol remains in beautiful condition retaining approximately 80% of the brilliant Smith & Wesson factory blue with the balance simply flaked. Generous case colors on hammer and trigger guard. Excellent grips. Strong rifled bore with minor abrasion. 1,000.00 - 2,000.00

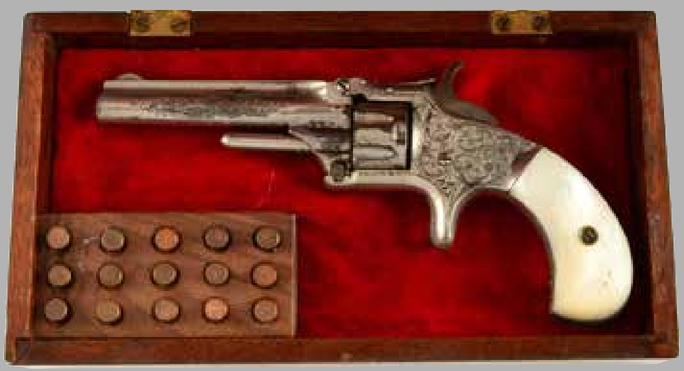


LOT - 2

2 - (A^) RARE NICKEL 6” SMITH & WESSON MODEL 91 SINGLE SHOT PISTOL.

Manufacturer: Smith & Wesson
Model: 91
Serial No. 14114
Caliber/Bore: .22 LR
Barrel Length: 6”
FFL Status: Antique

This pistol falls right in the middle of the First Model serial number range of the Model 1891. It is a single shot pistol made on revolver-type frame with recoil shield left intact, rare factory nickel finish, blued trigger guard and black hard rubber Smith & Wesson extension grips. Has a Paine style front sight with round barrel, full rib, and rear target sight. Manufactured 1893 to 1905. Pistol retains approximately 85% original factory nickel with some age freckling under rib and a couple other minor age spots. Blue-grey patina on trigger guard. Grips are excellent with no chips. Strong rifling with some minor abrasion. A very rare little Smith & Wesson turn of the century target pistol. 1,500.00 - 2,500.00

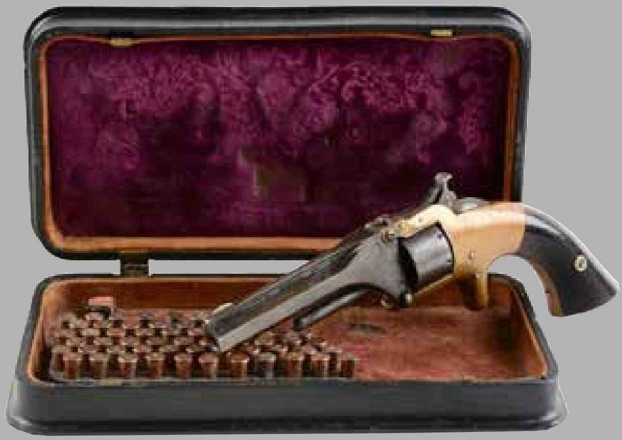


LOT - 3

3 - (A) FACTORY ENGRAVED & CASED S&W NO. 1 SINGLE ACTION REVOLVER.

Manufacturer: Smith & Wesson
Model: No. 1
Serial No. 61517
Caliber/Bore: .22 Short RF
Barrel Length: 3 - 3/16”
FFL Status: Antique

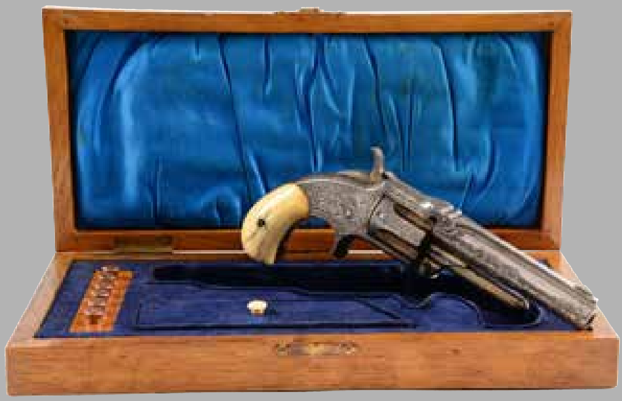
Manufactured 1868-1881. Referred to as a Third Issue with seven shot, single action and spur trigger. Factory engraved with fine Nimschke-style scroll engraving with beautiful bird’s head Mother of Pearl grips. 85-90% original finish with the majority of the wear on the cylinder. Functions fine with clean bore. Includes an old wooden display box. 1,000.00 - 1,500.00



LOT - 4

4 - (A) S&W GUTTA PERCHA CASED NO. 1 1ST ISSUE 6TH TYPE REVOLVER.
Manufacturer: Smith & Wesson
Model: No. 1
Serial No. 7647
Caliber/Bore: .22 Short
Barrel Length: 3 - 1/4"
FFL Status: Antique

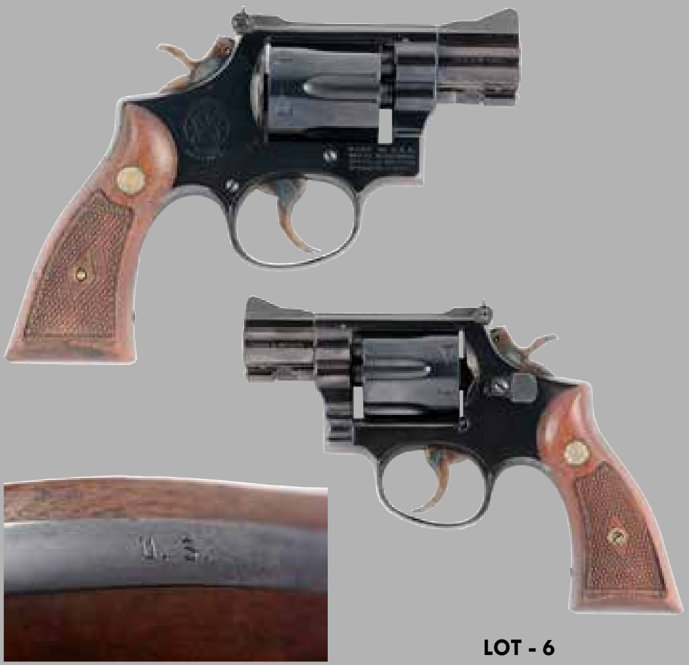
This is a single action, seven shot, tip-up revolver with octagon barrel and spur trigger. Features a brass frame devoid of any plating. Traces of blue in recesses of barrel. Sharp legends. Indexes fine with near mint rose-wood grips. These revolvers were manufactured 1857-1860. These were very popular with men marching off to the Civil War and thousands were purchased for soldiers by their loved ones. This revolver is housed in the rare and fragile Americana themed velvet lined gutta percha box with original cartridges. Box is in very good condition but it has had some repairs. 2,000.00 - 3,000.00



LOT - 5

5 - (A) S&W CASED & FACTORY ENGRAVED MODEL 1-1/2 2ND ISSUE REVOLVER.
Manufacturer: Smith & Wesson
Model: 1 1/2
Serial No. 77469
Caliber/Bore: .32 RF
Barrel Length: 3 - 1/2"
FFL Status: Antique

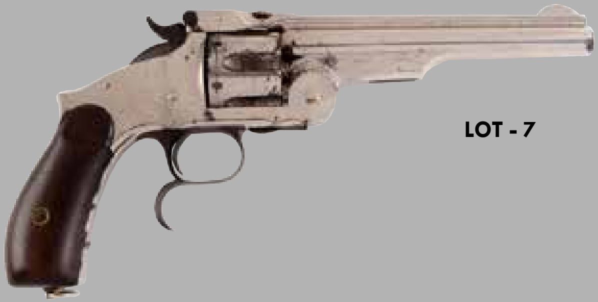
This revolver was manufactured from 1865-1868. Features real ivory bird's head grips, five shot fluted cylinder, and spur trigger. This revolver also features nickle plating with gold wash and exhibits nearly complete factory floral engraving. Traces of gold wash in cylinder flutes and rod. Retains 30-40% original factory nickle blending with smooth gun metal gray. Indexes and locks up fine with a clean bore. This revolver comes housed in a French fitted oak case. The engraving appears to be the work of L. D. Nimschke, 1850-1900, one of the most famous engravers of the 19th century. 2,000.00 - 3,000.00



LOT - 6

6 - (C) U.S. AIR FORCE SMITH AND WESSON MODEL 56 DOUBLE ACTION REVOLVER.
Manufacturer: Smith and Wesson
Model: 56
Serial No. K501489
Caliber/Bore: 0.38
Barrel Length: 2"
FFL Status: Curio & Relic

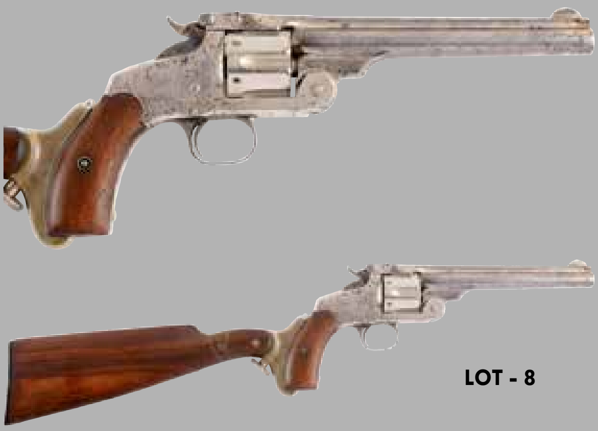
Extremely rare Smith and Wesson Model 56 Special United States Air Force Combat Masterpiece. On page 219 of the book Standard Catalog of Smith and Wesson 3rd Edition it states; That these revolvers were made for the United States Air Force between 1962 - 1963 with most of them being destroyed by the Government in Brunswick, Georgia but has never been confirmed. This one has the supporting documentation of a factory Smith and Wesson letter that states it is one of that contract. It has all the special features that it is supposed to have to include "U.S." stamped on the back strap. Special rear sight that extends past the frame and extended to the base of the front sight. Magna walnut grips with S&W medallions. Heavy two inch barrel. This one was shipped from the factory February 8 1963. This revolver retains approximately 95% of the original factory finish with just a bit of high edge wear. 5,000.00 - 7,000.00



LOT - 7

7 - (A) S&W MODEL 3 RUSSIAN 3RD MODEL.
Manufacturer: Smith & Wesson
Model: 3rd Model Russian
Serial No. 49791
Caliber/Bore: .44 Russian
Barrel Length: 6 - 1/2"
FFL Status: Antique

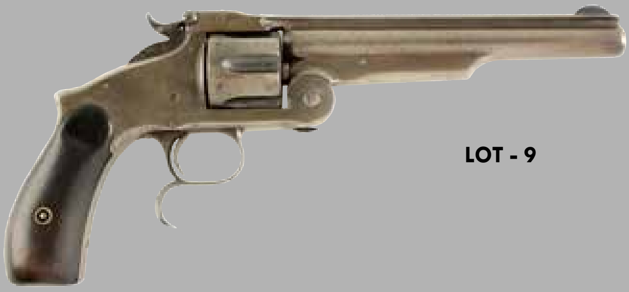
Manufactured from 1873-1878, the major difference of the 3rd model is the integral front sight and the shorter extractor. It features single action, factory nickle finish, large top strap screw, barrel address in English says "Russian", with a sash hook trigger guard, blued extractor, latch and trigger, non-checkered two piece walnut grips. Butt is stamped "1974" in a box and letter "P". Case colored guard has turned patina. Overall the revolver retains 85% of the original factory nickle; barrel retains 85-90% nickle, turning patina at muzzle with some light bubbling; 50% nickle on cylinder; and 85-90% nickle on frame. Right grip panel is stamped with matching serial number. Case colors have darkened, extractor still shows fire blue. Assembly number "316" on latch, cylinder and frame. Indexes and locks up like new with a fine strong bore. Includes a period black leather flap holster in very good condition. 2,500.00 - 4,000.00



LOT - 8

8 - (A^) S&W NEW MODEL NO. 3 AUSTRALIAN MODEL SINGLE ACTION REVOLVER WITH SHOULDER STOCK.
Manufacturer: S&W
Model: No.3
Serial No. 13187
Caliber/Bore: 0.44
Barrel Length: 7"
FFL Status: Antique

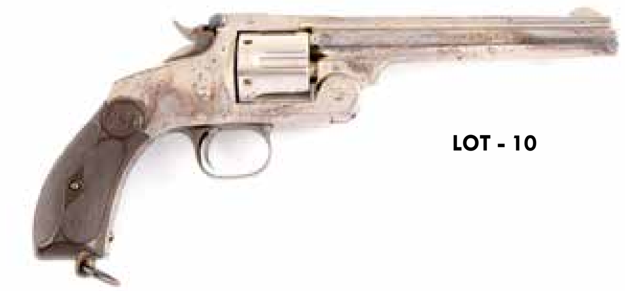
Approximately 310 revolvers were manufactured in nickel finish with a 7" barrel and detachable buttstock. A broad arrow proof mark is stamped on the butt next to serial number. There is an oval mounting hole on back of backstrap, and the rear grip strap extends beyond the grips. The stock is made of walnut with a Smith & Wesson logo black composite buttplate and has nickel attaching system. The hardware and wooden buttstock are stamped with Serial No. 768 and there is no broad arrow, which tells us that this stock is an original Smith & Wesson stock, but not made for this gun. Walnut stock is in excellent to near mint condition with virtually all of the nickel intact on hardware, albeit some frosting. Matching serial numbers on cylinder and latch. Features full nickel finish with fire blue barrel catch, case colored trigger guard, two piece walnut grips, pinned half moon front sight. Walnut grips have a 0 in pencil on both panels. Barrel retains approximately 20% original nickel with the balance blended smooth grey. Cylinder retains approximately 85% original nickel. Left side of frame retains approximately 30% nickel and approximately 50% nickel on right side. 80% nickel on straps. All metal surface that does not retain nickel blends perfectly with a smooth, grey patina. Indexes and locks up fine with a strong, clean bore with light frosting. This revolver falls directly into the accepted serial number range. 2,500.00 - 3,500.00



LOT - 9

9 - (A) S&W 2ND MODEL RUSSIAN MODEL NO. 3 REVOLVER.
Manufacturer: Smith & Wesson
Model: No. 3
Serial No. 1561
Caliber/Bore: .44 Russian
Barrel Length: 7"
FFL Status: Antique

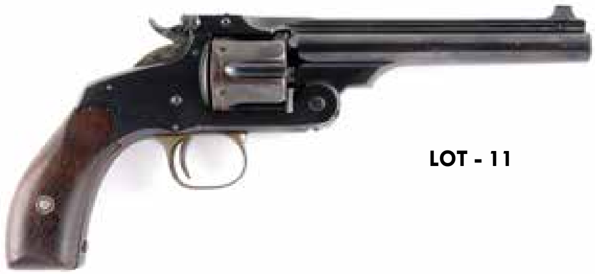
Manufactured 1873-1878. This model is cut for the shoulder stock and features the sash hook on trigger guard with "RUSSIAN MODEL" barrel stamp in English. The lanyard ring is missing. Partial serial number on center of butt with a visible "3" and "5". Serial number on barrel, cylinder and latch is 1561. Serial number on right grip panel is 12?42. Other features are standard for a No. 3 top break, six shot, single action revolver. All metal is a clean grey patina with no original finish. Index and locks up like new with strong rifling. Clean and homogeneous early Smith & Wesson. 1,200.00 - 1,800.00



LOT - 10

10 - (A) S&W NO. 3 RUSSIAN REVOLVER.
Manufacturer: Smith & Wesson
Model: No. 3
Serial No. 21245
Caliber/Bore: .44 Russian
Barrel Length: 6 - 1/2”
FFL Status: Antique

Factory letter states this pistol shipped December 29th, 1894, to Tikata & Co. in Yocohama, Japan; Agents for Japanese Government. It was shipped with a 6 - 1/2” barrel, blue finish, butt swivel, and checkered hard rubber grips. The gun is currently nickel finished that appears to be factory, with no rounded edges or feathering. Grips are excellent and not numbered. Case colored hammer and trigger guard with strong colors. Serial number is stamped two places on butt. Revolver has lanyard ring. Retains about 75% period nickel finish, balance soft patina. Cylinder shows no signs of burn. There is no star, so if it was factory refinished it surely does not show, and could simply be an error in the finish column. Indexes and locks up fine with a strong, clean bore. 1,700.00 - 2,200.00



LOT - 11

11 - (A) S&W NEW MODEL NO. 3 TARGET REVOLVER.
Manufacturer: Smith & Wesson
Model: No. 3
Serial No. 6024
Caliber/Bore: .44 Russian
Barrel Length: 6”
FFL Status: Antique

According to the factory letter, this revolver was shipped July 7th, 1882 to the M.W. Robinson Co., New York City, with 6” barrel, nickel finish and checkered black hard rubber grips. The star by the serial number indicates it was returned to the factory for rework and refinishing; this would have been when the target sight, wood grips and blue finish were added. Inside grip frame has refinishing date stamped inside “4-28”. This is a six shot, single action, tip-up with high target front sight and target rear sight. Barrel and frame have 90% brilliant factory blue. Cylinder has 50% blue. Blue-plum patina on straps. Smooth walnut grips with “16513” written in pencil on left panel. Grips are excellent and fit nicely. Sharp barrel legend. Fine action and lock-up. Strong, clean bore. 1,700.00 - 2,400.00

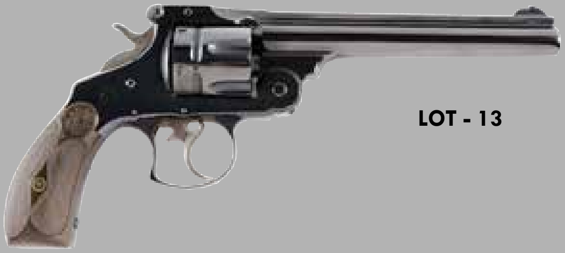
LOT - 12

12 - (A) S&W NEW MODEL NO. 3 TARGET REVOLVER.
Manufacturer: Smith & Wesson
Model: No. 3
Serial No. 32470
Caliber/Bore: .44 Russian
Barrel Length: 6 - 1/2”
FFL Status: Antique

According to factory letter, this revolver shipped on June 1st, 1898 to S. M. Taylor, no address listed. Shipped with 6 - 1/2” barrel, blue finish and checkered walnut grips as a New Model No. 3 Target in .44 Russian. The star by the serial number indicates it was returned to the factory for reworking or refinishing, and it has the refinishing date stamped on inside of grip frame of “6-21”. This is a six shot, single action Target Model with a factory adjustable rear sight. Trigger guard has traces of color and hammer exhibits brilliant case colors. Sharp barrel legends. Frame retains 95% of factory applied blue. Barrel has 75% factory applied blue thinning at muzzle and sides. Cylinder has traces of blue but is basically a blue-brown soft patina. Both grip straps are grey patina. Matching serial number on latch and cylinder. The gold medallion diamond checkered walnut grips are very good to excellent but not numbered. Indexes and locks up like new with strong, clean rifled bore. Fine antique No. 3 revolver.
1,500.00 - 2,500.00

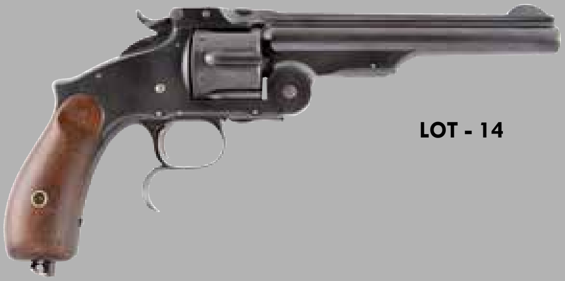


LOT - 13

13 - (A^) RARE .38 WINCHESTER S&W NO. 3 NAVY DOUBLE ACTION REVOLVER.

Manufacturer: Smith & Wesson
Model: No. 3
Serial No. 270
Caliber/Bore: .38-40
Barrel Length: 6 - 1/2”
FFL Status: Antique

These rare revolvers were numbered in their own serial range with a mere 276 ever produced, making this example the seventh-to-last one manufactured. Frames were manufactured prior to 1898 but these were shipped from 1900 to 1910. Matching numbers on cylinder, latch and barrel. Features six shot, double action, blued finish, case colored trigger and hammer, and Smith & Wesson black composite grips. This revolver has been factory refinished to near new condition with two return dates inside frame of 1958 and 1967. 229 is scratched into the right grip panel. This revolver appears to be in near new condition since factory refinished and is considered one of the rarest of all Smith & Wesson revolvers. 2,500.00 - 3,500.00

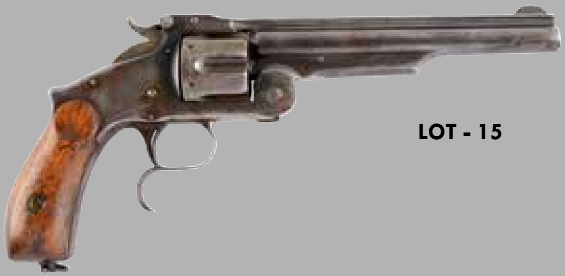


LOT - 14

14 - (A^) S&W RUSSIAN NO. 3 3RD MODEL SINGLE ACTION REVOLVER.

Manufacturer: Smith & Wesson
Model: No. 3 Russian
Serial No. 40831
Caliber/Bore: .44 Russian
Barrel Length: 6 - 1/2”
FFL Status: Antique

Manufactured 1874 to 1878. Print on top of rib is in English, ending in “RUSSIAN MODEL”. Features round butt, walnut stocks, lanyard ring in butt, blued finish, extreme frame knuckle, trigger guard spur, medium ejector housing, forged front sight, large thumb screw on top strap, six shot and single action. This revolver retains 95% of an old, dull blue refinish. Grips are excellent. Indexes and locks up fine with a strong rifled bore. 1,000.00 - 1,500.00



LOT - 15

15 - (A) S&W NO. 3 RUSSIAN 2ND MODEL REVOLVER.

Manufacturer: Smith & Wesson
Model: No. 3
Serial No. 2521
Caliber/Bore: .44 Russian
Barrel Length: 7”
FFL Status: Antique

Factory letter states this gun was shipped July 28, 1877 to H. Ahrens & Co., Boston and London. It was shipped with 7” barrel, butt swivel, and smooth walnut grips in a shipment of 243 units. Made without the Russian markings. The frame is stamped with the Japanese naval anchor and two wavy lines. Matching numbers on cylinder, latch and barrel. Features a top break action, frame knuckle, trigger guard sash hook, lanyard and nickel finish. It is interesting to note that the factory letter does not denote the finish, and this gun was offered in both blued and nickel. 5,000 of this model were ordered. Soft patina. Indexes fine with a strong bore.
2,000.00 - 3,000.00

Caliber/Bore: .44-40
Barrel Length: 6-1/2”
FFL Status: Antique

Only 15,340 examples of this revolver were made by Smith from 1886-1898. This example is factory blued with case colored hammer and trigger and chambered for the 44-40 (44 WCF) cartridge and sports a 6-1/2” barrel with Smith Gutta Percha grips and standard sights. All numbers are matching to include the cylinder, latch, barrel and scratched into the left grip panel. It has a mid-production four digit serial number “7660”. This revolver remains in superb condition and does not appear to have seen much use. Overall, the gun retains approximately 75-80% bright original factory blue with no blemishes or flaws, the balance appears to have simply flaked or faded to a mix of plum patina with razor sharp edges. The lock up and bore are like new and tight as a drum. Grips are also near mint showing virtually no wear. Bright case colors on both hammer and trigger. This is one of the nicest examples of this revolver that we have ever offered and very tough to find a nicer blued example, chambered for the .44 Winchester cartridge. 3,500.00 - 4,000.00

Barrel Length: 6 - 1/2”
FFL Status: Curio & Relic

Factory letter indicates this revolver was shipped under British Government contract, caliber .455, delivered for shipping to Remington Arms, New York City, Agents for the British Government. It was shipped with a 6 - 1/2” barrel, blue finish and checkered walnut gold medallion grips. The gun was ordered a mere four months after their country entered the war (December 16th, 1914). The survival of these early examples, given the duration of the war, makes these high condition revolvers extremely difficult. They were built using the five screw, N frame, triple lock design, six shot, double action with case colored hammer and trigger. This revolver bears numerous British proof marks and matching serial numbers on barrel and cylinder. The excellent to near mint gold medallion diamond checkered grips are not numbered. Brilliant case colors on hammer and trigger. Hammer has been stippled. Revolver retains about 75-80% of it original high polish factory finish. Indexes and locks up fine with a clean bore.

In 1980 Smith & Wesson produced one of their greatest, more recent collectibles, albeit unknowingly. In May of 1980, the New York State Police Department placed an order for a large butt fixed sight .357 Magnum. Smith & Wesson produced the order but the Police Department never took delivery so Smith & Wesson was stuck with 3000 already made guns and offered them to dealers. These guns featured square butt, N frame, three screw, six shot with fixed sights, pinned barrels, recessed cylinders and .357 caliber; making it the only .357 Magnum to that point on the N frame without target sights. The serial number range was N557750-N560860. These revolvers have consecutive serial numbers and include the original blue numbered boxes. Both have silver medallion grips with case colored hammer and trigger. Revolvers show slight cylinder drag line but remain in as new condition inside and out. Both right grip panels are stamped with serial numbers; No. 218 is stamped “559910” and No. 217 is stamped “560402”. It is a well-known fact that these grips were put on with no attempt to match numbers and we have never seen a single example where the numbers matched. This was a topic of discussion during last years Smith & Wesson Collectors Convention. Given the small run, this pair would make a fine investment for the future, as the popularity of N frame Smith & Wesson continues to grow.

Both revolvers feature blued finish, six shot, double action, and case colored hammer and triggers. Revolvers have matching serial numbers on frame, barrel and cylinder. One has Smith & Wesson hard rubber grips, while the other has Smith & Wesson checkered walnut grips, not numbered to the gun. Grips on both revolvers are near mint. Smith & Wesson factory letter on No. 694106 lists this gun in it’s present condition; shipped on August 7, 1940, as a .38 Model 1905 fourth change, 2” barrel, shipped to Boston Police Department ballistic unit, attention Sergeant Edward J. Seibolt. The back strap is stamped “B.P.D. 118 M”. Serial No. 694105 was shipped from the factory August 24, 1946, delivered to Lou Eppinger of Detroit, Michigan. The letter does not list any specifications. No mention of barrel length, finish or grips. An article by Mike Priwer in the Smith & Wesson Journal of Autumn 1993 discuses serial No. 694105 and pictures the gun with 2” barrel, round butt and rubber grips and all matching numbers. On this revolver the matching serial number is scratched on the inside of the left grip, as can be seen in the article. Article believes this revolver was made in 1938 or 1939, though it was not shipped until 1946. As to condition, No. 694105 retains approximately 85% total factory original blue with most of the wear of rear grip strip, which has turned a blue-grey patina and wear to cylinder approximately 30%, which is blending with gun metal gray. Serial No. 694106 displays approximately 75% original blue with most of the wear in the same areas and a touch more wear on the top strap. If this was not interesting enough, an article by Roy Jinks also deals with No. 694105, showing a strange marking on left trigger guard. Roy found this revolver was shipped on September 20, 1940 to the Norwegian Air Force in Canada; one of 625 revolvers. How this revolver was shipped twice from factory and has the Norwegian stamp remains a mystery still to be uncovered. Arguably one of the more interesting pair of consecutive number revolvers.

62 - (C) DWM NAVY REWORK POLICE LUGER SEMI-AUTOMATIC PISTOL.
Manufacturer: DWM
Model: P-08
Serial No. 4506
Caliber/Bore: 9mm Luger
Barrel Length: 3 - 7/8"
FFL Status: Curio & Relic

Featured in the book "Police Lugers" by Edward B. Tinker and Dwight Gruber on pages 94-99. This is a hard to find Police rework pistol that started out as an Imperial Navy Luger, reworked for the precinct police "R" of the Western Inspectorate in Chorlottenburg "W.I.". After being reorganized to get away from complicated district structure in favor of a unified organizational structure, the first unit mark "W.I.R112." from 1922 had been canceled. They then re-marked their equipment accordingly. The second police mark "S.B.5262." from 1932 is still visible. Unusual characteristics of this gun are as follows: Serial number is stamped on the frame inside of the left grip; the original grip safety has been removed; the frame has been shortened to take a standard P-08 barrel; the lower position safety mark has been removed and replaced at the upper position, this happened in the first World War and is known as the "First Issue, Altered"; a hole behind trigger was drilled for the magazine safety but was never installed; and the sear safety has been installed. Features V notch rear sight with factory dovetailed front sight, and unnumbered arsenal replacement wood grips. Retains approximately 92-95% finish of the arsenal reblue. Aluminum bottom blue magazine numbered 5933. Bore is good with sharp lands and grooves. Scarce matching numbered holster made by FRANZ COBAU in 1933. Accepted by the sunburst/L police inspector. Stitching is tight and the leather is in great shape with no crazing. A scarce Luger with lots of character and provenance. Comes with an author signed copy of the book "Police Lugers".

73 - (C) 1905 DMW DUTCH PROTOTYPE LUGER SEMI-AUTOMATIC PISTOL.
Manufacturer: DWM
Model: Dutch Prototype
Serial No. 10130B
Caliber/Bore: 9mm Luger
Barrel Length: 4”
FFL Status: Curio & Relic

Also known as the “Hollandsch Model”, this gun is featured in the following two books: first, “The Dutch Luger” pages 118-126 and second “The Borchardt & Luger Automatic Pistols” pages 296-301. This is a very interesting and historical pistol. It is in the B suffix range. The B suffix was set aside for prototype Lugers. This is one of the ten guns that was ordered in December 1904 and delivered in August of 1905 for the Dutch contract of 174 trials pistols. The significance of this gun is that it gave way to the “New Model” Luger, or Model 1906. Quite a few significant changes were made to this gun, first the frame was modified to take a coil main spring instead of a flat leaf spring. This was done by machining a new part and dovetailing it into the frame. This was also the first pistol that had flat toggle knobs and the omission of a toggle lock. Extractor is marked “GLADEN” only on the left side and the thumb safety is marked “RUST” with an arched arrow pointing up into the safe position. Like all Dutch Lugers this one is in poor shape but is the only known example out of the first ten Dutch guns. A very well documented gun. Here is a chance to own a very historical prototype Luger that is in the B suffix range. 10,000.00 - 12,000.00

This revolver is new and unfired in the original box. manufactured in 1982. It is estimated that Colt produced approximately 100 of the 3" nickel models, making it an extreme rarity in the modern Colt collecting world. Nickel finish with checkered walnut grips. This six shot, double action is extremely scarce with a 3" barrel in this finish. Includes the original box with warranty cards. We are not quite sure of the production numbers of the gun but they are extremely low. One would be hard pressed to find a nicer example. 2,500.00 - 3,500.00

Manufacturer: Colt
Model: SAA
Serial No. 207075
Caliber/Bore: .41 Colt
Barrel Length: 4 - 3/4”
FFL Status: Curio & Relic

Factory letter states this revolver was shipped on March 14th, 1901 to Simmons Hardware in St. Louis as a 4 - 3/4” .41 caliber with blued finish. It also includes a letter from famed master engraver David Wade Harris of Jacksonville, Texas where he lists this gun by serial number as performing the factory-type scroll engraving with full coverage and nickel finish. Revolver has all matching numbers and appears now just as in the Harris letter. The scroll engraving is typical 19th century style and beautifully executed. Revolver retains nearly all of the reapplied nickel finish. Sports a pair of pearl grips that are a bit shy and loose, and could use a new grip screw. Indexes and locks up like new. Strong bore. With some attention to the fitting of the pearl grips, this is an absolutely fantastic looking engraved Colt in the scarce .41 caliber. 4,250.00 - 5,000.00

129 - (A) ANTIQUE STEMBRIDGE STUDIO COLT FRONTIER SIX SHOOTER SINGLE ACTION ARMY REVOLVER.

Manufacturer: Colt
Model: Frontier Six Shooter
Serial No. 172544
Caliber/Bore: .44-40
Barrel Length: 5 - 1/2”
FFL Status: Antique

Manufactured 1897. Stembridge Studios in Hollywood, California was the largest gun rental company to the motion pictures during the Silent Era. At its height, their inventory consisted of tens of thousands of historical firearms that were rented by the studios for use in just about every movie ever made that required a firearm. One can only imagine how many Westerns this early Colt was used. The cylinder and barrel retain 50% of a long ago reapplied blue finish. Barrel markings are sharp. Frame has two line patent address. Matching numbers on frame, trigger guard and backstrap. Underside of barrel is stamped “.44”. Frame is stamped with a large “S” with serifs for Stembridge Studios. Wears a pair of period Colt gutta percha grips. Frame and straps are basically a gun metal grey. Muzzle is slightly rounded from holster wear. Indexes fine with a strong bore. Great opportunity to own a piece of Hollywood Western memorabilia. 2,750.00 - 3,250.00

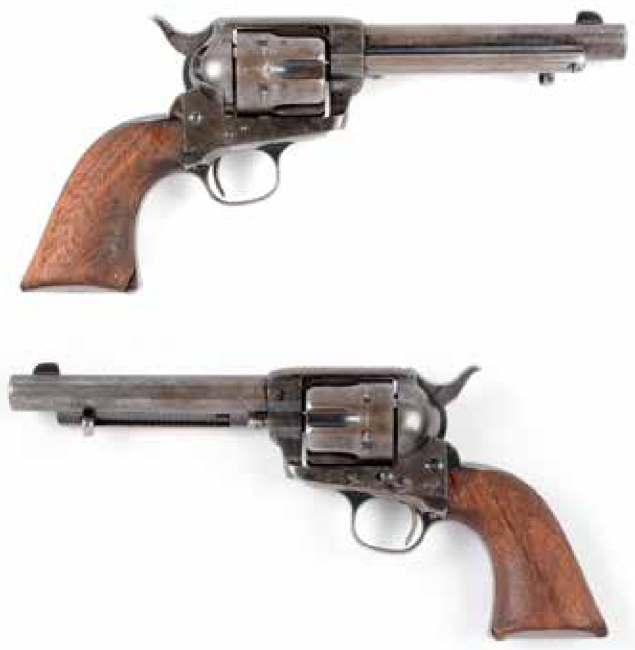
131 - (A) PERIOD ALTERED HENRY NETTLETON COLT SINGLE ACTION ARMY REVOLVER.

Manufacturer: Colt
Model: SAA
Serial No. 47056
Caliber/Bore: .45 LC
Barrel Length: 5 - 1/4”
FFL Status: Antique

Manufactured in 1878. Originally made for the U.S. military and inspected Henry Nettleton (H.N.). This revolver was period altered by shortening the barrel, adding a front sight and nickle plating and adorning with a pair of right panel carved ivory grips with eagle and snake. This design is most often seen in Mexico and border states. All parts have matching numbers with “H.N.” inspector stamps, including the barrel. Early donut style ejector head. Revolver shows traces of the period nickel plating with a single line barrel address and three line patent date. Metal is basically dark brown patina. Gun indexes and locks up fine. Ejector spring is weak and it is missing the cylinder pin locking screw. Most screws have some degree of damage with couple being replacements. Strong, clean rifled bore. Grips are very good with slight shrinkage. Nice old Western cowboy gun with the “look”. 1,700.00 - 3,000.00



LOT - 132

Manufacturer: Colt
Model: Single Action Army
Serial No. 131921
Caliber/Bore: .45 Colt
Barrel Length: 5 - 1/2"
FFL Status: Antique

Typical of these Artillery revolvers, they were rebuilt in the 1890's using original Cavalry revolvers; serviceable parts were reassembled and barrels shortened to 5 - 1/2", and subsequently reissued to Army troops in the Philippines at the turn of the century. The frame on this revolver, No. 131291, has the "R.A.C." (Renaldo A. Carr) inspector stamp. The barrel is No. 1297 with "D.F.C." (David F. Clark) inspector with two proof "P"s. Trigger guard is No. 119560, as is backstrap. Cylinder is No. 137124, under stamp "585" with "K" sub-inspector. No visible cartouche on walnut grips. Frame has three line patent address with U.S. stamp. Barrel legend is near mint. The frame shows traces of case colors. There are traces of original blue on trigger guard and backstrap. Balance of gun basically grey patina. Front sight slightly filed. Walnut grips are very good, shy at all corners. Donut ejector rod head with traces of blue in hidden areas of ejector rod tube. All four correct colt clicks. Aligns and locks up tight. Strong bore. Muzzle slightly rounded from holster. Traces of blue in cylinder flutes. Nice, honest, homogeneous Artillery. 3,500.00 - 5,000.00

Manufacturer: Colt
Model: SAA
Serial No. 340555
Caliber/Bore: .45 Colt
Barrel Length: 7 - 1/2"
FFL Status: Curio & Relic

Factory letter states Serial No. 340555 was sent as a blue .45 caliber single action to S.D. & G. New York on October 29th, 1920. The letter lists this barrel as 4 - 3/4" but it is clearly a period correct 7 - 1/2". Colt remains in fine condition; barrel and ejector rod housing retain approximately 95% original factory blue thinning at barrel an sides of muzzle. Cylinder retains approximately 85-90% original factory blue with the brown serrations around circumference of cylinder. Fire blue screw heads are all fairly concentric. Trigger guard has some thinning on inner grip strap and outer backstrap. 85% original case colors, some brilliant. Nice colors on hammer. The gutta percha grips fit correctly; left grip panel is numbered to gun. Mint bore and fine action. A fine condition pre-World War II Single action Army.

135 - (A) COLT SINGLE ACTION ARMY NICKEL & CARVED IVORY NEW YORK REVOLVER (1878).

Manufacturer: Colt
Model: SAA
Serial No. 38132
Caliber/Bore: .45 LC
Barrel Length: 7 - 1/2”
FFL Status: Antique

According to the factory letter this gun was shipped May 25th, 1878 in a shipment of 50 guns to Schuyler, Hartley & Graham, New York as a standard blue finish .45 caliber revolver. Upon disassembly of this gun, it is noted that the barrel is a condemned John T. Cleveland inspected No. 4898 that was renumbered by factory No. 8132. Colt commonly used condemned military parts in completing civilian orders. Once it arrived in New York City, the gun was nickel plated and fitted with a pair of two panel carved ivory grips. The left side is carved with an eagle and a ribbon inscribed with “E PLURIBUS UNUM”. Right side has an eagle and shield. It is extremely difficult to find a double carved set of ivory grips. Revolver has all matching numbers. The front sight has never been touched. Gun has the rare second model ejector housing with donut head, assembly No. 1771. Features one line barrel address and three line frame patent dates stamped “45 CAL” on left trigger guard. Overall the revolver retains 45% of the original dealer applied nickel finish, the balance blending to grey patina. Has all four correct Colt clicks. Locks up tight with near mint bore. Hand engraved on butt “W F BROOKE BLAIR NEB.” According to research, W. F. Brook was a policeman in Nebraska. Provenance dates this gun to well know dealer William Lane, 1988. A fine, early cowboy gun. 6,500.00 - 8,500.00

Manufacturer: Colt
Model: SAA
Serial No. 8530
Caliber/Bore: .45 LC
Barrel Length: 7 - 1/2”
FFL Status: Antique

Manufactured 1874. This revolver left the factory as an Ainsworth inspected U.S. issue cavalry revolver. During its lifetime, both the barrel and cylinder were replaced. As to whether this was done inside the factory, by a military arsenal or by a private individual is purely speculation. The frame, trigger guard and backstrap are all numbered “8530”. There is an Ainsworth inspector stamp on the trigger guard. The cylinder is numbered “5377” and has an Ainsworth inspector stamp and falls with in the Custer range. The barrel is numbered “8566” and is not military inspected. Barrel has one line address with serifs. Left side of frame has two line patent date with U.S. stamp. The barrel retains flashes of blue and is stamped “CS”. Balance of gun is basically grey patina. The one-piece grips are very good, slightly shy to metal with cartouche. Indexes and locks up fine with a strong, clean bore. 3,000.00 - 5,000.00

146 - (A) ENGRAVED & PLATED COLT MODEL 1860 ARMY PERCUSSION REVOLVER.
Manufacturer: Colt
Model: 1860
Serial No. 187319
Caliber/Bore: .44 Percussion
Barrel Length: 8”
FFL Status: Antique

Manufactured 1870. This standard Model 1860 six shot, single action percussion revolver appears to have been upgraded long ago. The frame, hammer, backstrap, trigger guard and barrel were scroll engraved, nickel plated and fitted with ivory grips that have now yellowed with age. The cylinder is No. 369 while the frame, barrel, trigger guard and backstrap are No. 319. Cylinder pin is not numbered. Most of the Naval battle scene is gone. The letters “IE” are stamped under the serial number on frame and trigger guard. Grips have shrunk a bit but are excellent. Retains approximately 95% of the nickel finish. Strong, rifled bore. Fine action. Very handsome, old, engraved and plated 1860 Army.

147 - (A) ULTRA RARE COLT WHITNEYVILLE HARTFORD TRANSITIONAL WALKER MODEL DRAGOON REVOLVER.
Manufacturer: Colt
Model: Walker
Serial No. 1161
Caliber/Bore: .44 Percussion
Barrel Length: 7 - 1/2”

One of the great rarities of the Colt collecting world, rarer than the Walker Model, it is stated that 240 examples were manufactured beginning with Serial No. 1100 and continued to serial No. 1340. All of these revolvers were manufactured in late 1847 at the new Hartford factory using up excess parts from the Walker in the process. Matching numbers on frame, barrel, trigger guard, backstrap and cylinder. Loading lever is numbered 966 and appears to be the only leftover part that does not match. Wedge is unnumbered. Barrel reads from breech to barrel address “SAMl COLT NEW-YORK CITY”. Left side of frame is stamped “COLT’S PATENT U.S.”. This is the more desirable of the two variations with the Walker-type grips that go into the frame. Has the large oval cut-outs and all original nipples. No trace of cylinder scene. Brass has never been cleaned. All legends are razor sharp. A few of the screw heads have light distortion. Indexes and locks up fine. Strong rifled bore. This rare Colt has been completely field stripped, examined and vetted by numerous experts and deemed to be one of the better existing examples of this extremely rare U.S. Martial revolver. It is considered by many to be the holy grail of Colt percussion revolvers. This revolver is examined in detail in the book of Colt firearms by R.L. Wilson on pages 82-84. 30 presentation models were given to the “who’s who” of military elite, further reducing the number made for regular troops. Provenance Butterfield & Butterfield September 8th, 1999. 60,000.00 - 90,000.00

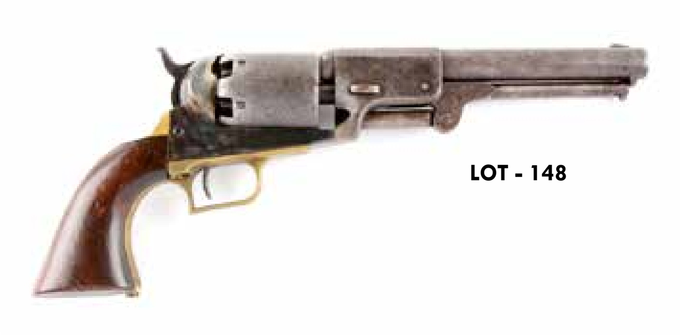
148 - (A) COLT 3RD MODEL DRAGOON PERCUSSION REVOLVER.

Manufacturer: Colt
Model: 3rd Model Dragoon
Serial No. 15318
Caliber/Bore: .44 Percussion
Barrel Length: 7 - 1/2”
FFL Status: Antique



LOT - 148

Manufactured 1855. All matching numbers with the exception of wedge not numbered. Frame is not U.S. marked. Barrel has New York address. This revolver has seen a lot of use; muzzle is rounded, barrel has areas of light pitting, cylinder scene is not visible, frame has had some wiped on finish, and loading lever is grey. Most of the screw heads show various degrees of distortion. The brass trigger guard has been replaced with a Second Model square back style, but is numbered to the gun and the font appears to be identical to the rest of the gun, so it may have been a factory leftover square back used on a Second Model. Trigger guard is inspector stamped “Z” on left rear and “A” on left front trigger bow, which would also indicate a Martially inspected gun. There are two plugged holes on the backstrap that would have been for mounting a shoulder stock, and the butt screw is extended which further indicated that this trigger guard and backstrap were leftover parts used to assemble this revolver. It is our opinion that this is all original as applied by factory, as it was a common practice to use leftover parts. 2,500.00 - 3,500.00

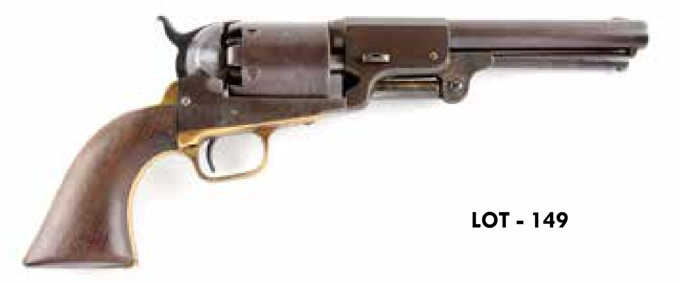
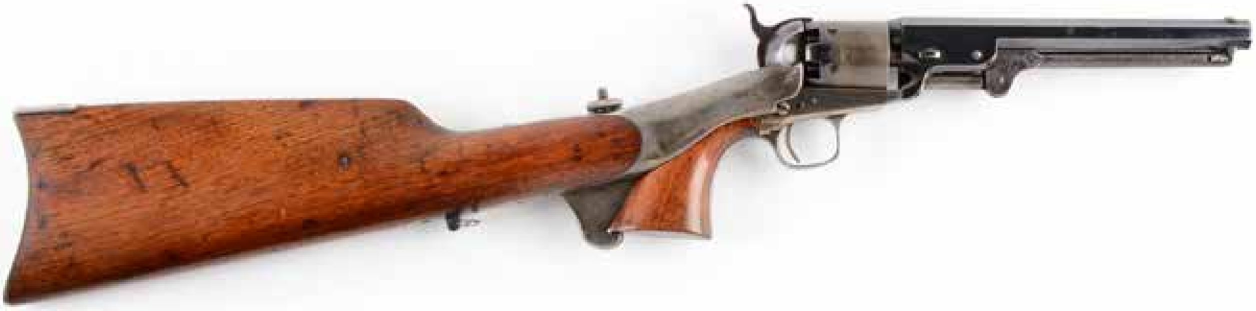
149 - (A) FINE CONDITION U.S. COLT 3RD MODEL DRAGOON PERCUSSION REVOLVER.

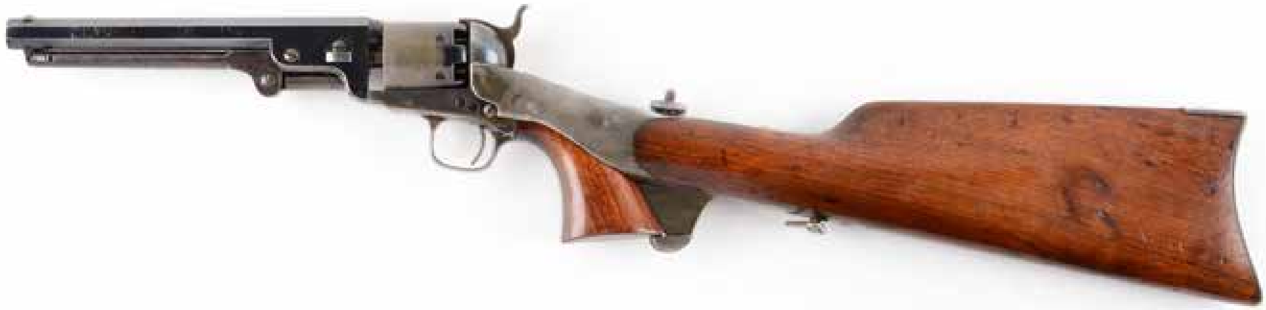
Manufacturer: Colt
Model: 3rd Model Dragoon
Serial No. 12629
Caliber/Bore: .44 Percussion
Barrel Length: 7 - 1/2”
FFL Status: Antique



LOT - 149

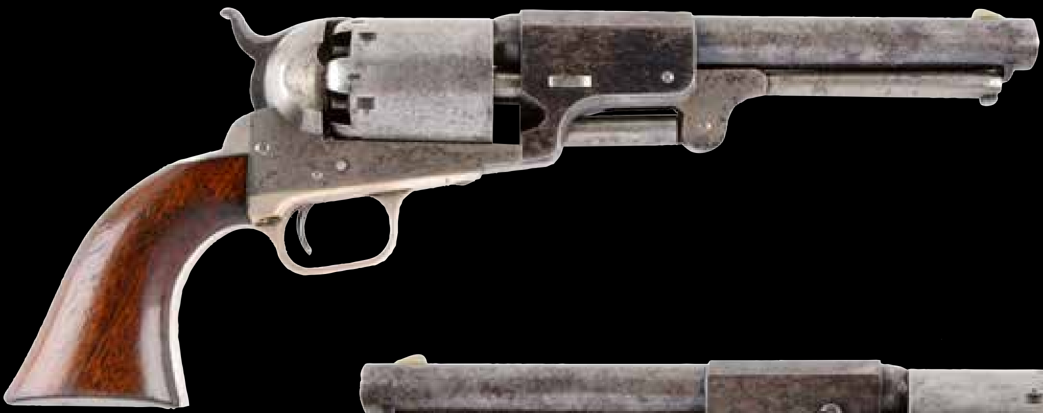
Manufactured 1853. This fine Dragoon features all matching numbers including wedge and loading lever. Top of barrel has the New York City address. Left side of barrel is stamped “JH” inspector (Joseph Hanis recorded as inspector for Colt Third Model Dragoon in the book “U.S. Military Arms Inspector Marks” by Daum & Pate page 94). Left side of the frame is stamped “COLT’S PATENT U.S.”. Cylinder has the roll-engraved Model USMR with cavalry scene. Features round brass trigger guard and brass backstrap. The butt of the gun is stamped 63 on the backstrap and both grip panels; probably rack number. Right side of frame has a “K” inspector stamp. Cylinder scene remains at approximately 40-50%. Left side of trigger guard has a “K” inspector stamp. Left front trigger bow has a “J” inspector stamp. This is a beautiful, untouched, far above average dragoon. All metal is a clean, smooth, soft homogeneous patina. Brass has never been cleaned and has some areas of verdigris. Virtually no pitting with the exception of a few small spots on cylinder and left recoil shield. One piece walnut grips are excellent with a few dings. Indexes and locks up like new. Screw heads are almost all basically true with just some light distortion. Extremely sharp rifling with some minor black powder abrasion. This is just the way you like to find these guns, clean and untouched. A fine example if a U.S. Military Colt Dragoon. 6,000.00 - 8,000.00

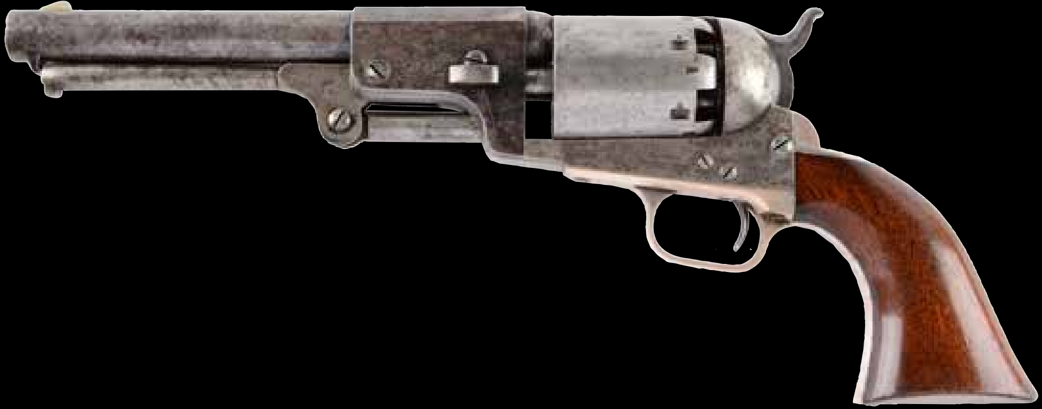




150 - (A) COLT MODEL 1851 NAVY PERCUSSION REVOLVER WITH MATCHING NUMBERED STOCK.
Manufacturer: Colt
Model: 1851 Navy
Serial No. 104344
Caliber/Bore: .36 Percussion
Barrel Length: 7 - 1/2"
FFL Status: Antique

Manufactured 1861. This revolver sports a London address barrel with a number "2" on the left lower lug, but bears no British marks of any kind, which leads us to believe that this was a leftover barrel that was assembled on this gun. All numbers are matching including wedge, cylinder and shoulder stock. Features octagon barrel with London address, dove tail front sight, six shot, single action; case colored frame, hammer and lever; iron backstrap, and silver plated trigger guard. Barrel has the high polish presentation quality London blue. The "2" would usually indicate that is was part of or was intended to be a two gun set. Loading lever has patterned out. The Naval cylinder scene only shows at about 75% with no finish forward of the locking notches and 80% blue to the rear of the notches. Cut for a shoulder stock. Retains 40% case colors on left side and 70% on right side. Trigger guard retains most of the plating, as does backstrap. Grips are excellent and proud to metal. Strong, clean bore. Indexes and locks up like new. The rare matching shoulder stock is original Colt with matching number on buttplate and lower tang. Retains most of the plating. Has a sling swivel. Wood is excellent with usual dings, but still proud to metal. An extremely fine, matching 1851 Navy with stock as assembled by Colt. This revolver was in the Texas Ranger Museum when it opened in 1968 until it was sold to Mr. Dick Nelsen in 1982. The letter is on Fort Fisher letterhead and signed by the curator who states this revolver was from the famous Ferguson collection. 3,500.00 - 5,500.00





151 - (A) PRESENTATION & CASED LONDON COLT 3RD MODEL DRAGOON PERCUSSION REVOLVER.

Manufacturer: Colt
Model: 3rd Model Dragoon
Serial No. 89
Caliber/Bore: .44 Percussion
Barrel Length: 7 - 1/2"

Approximately 700 English Hartford Dragoons were assembled at the Colt's London factory with British proof crown over "V" in 1853 only, making them extremely scarce in their own right. The silver plated backstrap on this revolver bears the inscription "C.B HALE 82nd REGt". The same inscription is found on the brass plaque on top of the Colt London oak display box. When researching C.B. Hale on the internet, there is a caption detailing the heroics of Lieutenant Colonel Hale as taken from a period book written on the events of his duty dated to 1858 and is easily researchable. All matching numbers including lever, with the exception of wedge which is numbered 150. The British proofs are easily seen on left side of barrel. Top of barrel has London address. The cylinder has the British proofs on every guard. USMR roll-engraved cylinder scene is virtually all visible. Trigger guard and backstrap retain virtually all of their nickel plating. The one piece walnut varnished grips are near mint. Most of the screws retain generous amounts of original Nitre blue, as does the trigger. The case colored frame has nickeled out. Cylinder is in the white. Case colors on loading lever have nickeled out. Barrel is basically a grey-brown patina with age freckling with generous amounts of blue on barrel flats. Indexes and locks up like new. Strong, clean, rifled bore. There is a Christies East London auction tag hanging from chain on trigger guard. The original London oak case is lined in blue velvet and comes with a James Dixon copper bag flask, metal jag and an Eley Bros. London cap tin. No bullet mold. It is obvious that this revolver did not see a lot of use. Extremely clean and presented to well-noted British officer from the mid-1850's. Fine original oak case. Beautiful presentation set. 12,000.00 - 16,000.00

Manufacturer: Colt
Model: 1851 Navy
Serial No. 63684
Caliber/Bore: .36 Percussion
Barrel Length: 7 - 1/2"
FFL Status: Antique

This model was manufactured between 1850 and 1873, with this example made in 1856. It has all matching numbers including the wedge. "U.S." stamped under Colt patent on the left side of frame. Military cartouches on both sides of the grip. Single line address on top of octagon barrel "ADDRESS SAML COLT NEW YORK CITY". The front sight has been replaced and was made out of an American U.S. coin and you can see "STATES" on the left side of the sight. Retains a very strong cylinder Naval battle scene. The finish is a smooth gray patina with mellow brass trigger guard and grip straps.

158 - (A) COLT 1861 NAVY CONVERSION REVOLVER WITH HOLSTER.
Manufacturer: Colt
Model: 1861
Serial No. 32179
Caliber/Bore: .38 RF
Barrel Length: 7 - 1/2"
FFL Status: Antique

Manufactured 1869. Typical Richard's Navy conversion revolver to fire .38 rimfire cartridge. There is no cylinder gate and cylinder has no traces of scene, but the number "179" matches barrel and frame. The brass trigger guard and back strap are numbered "182867". The ejector rod assembly is missing and can easily be replaced with a reproduction. All metal is a grey patina with brown age spotting with some brazing metal near the front sight. Barrel address is only partially readable. Walnut grips have small brad decorations. "U.S." and horse head on left and a fish on right grip. Homemade saddle ring installed. Indexes fine with a strong rifled bore. Includes a period leather flap holster. With a little bit of work and an ejector assembly, this would make a great early conversion. 1,000.00 - 1,500.00

Barrel Length: 3 - 3/4"
FFL Status: Curio & Relic

Manufactured 1910. This is an example of what is referred to as a two-tone high polish with Nitre blue small parts and deep, rich, royal blue finish. This has the Type D left side slide stamps introduced in late 1908. Type A right slide markings. Left side has pony in circle used from beginning of production to 1912. No arrows. Early "VP" proof on left trigger guard. Verified proof first applied in 1905. The hard rubber grips are the first rubber types used with scalloped "COLT" and pony in circle, which changed in 1911. Magazine is a beautiful pre-war two-tone with seven view holes, crimped base, stamped "CAL .32 COLT". Early diamond cut magazine release. Hint of wear on foregrip, muzzle and high edge of slide. Grips are near mint. Fine, sharp rifling. 95-97% all original factory high polish blue with high polish small parts. 600.00 - 1,000.00

Manufacturer: Colt
Model: 1903 Pocket Hammerless
Serial No. 277401
Caliber/Bore: .380 ACP
Barrel Length: 3 - 3/4"
FFL Status: Curio & Relic

Manufactured 1918. This pistol started off life as a standard Model 1903 Pocket Hammerless .32 caliber. A near mint, 99% original factory blue .380 slide has been fitted to this gun and is not numbered. Has a blued barrel with polished chamber and a blued magazine stamped "CAL .380 COLT". The frame of this pistol matches the blue on the .380 slide nicely having been expertly restored to match, while the .32 slide is a smooth blue-brown patina. The .380 slide, barrel and magazine are fitted into the bottom of a French fitted display case, on top of which a French fitted shelf holds the complete gun. By simply changing the barrel, slide and magazine the gun is capable of firing either cartridge. If one was to restore the .32 slide to match the frame, it would appear mint with either slide. The silver medallion checkered walnut grips are near mint. Both barrels have fine bores.

Manufacturer: Colt
Model: 1908
Serial No. 133133
Caliber/Bore: .380 ACP
Barrel Length: 3 - 3/4”
FFL Status: Curio & Relic

This rare pistol was manufactured in 1941. A total of 138,009 pistols of this model were made. It is estimated that approximately 5% of factory production was in nickel, which makes it quite rare. The original box has the pearl sticker and this pistol sports a pair of Colt genuine Mother of Pearl grips with the Colt silver medallions. As to condition, gun is near new inside and out. There is a double pencil sized flake at left top grip and a few minor bobbles along the left slide by edge. Still retains 99% or better all original factory nickel with razor sharp markings and an original nipple magazine stamped “CAL .380 COLT.” Bore is mint, gun appears to have not been fired. Housed in the original box which is numbered to the gun with proper end label stickers. All aprons are intact with some overall edge wear. This is the best original nickel and pearl we have ever seen. One would be hard pressed to find a better example. 4,000.00 - 5,000.00

Manufacturer: Colt
Model: 1911-A1
Serial No. 713366
Caliber/Bore: .45 ACP
Barrel Length: 5”
FFL Status: Curio & Relic

Manufactured 1938. One of the hardest to find of all pre-World War II Colt 1911 Army pistols. Left side of frame has the large “P” with small “h” next to magazine release. All pre-war checkered small parts including short wide spur hammer. Features military blue finish, checkered walnut grips, arched mainspring housing and lanyard. Slide is No. 713392, 26 numbers off from the pistol. A large majority of these were sent to ships and given the proximity of the numbers, it was probably wrongly installed by a ships armorer as the finish matches, showing approximately 50% original military blue finish. Left side of frame has the patent dates. Top of frame has the large “P”. U.S. Army marks on right side of frame. Blue barrel with polished chamber, letter “G” and stamped “COLT .45 AUTO” on left side. Strong bore. Pinned magazine. Excellent fully checkered walnut grips that show some rounding at base. Overall pistol has homogenous blue-grey appearance. 2,000.00 - 3,000.00

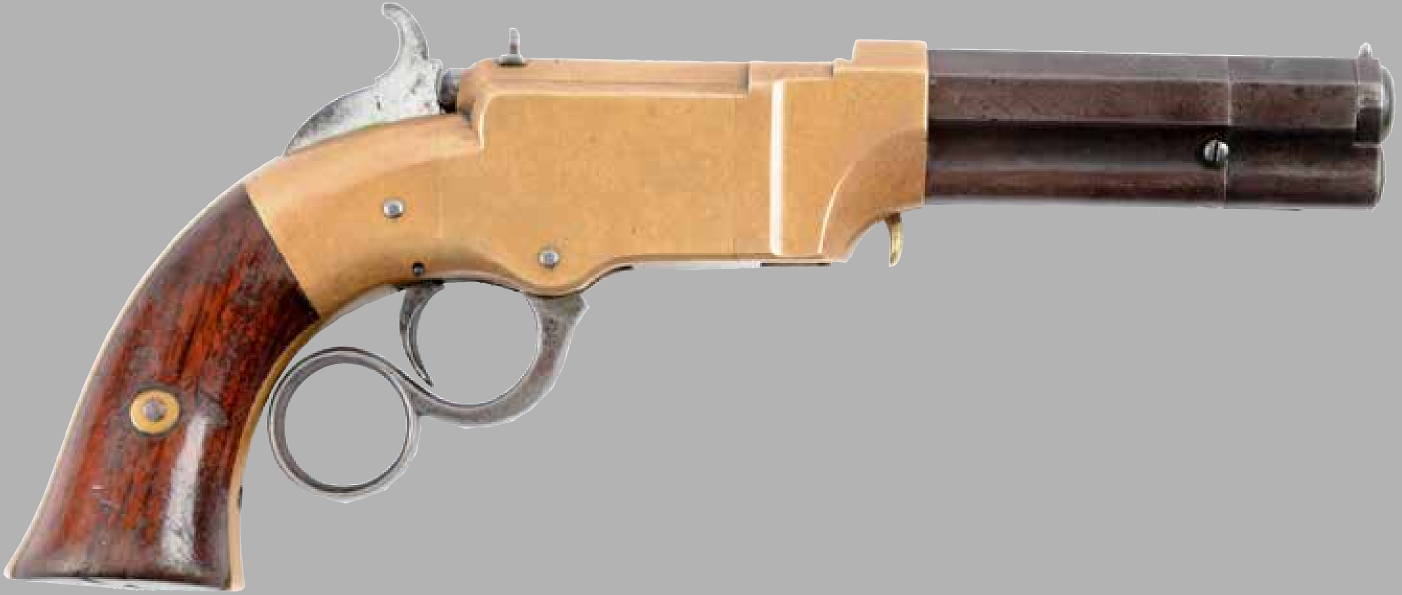
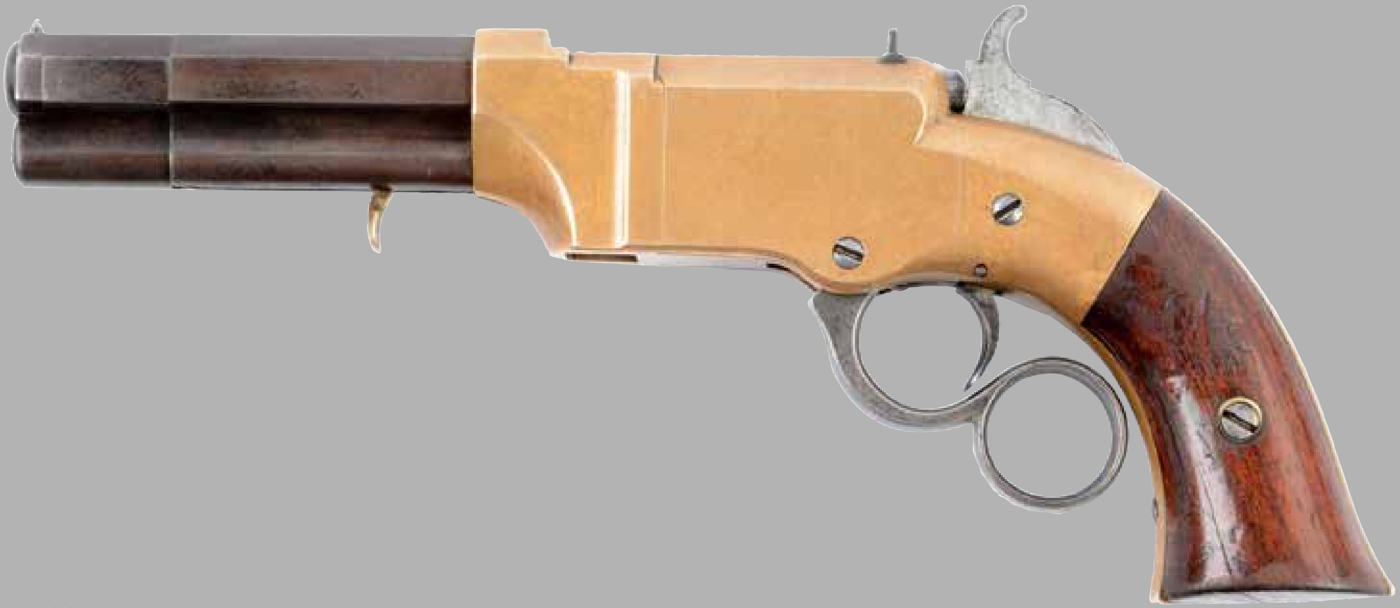
197 - RARE ORIGINAL COLT WALNUT DISPLAY BOX FOR 1848 BABY DRAGOON.
This exact case and color combination is listed as the first style contour cased 1848 Baby Dragoon 4 - 1/2” barrel pictured on page 210 in the book “Colt Accoutrements 1834-1911” by R. Rapley. These cases are extremely scarce. It is basically a plain walnut box with brown felt lining. There are no dividers, rather the bottom of the case is inlet for the gun and accessories. The felt is very nice and shows some wear. Walnut box has a repaired crack on top and is missing the lid latch. Comes with a brass Colt’s patent two cavity .31 caliber mold, Winchester cap tin, and a Colt 1849 Pocket Model flask, Model F24 on page 85. This is an early bullet mold with no sprue cutter and is either an M16 or M17 made for the 1848 Baby Dragoon as seen on page 122. If you have a beautiful, high condition, or special Baby Dragoon, you will find that the case is harder to find than the gun. 2,000.00 - 2,500.00





198 - (A) NEW HAVEN ARMS VOLCANIC LEVER ACTION PISTOL.
Manufacturer: Vocanic
Model: Pistol
Serial No. 1812
Caliber/Bore: 0.31
Barrel Length: 3 - 1/2”
FFL Status: Antique

Matching serial number stamped inside frame, inside grips. Links are unnumbered. These were manufactured and stamped on top of frame in two lines “NEW HAVEN CONN. / PATENT FEB 14 1854”. the New Haven Arms Co. was form on May 1st, 1857 to 1860 with estimated quantity manufactured 150 of the 3 - 1/2” No. 1 pocket pistol. Breech block bears the number 707, none of the other parts assembled at New Haven have numbers. This model is unusual in that it bears no engraving of any kind. Has the saw handle varnished walnut grips with matching number stamped inside. Case colored hammer has turned grey. Barrel and tube are a smooth grey-blue patina. Brass frame and sideplates have never been cleaned. Strong, rifled near mint bore. Grips fit nicely and have the majority of their original factory varnish intact. The spring that holds lever tight to gun, or lack of, allows the trigger guard to droop. Screw head slots are slightly marred. A nice, clean example that is rather scarce with the unadorned frame. 8,500.00 - 10,500.00

199 - (A) 1ST YEAR WINCHESTER MODEL 1894 10 O'CLOCK SCREW LEVER ACTION RIFLE (.38-55).
Manufacturer: Winchester
Model: 1894
Serial No. 3097
Caliber/Bore: .38-55 Winchester
Barrel Length: 26"
FFL Status: Antique

Factory research states that rifle No. 3097 was shipped as a .38-55 with an octagon barrel on July 18th, 1895 with serial number applied February 22nd, 1895. Only the first few thousand Model 1894 rifles, the majority of which were in .38-55 with a few known .32-40's, were shipped before the so-called ten o'clock screw was eliminated from the original design. Ten o'clock screw appears at the upper left corner of the loading gate, approximately where ten o'clock would be on a clock face. This early design change came before the other calibers were listed as available and are extremely scarce. This rifle is a true survivor. All original as manufactured and features a full octagon barrel, full magazine, sporting sights, blued finish, walnut stocks and rifle butt. All metal, with the exception of the bolt, is basically a soft grey-brown patina with razor sharp edges and legends. Bolt retains approximately 85% original factory blue. Wood is very good to excellent, proud to metal with no cracks, with some original finish. Fine action. Strong, clean bore. 2,500.00 - 4,000.00

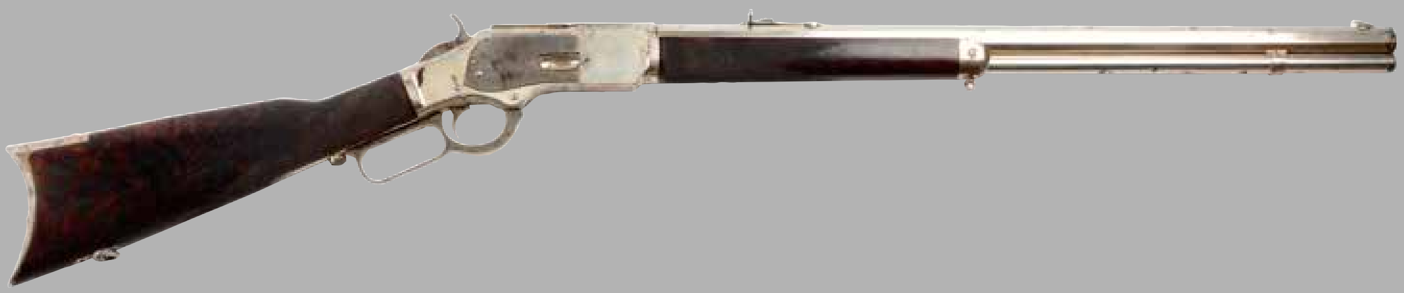
Caliber/Bore: .32-20
Barrel Length: 24”
FFL Status: Antique

Factory letter states that rifle No. 129307 left the factory July 13th, 1883 with an octagon barrel, set trigger, case hardened and with a checkered stock. Caliber is not listed. Features full octagon barrel, full magazine, sporting sights, straight grip checkered walnut buttstock with deluxe wood and rifle butt, checkered forearm, and case colored hammer, lever and frame. Barrel retains approximately 75% blue mixing evenly with soft patina. Tube is basically brown patina. The deluxe stocks are very good to excellent with beautiful grain. Checkering shows wear. Flashes of color on frame, lever and hammer with some age spotting and dull nickel appearance. 70% fire blue on loading gate. Strong, clean rifling and fine action. Very handsome deluxe 1873 with a great untouched look. 5,000.00 - 6,500.00

206 - (A) HIGH CONDITION DELUXE WINCHESTER MODEL 1894 LEVER ACTION RIFLE (.25-35).
Manufacturer: Winchester
Model: 1894
Serial No. 12962
Caliber/Bore: .25-35
Barrel Length: 26”
FFL Status: Antique

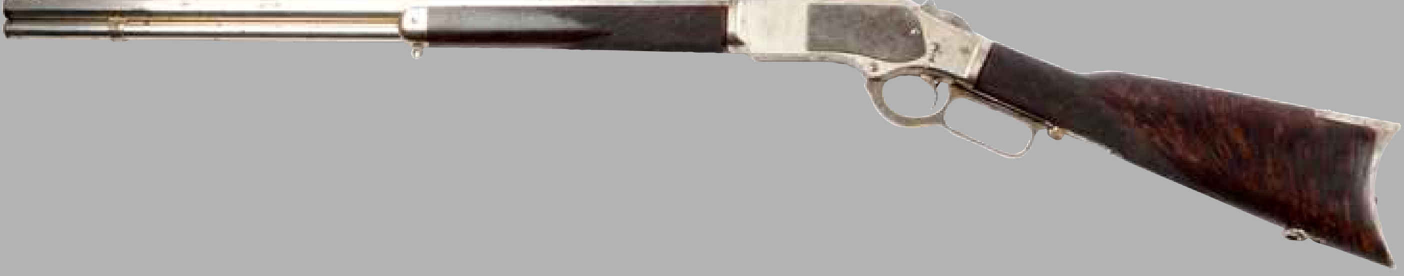
Factory letters states that rifle No. 12962 was shipped from the warehouse on July 31st, 1896 with a round barrel, set trigger, checkered stock, shotgun butt, takedown and in caliber .25-35 WCF. There is a remark on the letter “This buttplate needs rubber cushion buttplate.” It currently sports a typical steel checkered buttplate. Also has sling eyes not mentioned in letter. There is a pin in frame top rear that goes through the receiver that was obviously installed for an over the frame peep sight of some sort. Has standard sporting sights. Rifle remains in beautiful condition. Barrel and tube retain approximately 95% bright factory blue, browning a bit at muzzle and very little takedown wear on tube. Forend cap has 85% original blue. Frame retains approximately 90% original bright factory blue, including takedown ring which usually flakes white almost immediately. Loading gate has 75% of the Nitre blue finish. Bolt has 95% original blue finish. Generous case colors on hammer and lever, some bright. Straight grip walnut checkered stock chows beautiful grain, is prod to metal with no cracks or chips and retains most of the original finish with sharp checkering. Just usual dings and light wear. Fine bore and action. This is a wonderful high condition example of an antique Winchester in a rare caliber with loads of extra features. 5,500.00 - 8,500.00

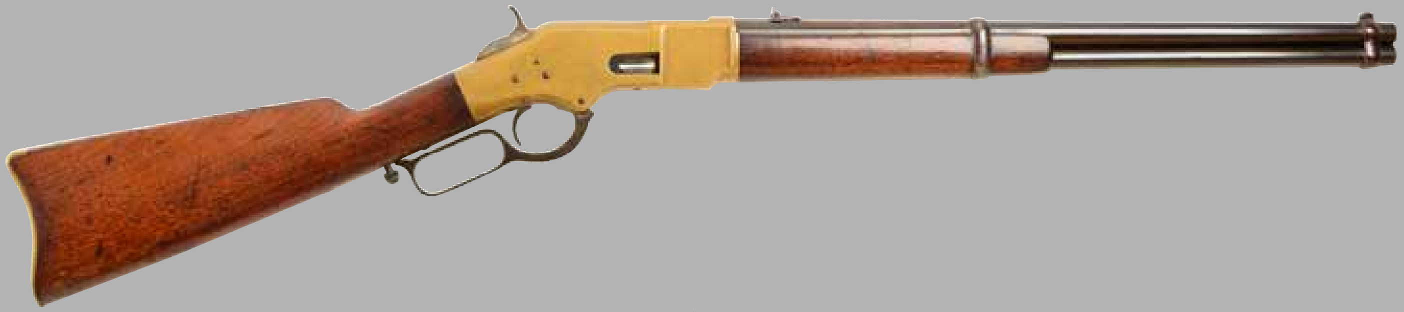


207 - (A) WINCHESTER 2ND MODEL DELUXE FULL NICKEL 1873 LEVER ACTION RIFLE.

Manufacturer: Winchester
Model: 1873
Serial No. 30190
Caliber/Bore: .44-40
Barrel Length: 24”
FFL Status: Antique

Factory letter states that rifle Serial No. 30190 was shipped on July 9th, 1878 with a full octagon barrel, set trigger, checkered straight grip stock, factory sling swivels and in full factory nickel finish which includes all metal parts with the exception of the fire blue rear sight elevator. All legends are sharp as new. As usual, the nickel plating shows areas of brown spotting as the nickel flaked or bubbled; still retains at least 85% of this rare factory finish. Has the early Second Model recessed thumbprint dustcover on screwed-in rail and there are no caliber markings as the .44-40 was the only available caliber at this time. The Second Model 1873 bears the distinction of having the shortest production run of all three models. Wood is excellent with dark fiery grain on both sides of stock and razor sharp checkering. Fine action. Strong, near mint bore. An extremely handsome and rare early deluxe Second Model 1873 Winchester in very scarce full nickel plating. 7,500.00 - 12,500.00





208 - (A) EXTREMELY FINE WINCHESTER MODEL 1866 LEVER ACTION CARBINE.
Manufacturer: Winchester
Model: 1866
Serial No. 135785
Caliber/Bore: .44 RF
Barrel Length: 20”
FFL Status: Antique

This little beauty was manufactured in 1877 and has seen very little use having been well taken care of. Features full round barrel, full magazine, twin barrel bands (front band with integral front sight), brass frame, brass carbine style buttplate with trapdoor, saddle ring, folding leaf rear sight and walnut stocks. The barrel and tube show generous amounts of original factory blue with the barrel starting to lightly thin at breech and mixing with a soft patina. Loading gate retains 70% of the original high polish blue. Lever and hammer case colors have basically turned a soft patina. Stocks are very good to excellent with just some minor bumps and the majority of the varnish intact, proud to metal, with no cracks. Brass is untouched, dark mustard with traces of verdigris. Sharp screws with light marring. Fine action and a clean, strong bore. This early little carbine remains in untouched original condition and one of the finer examples that you will find. A true American Western classic in highly collectible condition. 10,000.00 - 12,000.00

Barrel Length: 24”
FFL Status: Antique

Manufactured 1902. Features full octagon barrel, full magazine, Winchester sporting rear sight, broken Beaches front sight, blued finish, case colored hammer and lever, walnut stocks and rifle butt. These rifles are notorious for their usual less than desirable condition, but this example retains a generous amount of original finish. Barrel and tube retains approximately 80-85% original factory blue with razor sharp brown high with some patina showing through. Nose cap is brown patina. Frame retains 65-75% original high polish Winchester factory blue finish with some typical finish serration lines on left sideplate. Colors have basically darkened on hammer and lever. Stocks are extremely nice, proud to metal in untouched all original finish. Left side of barrel at breech does have a small flattened hammer spot and a couple of carved letters approximately 1” that simply look like little teepees. By far one of the better condition examples we have seen. Fine action. Visible rifling. 2,500.00 - 3,500.00

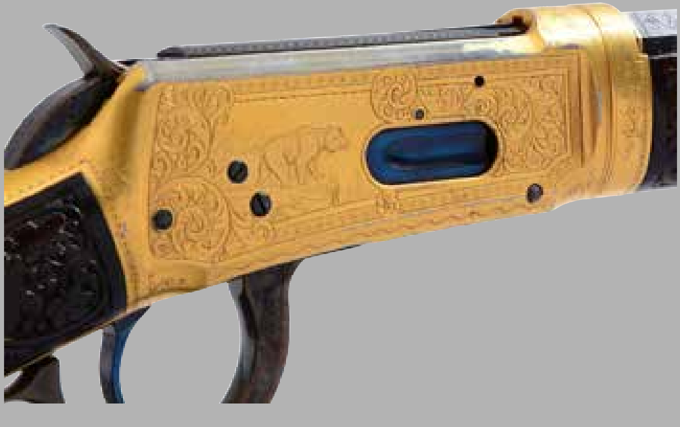
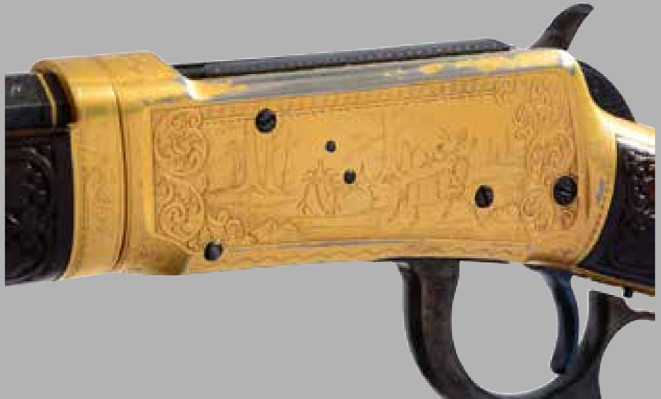
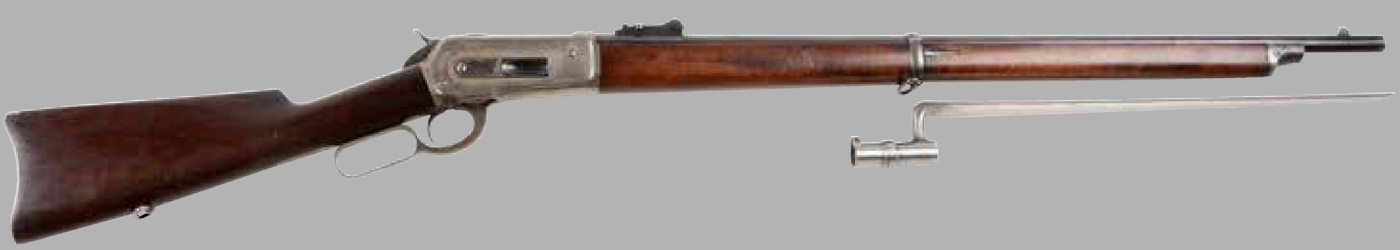
229 - (C) EXTRAORDINARY WINCHESTER ULRICH ENGRAVED DELUXE MODEL 1894 LEVER ACTION RIFLE.
Manufacturer: Winchester
Model: 1894
Serial No. 308993
Caliber/Bore: .32 Winchester Special
Barrel Length: 26”

Very rare special order ’94 with octagon to round barrel, half magazine, takedown, with Lyman ivory bead hunting front sight, semi-buckhorn rear sight and Lyman locking combination tang sight. Mounted with triple X very highly figured, center crotch, flame grain American walnut with style “A” carved forearm, capped pistol grip stock, and smooth steel shotgun buttplate; this style of stock carving was $60 in 1897 (page 223 in the book “Winchester Engraving”). Left side of lower tang is stamped with the assembly number “1178”, “X” and “SC”. There is also a tiny “61”. The matching assembly number is on the rear face of buttstock, under the buttplate, along with “94”. Matching assembly number is also found inside toe of buttplate. Receiver is beautifully engraved in style “4” by John Ulrich and is signed on the lower tang behind the trigger. Lower tang is also engraved in period script “Millard P. Duell”. Engraving consists of a very large panel of a hunter shooting from behind a tree with two wounded bull elk in the foreground, all in a forest scene on the left side; and a grizzly bear in a mountain scene on a promontory on the right side, all surrounded by foliate arabesque patterns and wavelet borders. Top and bottom of receiver, top and bottom tangs, hammer, lever, takedown ring, forend cap, screws, buttplate tang and exposed flats of barrel over chamber area are engraved to match. Base of barrel at the receiver and around the muzzle are inlaid with gold bands. Receiver, takedown ring, forend cap and buttplate are all gold plated. Accompanied by several Winchester Museum, Buffalo Bill Historical Center and Cody Firearms Museum letters dating 1971, 1982 and 2008; all of which provide the identical information that identifies this rifle in .32 Winchester Special caliber with half octagon barrel, half magazine, plain trigger, “clover leaf rear, Lyman front, Lyman rear” sights, takedown, engraved $24.00, No. 4 and gold trim, received in warehouse March 27th, 1907 and shipped same day to Order No. 93543; repair and return on June 29th, 1917. Note: A clover leaf sight is described in The Winchester Book by Madis, as a style “28” which is a semi-buckhorn style as found on this rifle. The sight currently on this rifle is of a later vintage with smooth edges rather than the serrated edges of the 1917 era when this rifle was most likely restored. This rifle is pictured, on page 172 with three photographs, in the book “Winchester Engraving” by R.L. Wilson. The caption details mostly only the information found in the letter and states that when the rifle was returned and repaired in 1917 “at which time the inscription on lower tang was engraved”. PROVENANCE: Lloyd Goff Collection; Glenn Hockett Collection; Wes Adams Estate Collection. Very fine as restored. Overall retains about all of a factory restored finish to both metal and wood; barrel and magazine tube retain 97-98% strong, factory reapplied blue with only light muzzle and sharp edge wear; receiver, takedown ring, forend cap and buttplate retain most of their strong gold plating with some light flaking on top edges of the receiver; lever and hammer retain brilliant case colors; wood is sound with a few very minor nicks and scratches and retains about all of its fine restored finish. Mechanics are crisp, brilliant shiny bore. 25,000.00 - 45,000.00







230 - (A) RARE WINCHESTER MODEL 1886 LEVER ACTION MUSKET WITH BAYONET.
Manufacturer: Winchester
Model: 1886 Musket
Serial No. 82373
Caliber/Bore: .45-70
Barrel Length: 30”
FFL Status: Antique

Manufactured 1893. This rare musket is part of a group of an entire collection of Winchester muskets dating from 1866 to 1895 that took the consigner nearly 50 years to complete. This is the second rarest of all Winchester muskets behind the trial Model 1894. In a Winchester letter dated 1976, Serial No. 82373 musket in caliber .45-70 was shipped on September 15th, 1893 with ten other muskets; barrel lengths not listed. It is two numbers off the one pictured in “The Winchester Book” by Madis. According to a hand-written letter about private research done within the records, 372 total muskets were ever made, all noted with 32” barrels, although Serial No. 82373 (this gun) and 82375 both have 30” barrels. It must be assumed that the 11 muskets shipped together were the majority of the 30” barrels sent. Gun features single barrel band with swivel, forend tip, post front sight, military rear sight, carbine buttplate with trapdoor, rear swivel in stock, blued bolt and loading gate, and case colored frame, lever, hammer and buttplate with full length walnut forend and buttstock. 85% original factory blue on barrel. Fire blue on screws and base of sight. Sharp legends. 95% blue on bolt. Traces of color on frame and lever. Generous color on hammer. Buttplate is grey. Stock is excellent with minor impressions. Strong, clean, near mint bore. The bottom of the frame is hand stamped “CERION” (origin unknown). The serial numbers of the 11 muskets is listed on the factory letter; all were shipped on September 15th, 1893. Again, this is one of the great rarities of Winchester collecting and one could look a lifetime for another example. Comes with an original socket bayonet in the white.

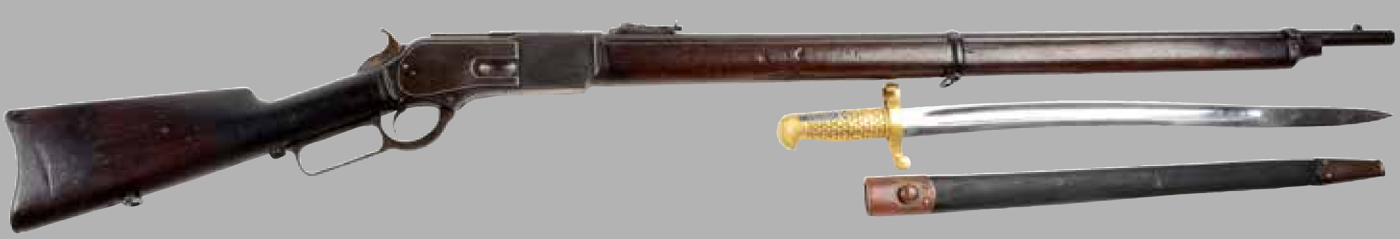
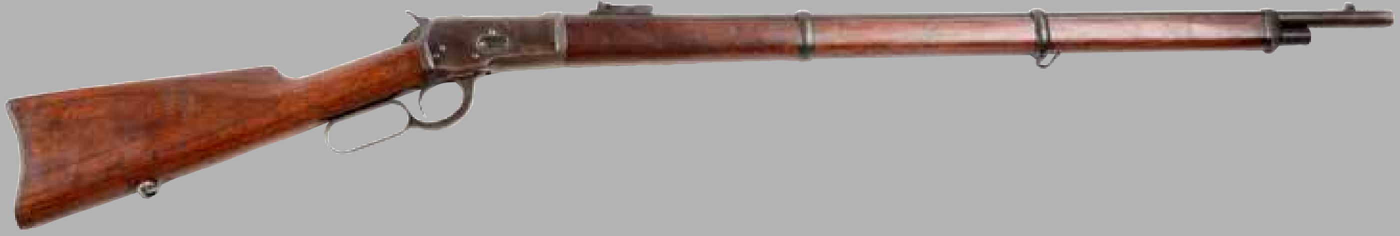
231 - (C) WINCHESTER MODEL 1894 LEVER ACTION MUSKET - THE RAREST OF ALL WINCHESTER MUSKETS.
Manufacturer: Winchester
Model: 1894 Musket
Serial No. 418972
Caliber/Bore: .30-30 WCF
Barrel Length: 30"
FFL Status: Curio & Relic

Serial No. 418972 was applied at the factory on October 14th, 1908. This rare musket is part of a group of an entire collection of Winchester muskets dating from 1866 to 1895 that took the consigner nearly 50 years to complete. This musket features three barrel bands, extended magazine, post front sight, military rear sight, blued finish, full length walnut forend, sling swivels, walnut carbine buttstock and carbine buttplate. The condition of this rare trial musket is phenomenal; barrel retains approximately 98% original factory blue, as does tube; 95% blue on front band; 80% blue on the rear two bands starting to patina; 95% bright blue on both sides of frame, patina on bottom; 80% bright blue on loading gate; fire blue on rear sight spring; traces of case colors on lever; 80% original blue on buttplate. Stock is near mint with raised grain. Fine action and near mint bore. Comes with angular bayonet. Impossible Model 1894 Musket and one of two known to have been produced for socket bayonet. According to information found on page 53 of the book "Winchester Model 94 2nd Edition" by Renneberg, there were only "five true musket examples: all were produced experimentally and all were originally in the Winchester Museum Reference Collection." He states that not all five are thought to have survived. He also states that there were two bayonet designs used, the saber type and the socket type as found on this musket. This musket, along with three other muskets are listed, by serial number, in the "Inventory of the Winchester Repeating Arms Company Firearms Reference Collection", E. Pugsley, et al. Manufactured in 1908. Two of the other muskets are listed with 26" barrels and the third musket barrel length is not listed and all three are indicated as being fitted for saber bayonets. This musket is one of the two remaining muskets made with "angular" (socket) bayonet. The other socket bayonet rifle sold at Julia's in 2013, neither had a trapdoor. Accompanied by an original socket bayonet of the Winchester Model 1873 style with 18-1/2" triangular bayonet and standard socket with locking ring. If one was to try and complete a collection of Winchester muskets, this would have to be considered the Holy Grail as it is one of only two examples currently known to the hobby. The other musket that sold in 2013 went for $43,125.00. This musket, along with the others in this collection, is the first time a complete collection of muskets has been offered for sale at one time in one place, and this is obviously the rare key to any musket collection. To say it would be hard to improve upon condition would really make no difference, given there aren't any others to buy. Possibly a once in a lifetime opportunity. 20,000.00 - 40,000.00



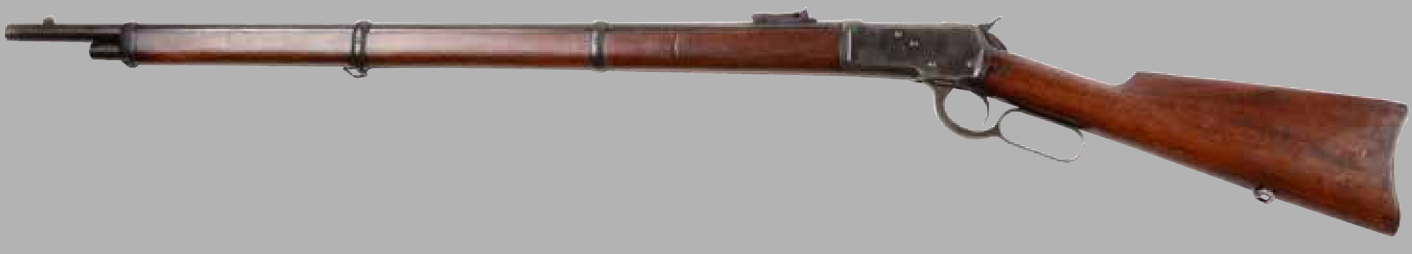
232 - (A) RARE WINCHESTER MODEL 1876 LEVER ACTION MUSKET WITH BAYONET.
Manufacturer: Winchester
Model: 1876 Musket
Serial No. 5067
Caliber/Bore: .45-75
Barrel Length: 32”
FFL Status: Antique

This musket was received in warehouse August 22nd, 1878 and shipped on August 19th, 1882. This rare musket is part of a group of an entire collection of Winchester muskets dating from 1866 to 1895 that took the consigner nearly 50 years to complete. Another great rarity in Winchester collecting in the 1876 full length musket. The majority of known examples were sent to the Civil Guard of Hawaii. This has several small differences and is not a Hawaiian Civil Guard rifle. The wiping rod, located on the left side of forend, is not a feature of all 1876 muskets as some were produced without this option. Rifle has post front sight, military rear sight, address stamp on top, two bands, rod on side, two sling swivels, blued finish, and walnut stocks with carbine buttplate. No trapdoor. The front barrel band has saber bayonet lug located on right side. Barrel and bands are a pleasing mix of blue with soft patina and sharp legends. The frame is basically a blue-brown patina with gun metal grey around edges. Caliber is not marked. Wood is very good to excellent, very dark with usual dings. Fine action. Strong, clean bore. Comes with a saber bayonet and leather sheath. Determining value is extremely difficult as there are only a few recorded sales of these muskets on the open market and, like a few others, are simply never seen. 10,000.00 - 15,000.00



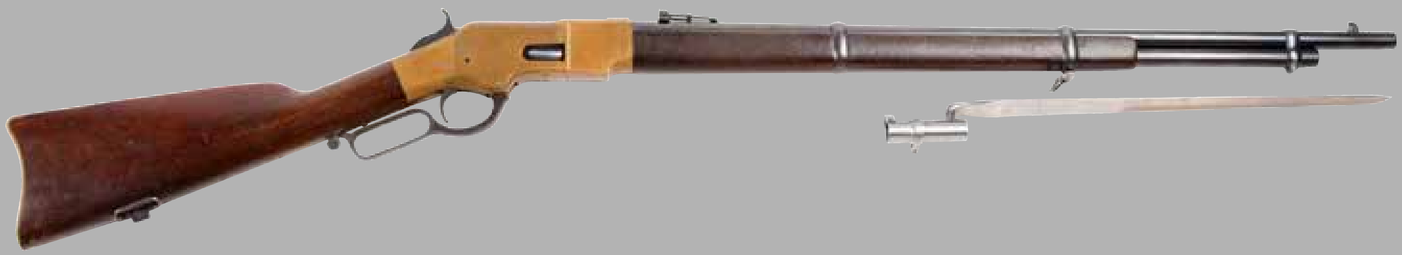
233 - (A) WINCHESTER MODEL 1892 LEVER ACTION MUSKET.
Manufacturer: Winchester
Model: 1892 Musket
Serial No. 83663
Caliber/Bore: .44-40 WCF
Barrel Length: 30”
FFL Status: Antique

Serial number applied November 10th, 1897. This rare musket is part of a group of an entire collection of Winchester muskets dating from 1866 to 1895 that took the consigner nearly 50 years to complete. Features round barrel with post front sight and military rear sight, three barrel bands, full length wooden forend, carbine butt with trapdoor and two sling swivels. Left side of the frame and barrel have first and second English proof marks and two line barrel address. Standard blued finish. Right side of the stock is stamped “P.S. LA PAZ N3392”. As with most existing 1892 muskets, it is believed the bulk were for foreign orders, in this case the rifle made its way through England to La Paz, Bolivia. All metal is a pleasing blue-grey soft homogeneous patina with no pitting. 80% blue on loading gate. Walnut stocks are excellent. Strong, clean, near mint bore. While the 1892 is not the rarest musket, all muskets with the exception of 1866, 1873 and 1895 are scarce to impossible and rarely seen for sale, making it very difficult to estimate value as very few can be found having been sold, especially in such fine original, untouched condition as most collectors know Winchester rifles bound for foreign lands seldom surface in any condition at all. 8,000.00 - 10,000.00



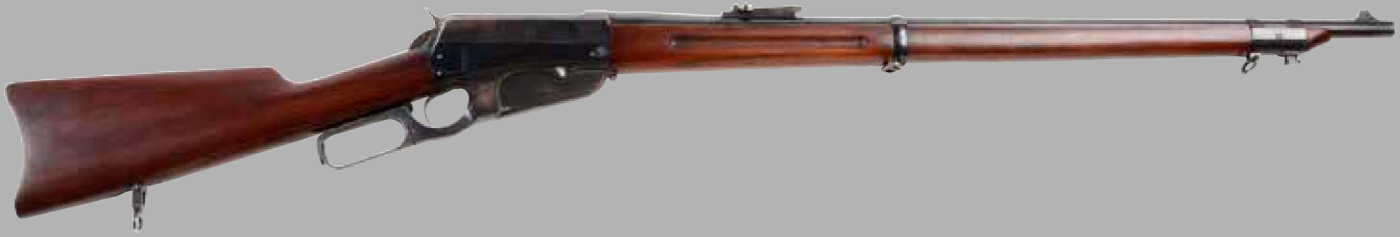
234 - (C) UNFIRED WINCHESTER MODEL 1873 LEVER ACTION MUSKET WITH BAYONET.
Manufacturer: Winchester
Model: 1873 Musket
Serial No. 571120
Caliber/Bore: .44-40 WCF
Barrel Length: 30"
FFL Status: Curio & Relic

This rare musket is part of a group of an entire collection of Winchester muskets dating from 1866 to 1895 that took the consigner nearly 50 years to complete. Manufactured 1903. This is arguable 1873 musket extant and appears to have never been fired. Has 100% fire blue on loading gate and 90% fire blue on firing pin. Balance of blue on frame, barrel, tube and three barrel bands is 98% with some flaking on rear barrel band, a hint of muzzle wear from bayonet and a couple of age spots on the frame. The buttplate with loading gate retains all of the brilliant case colors. The hammer and lever retain most of the case colors and/or pattern. Bore and action are like new. Comes with a bayonet finished in the white. 8,000.00 - 10,000.00



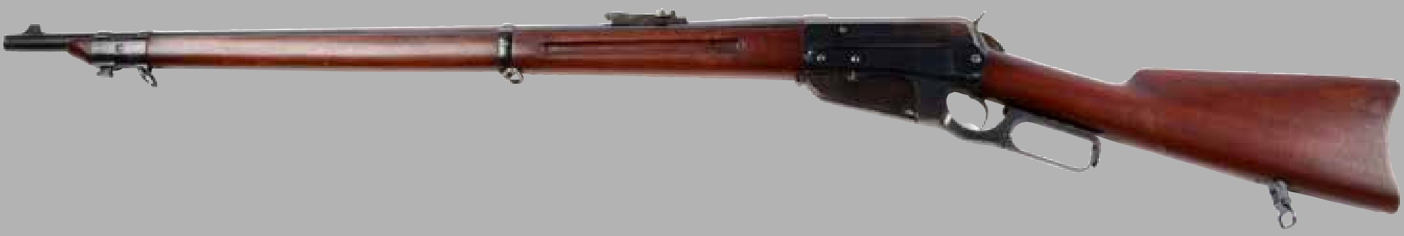
235 - (A) WINCHESTER MODEL 1866 LEVER ACTION MUSKET WITH BAYONET.
Manufacturer: Winchester
Model: 1866 Musket
Serial No. 32195
Caliber/Bore: .44 RF
Barrel Length: 28”
FFL Status: Antique

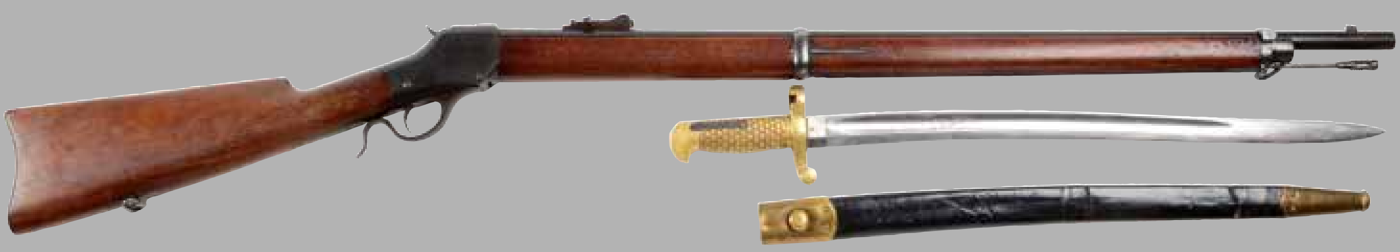
Manufactured 1870. This rare musket is part of a group of an entire collection of Winchester muskets dating from 1866 to 1895 that took the consigner nearly 50 years to complete. Offered is an extremely fine 1866 musket. Features full round barrel, extended magazine, military post front sight, folding ladder rear sight, brass frame, blue loading gate, three bands, two sling swivels, and brass carbine buttplate with trap. This rifle remains in excellent condition. Barrel and tube retain approximately 85-90% original blue. Front barrel band retains 75% blue. Rear two barrel bands are grey patina. The mustard yellow frame has never been cleaned. Lever and hammer colors have darkened. Stocks are very good to excellent with usual dings. Brass buttplate never cleaned. Most of the screws still have the majority of their fire blue finish on frame and buttplate. Fine action. Strong, rifled bore is near mint. Comes with an angular socket bayonet. The Model 1866 musket was termed the Infantry rifle. This is definitely one of the finer examples. 9,000.00 - 11,000.00



236 - (A) HIGH CONDITION WINCHESTER MODEL 1895 LEVER ACTION MUSKET.
Manufacturer: Winchester
Model: 1895 Musket
Serial No. 7195
Caliber/Bore: .30-40 Krag
Barrel Length: 28”
FFL Status: Antique

Manufactured 1897. This rare musket is part of a group of an entire collection of Winchester muskets dating from 1866 to 1895 that took the consigner nearly 50 years to complete. Winchester desperately tried to get a U.S. contract for the 1895 musket. Tens of thousands of muskets were made for foreign countries in non-American calibers but it was General Miles that placed an order for 10,000 muskets from Winchester in May of 1898 as the demand for arms was heavy due to the Spanish American war. When the parts and muskets had been inspected by the army at the Winchester factory, a large number were rejected for unsubstantial reasons. After discussion, the 10,000 passed inspection. In 1899, 100 were issued in the Philippines but the Ordnance board gave them an unfavorable report and the 100 muskets were returned to the United States and sold to a Boston arms dealer. The remaining 9,900 were sold to a New York dealer who sold them to Cuba in 1906. All of these arms were marked “U.S.”. Civilian orders were manufactured in .30 Army and .303 British. It is unknown how many civilian muskets were manufactured for the retail trade but the number had to be very small, and one could search for years for a non-military stamped model. The NRA adopted some 40 muskets, made to comply with club rules, and a few were offered with 24” barrels in .30-03 and .30-06. The .30-40 Krag Models were manufactured with standard 30”. This is the first 28” barrel retail Model 1895 musket that we have seen. Efforts to research other models on the market proved unsuccessful, further proving the rarity of this model. Civilian model muskets exhibited several differences with their military counterparts. This rifle remains in nearly new unfired condition with 99% blue on barrel, 98% blue on magazine with touch of wear, 90% blue on frame balance towards rear simply flaked, 100% blue on bolt, 100% Nitre blue on extractor and base of rear sight. Some thinning of finish on bottom of lever and magazine. 75% blue on buttplate; thinning on top and bottom. Rifle is equipped with three sling swivels, two bands and bottom bayonet lug on front band. Near mint bore and Fine action. This is an early post-flatside musket. It was impossible to determine total civilian sale muskets but it is rare as we can find no record of any other examples being sold. 10,000.00 - 12,000.00



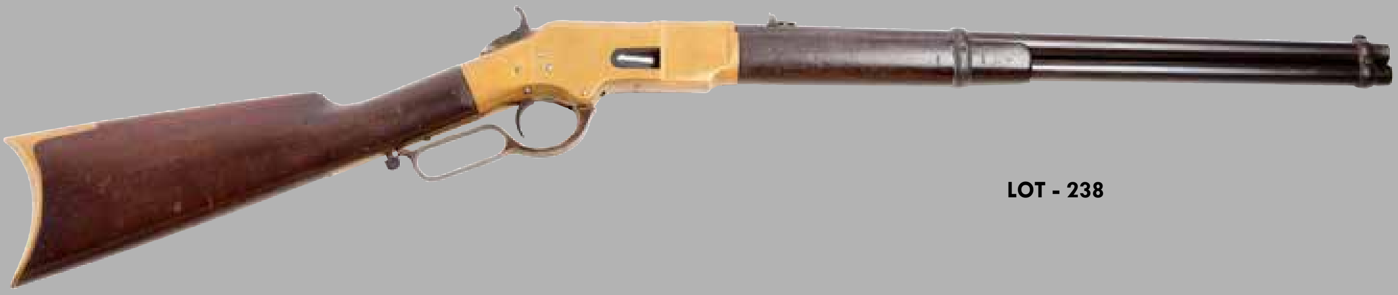


LOT - 237

237 - (A) WINCHESTER MODEL 1885 HIGH WALL MUSKET.

Manufacturer: Winchester
Model: 1885 High Wall
Serial No. 9855
Caliber/Bore: .45-70
Barrel Length: 32”
FFL Status: Antique

Manufactured 1887. This rare musket is part of a group of an entire collection of Winchester muskets dating from 1866 to 1895 that took the consigner nearly 50 years to complete. First Model muskets are rare; before serial number 90,000 only 1 in 230 Model 1885’s were produced as muskets, after this number, most muskets were in .22 caliber. Features military ladder rear sight, post front sight, two bands, cleaning rod, sling swivels, full length walnut forend and walnut buttstock with carbine buttplate. No trapdoor in butt. Metal retains 95% of a dull blue finish with some minor touch-up. Wood is excellent. Strong, clean bore. Comes with a socket saber bayonet with leather sheath and stamped “B”. 7,500.00 - 9,500.00

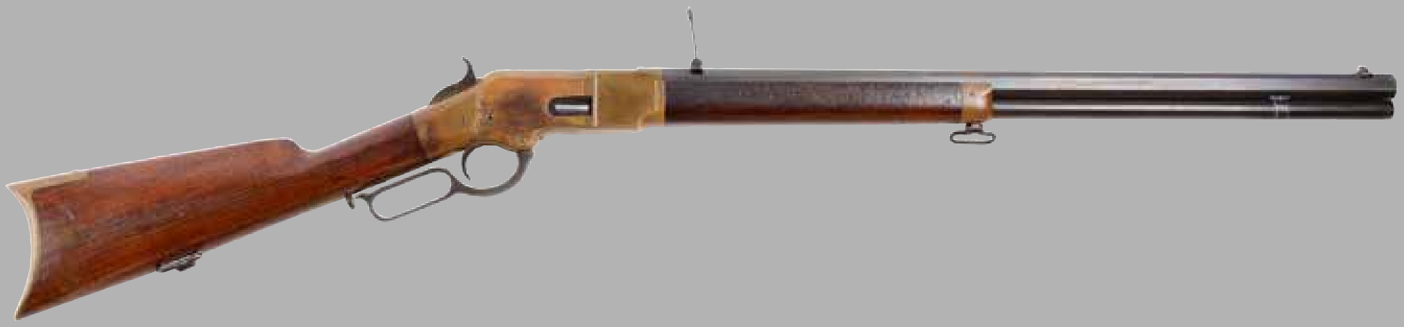


LOT - 238

238 - (A) FINE WINCHESTER MODEL 1866 SADDLE RING CARBINE.

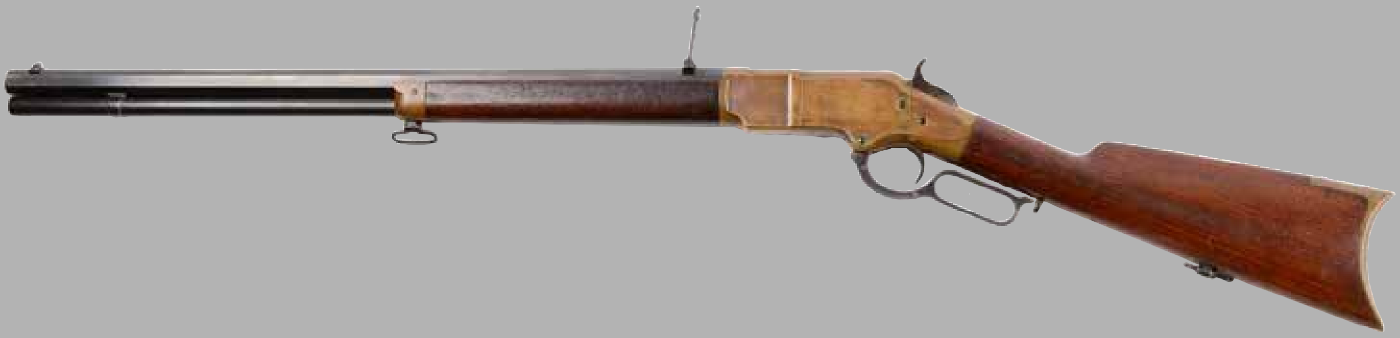
Manufacturer: Winchester
Model: 1866
Serial No. 23326
Caliber/Bore: .44 RF
Barrel Length: 20”
FFL Status: Antique

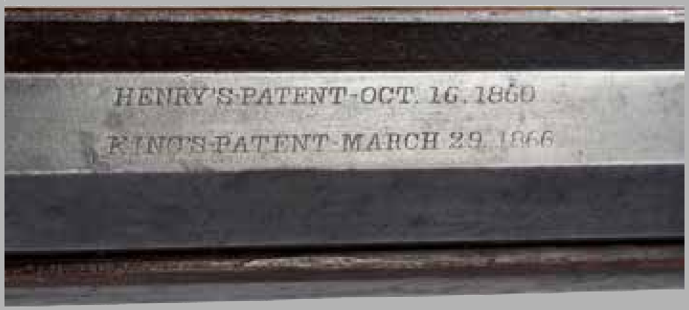
Manufactured 1869. Offered is a far above average example of the classic 1866 carbine. Features full round barrel, full magazine, front sight barrel band, rear barrel band, two leaf folding rear sight, brass frame and rifle butt, case colored hammer and lever, saddle ring and stud, and walnut stocks. The barrel, tube and bands are basically a rich, smooth blue-brown patina with sharp legends. Excellent, soft aged brass on frame and butt. Traces of case colors on lever with pattern. Traces of color with pattern on hammer. Loading gate retains 75% of the brilliant Nitre blue, indicating light use and well cared for. All screw heads are near mint. Wood is excellent with usual very minor dings and the majority of the original varnish finish. Fine action and strong, clean rifled bore with just very minor abrasion. A fine condition classic Yellow Boy carbine that was never abused. 7,500.00 - 9,500.00

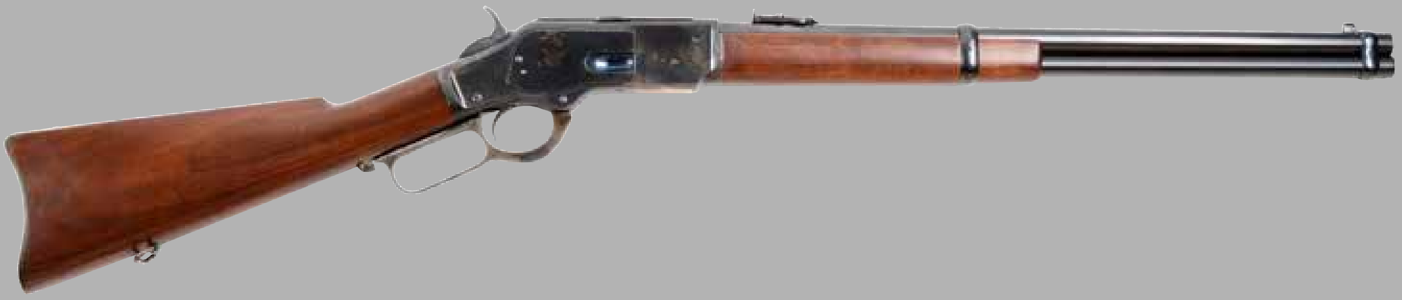


239 - (A) HIGH CONDITION UNTOUCHED HENRY MARKED WINCHESTER MODEL 1866 LEVER ACTION RIFLE.
Manufacturer: Winchester Henry
Model: 1866
Serial No. 20703
Caliber/Bore: .44 RF
Barrel Length: 24”
FFL Status: Antique

Manufactured 1869. Offered is the nicest Henry marked Model 1866 standard rifle that we have cataloged. The barrel and tube retain approximately 90% original factory blue finish that is mixing with a soft patina coming through the finish with a completely clean and homogeneous appearance. The octagon barrel has the Henry’s Patent stamp. Has the standard ladder rear sight and small blade front sight. Walnut stocks are equipped with sling swivels. Brass frame, buttplate and nose cap have never been touched and even has some of the vertigre around screws. The majority of the screws have generous amounts of the original fire blue finish. Loading gate has 75% blue. Colors on hammer and lever have darkened. Walnut stocks are excellent with some usual bumps and bruises with lovely finish, no cracks or dryness of any kind. Action is like new. Strong, clean mirror bore. Simply put, an 1866 octagon rifle that would surely place in the top 5% of all existing specimens.
15,000.00 - 20,000.00

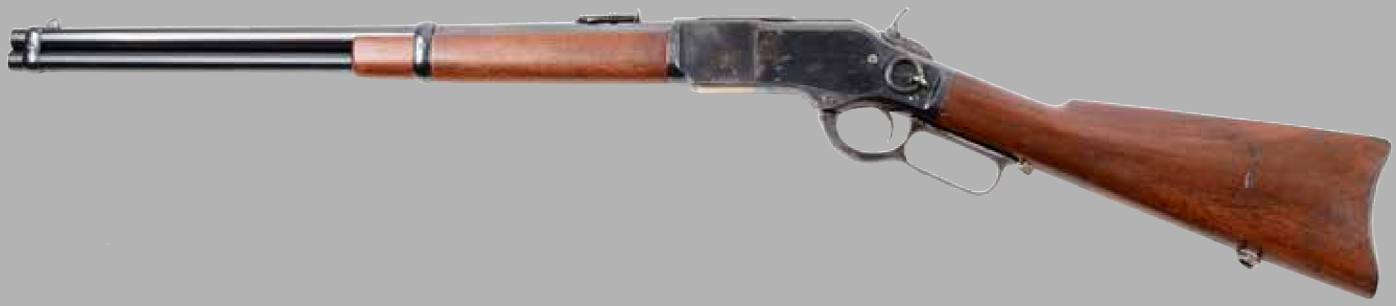






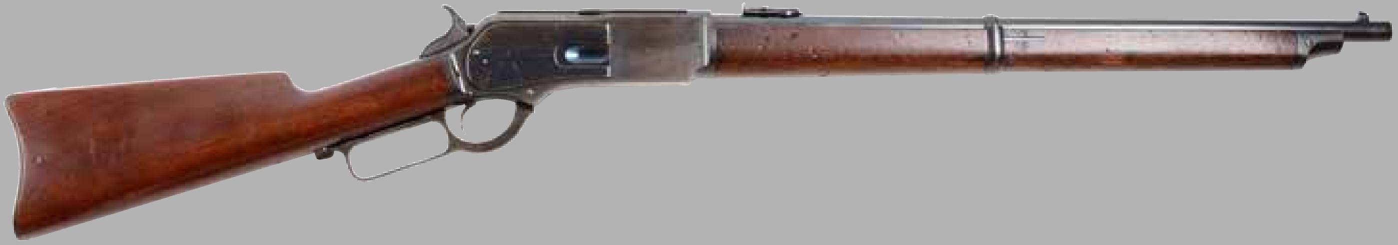
240 - (C) HIGH CONDITION WINCHESTER MODEL 1873 SADDLE RING CARBINE (.44 WCF).
Manufacturer: Winchester
Model: 1873
Serial No. 571646B
Caliber/Bore: .44-40 WCF
Barrel Length: 20”
FFL Status: Curio & Relic

Manufactured 1903. Standard features include round barrel, full magazine, twin bands, post front sight, folding ladder rear sight, blued finish, case colored hammer and trigger, walnut stock, carbine butt, rear-only sling swivel and saddle ring with stud. This carbine has seen very little use as evidenced by the 100% intact Nitre blue loading gate, which shows literally no wear but one thin pencil-dot silver spot. Barrel and tube retain 99% of the original factory blue finish with razor sharp legends. Barrel bands retain 95% original blue with just minor high edge wear. Brilliant case colors on hammer. Traces of case colors on lever, balance patterned out. 85% original factory blue on buttplate with wear at high spots. Right side of frame retains 80% bright factory blue with some small areas of flaking and two small areas at bottom of frame and forearm of some roughness. Bottom of frame retains 90% bright blue. Loading gate retains 70% bright blue. Blue-brown patina on top of chamber. 85% blue on balance of frame and tang. 85-90% on left side of frame with some minor age flaking. Light roughness on bottom of frame 1/2” next to lifter, otherwise bottom of frame and tang retain 95% blue. Wood is near mint and proud to metal with just a couple of minor bruises mostly to left side of stock. Mirror bore and fine action. According to the Winchester Book some carbines were only furnished with a sling swivel plate mounted on the stock and no forward sling swivel. The sling was intended to be attached to the stock sling swivel and carbine saddle ring. It appears to be factory. This carbine has seen very little use and most of the wear is simply age flaking from the frame. Research confirms shipment of .44 caliber musket September 18th 1903. No other information available. 10,000.00 - 14,000.00



241 - (A) WINCHESTER MODEL 1873 DELUXE LEVER ACTION RIFLE.
Manufacturer: Winchester
Model: 1873
Serial No. 258231
Caliber/Bore: .38 WCF
Barrel Length: 26”
FFL Status: Antique

Factory letter states this rifle was shipped April 18th, 1888 with a special order 26” full octagon barrel, set triggers, with Triple X fiery grain checkered stock with pistol grip, and case colored finish. In addition there is a Beach combination folding front sight, not listed, standard rear sporting sight, full magazine. Barrel retains approximately 75% original factory blue with balance mixed with patina and soft grey. Tube is a similar mix of blue-grey patina. Case colors on nose cap have patterned out. 30% original blue on dust cover. 80% Nitre blue on loading gate. Case colors on frame have basically patterned out with some traces in hidden areas. The deluxe finish walnut stocks are excellent to near mint with sharp original checkering and incredible grain. Buttplate has patterned out. Most screw heads are sharp with some slight marring on left sideplate screw. Strong, shiny bore and fine action. A lovely, untouched example of a deluxe 1873 Winchester. 10,000.00 - 14,000.00



242 - (A) HIGH CONDITION BRITISH PROOFED WINCHESTER MODEL 1876 SADDLE RING CARBINE.
Manufacturer: Winchester
Model: 1876
Serial No. 53291
Caliber/Bore: .45-75
Barrel Length: 22"
FFL Status: Antique

Factory letter indicates this carbine was shipped on June 11th, 1886 with no other information, indicating all standard features to include full round barrel, post front sight, 1876 dated ladder rear sight, blued finish, single barrel band with metal forend tip, case colored hammer and lever, walnut stocks, carbine butt and saddle ring with stud. Razor sharp legends. A large percentage of these scarce carbines were shipped to the Royal Canadian Mounted Police. This scarce British proofed example was probably shipped to England for use by British officers in their pursuit of tiger hunting while occupying India. The majority of these carbines, when they do surface, have seen heavy use. That is not the case with this example and was obviously well cared for throughout its life. Barrel retains 98% of the original factory blue with just some light age freckling. Overall, the frame also retains 85-90% of its original high polish blue finish with some naturally aged patina coming through the blue finish. The fire blued loading gate shows literally no wear retaining its brilliant color. Dust cover retains approximately 85-90% blue with some patina showing through. Brilliant case colors on hammer. Traces of case color on lever blending with dull grey appearance. Buttplate is a soft brown-grey patina. Barrel band retains 50% original blue. Nose cap has 20% blue with balance toned. All screw heads are near mint and untouched. Left side of barrel and top of chamber bear the British proof marks. Walnut stock and nearly full length forend are excellent, proud to metal, no cracks or chips, with a few of the usual bruises. Left side of stock has a small "59X" professionally stamped in center (British unit?). The brass lifter retains its rich, yellow untouched appearance and is stamped ".45-75", the second largest caliber offered in this rifle, behind the "Big .50". Fine action. Strong, clean rifled mirror bore. One of the finest examples of a British shipped '76 carbine one could hope for.

243 - (A) DELUXE WINCHESTER MODEL 1876 OPEN TOP LEVER ACTION SPORTING RIFLE.
Manufacturer: Winchester
Model: 1876
Serial No. 4922
Caliber/Bore: .45-75 Winchester
Barrel Length: 28”
FFL Status: Antique

This rifle was shipped on September 12th, 1878 with standard half octagon 28” barrel (letter states 26” - error), set trigger, checkered stock (no pistol grip) and case hardened. You will not find caliber markings on this rifle as it was only available in the .45-75 caliber at the time. It is an early open top model that was never made for a dust cover. Features the rare straight grip deluxe wood checkered walnut stocks, very rare blued half octagon barrel, full magazine, standard sporting front sight, 1876 ladder rear sight; case colored frame, hammer, lever, forend cap and buttplate. Barrel and tube retain at least 99% rust blue with razor sharp legends. Nearly complete coverage case hardening that includes buttplate. 100% brilliant Nitre blue on loading gate. Near mint checkered walnut stocks that have been freshened up to as new with razor sharp checkering. All screw heads are near mint. Fine action with a strong, clean rifled bore. Simply a stunning early open top deluxe Model 1876 with rare half octagon barrel and straight grip. 15,000.00 - 20,000.00

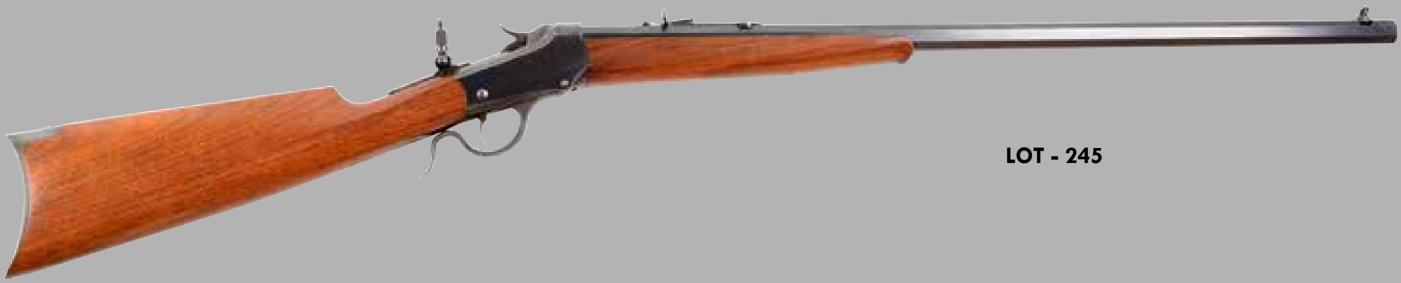
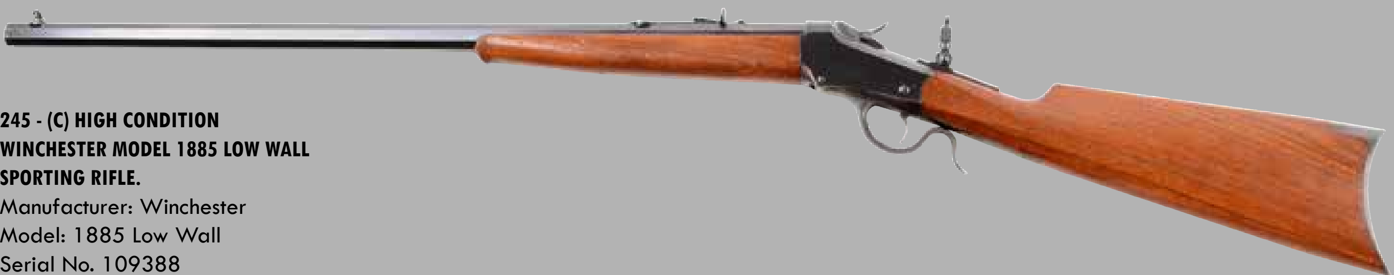
244 - (C) WINCHESTER MODEL 1885 LOW WALL BABY SADDLE RING CARBINE.
Manufacturer: Winchester
Model: 1885 Low Wall Baby Saddle Ring Carbine
Serial No. 123217
Caliber/Bore: .44 WCF
Barrel Length: 16 - 1/2"
FFL Status: Curio & Relic

Manufactured post-1920. One of the great rarities of Winchester collecting is the Baby Saddle Ring Carbine. Most collectors have not seen or even heard of an example. Features the 16 - 1/2" full round barrel, low wall with blued finish, saddle ring and stud, Lyman 1907 right side mounted musket style peep sight, no provision for rear sight, dovetail front sight, walnut stock and carbine butt. Winchester address printed dead center on left side. The barrel is a homogeneous blue patina blend with traces of bright factory blue. Bottom of barrel is stamped "No. 4". Ebony tip has been nicely repaired. Walnut stocks are excellent. Side of frame retain approximately 85% bright factory blue. Strong, rifled bore and fine action. This is the first Trapper Model Low Wall we have seen. 5,000.00 - 7,000.00

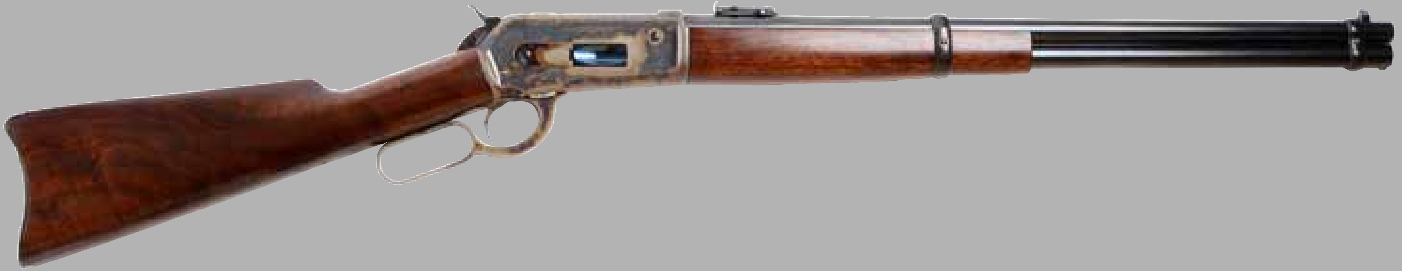


LOT - 245



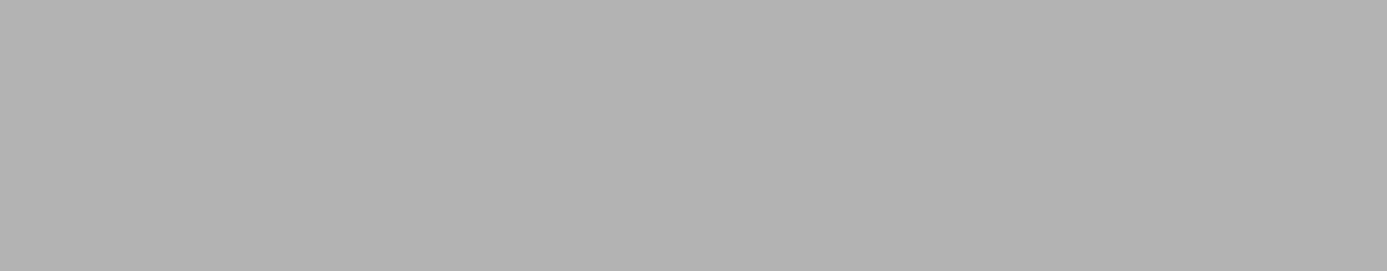
245 - (C) HIGH CONDITION WINCHESTER MODEL 1885 LOW WALL SPORTING RIFLE.
Manufacturer: Winchester
Model: 1885 Low Wall
Serial No. 109388
Caliber/Bore: .22 WCF
Barrel Length: 26"
FFL Status: Curio & Relic

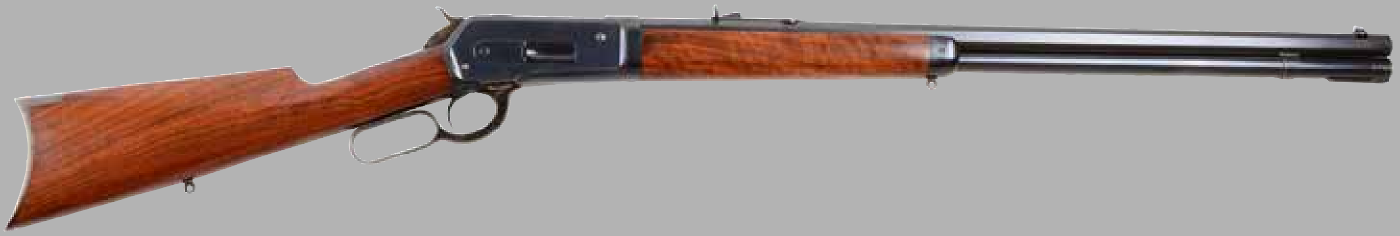
Manufactured 1918. The .22 WCF is a relatively scarce caliber in the 1885 Low Wall Model. It features full octagon barrel, Beach combination front sight, Winchester semi-buckhorn rear sight, tang peep sight, blued finish, case colored hammer and lever, walnut stocks and rifle butt. Barrel retains approximately 95% original factory blue, simply high edge wear on edges. Razor sharp legends. 85% brilliant factory blue on entire frame. Case colors have patterned out on lever, hammer and buttplate. Walnut stocks are near mint with a few light impressions only. Fine action and strong, clean rifled bore. A very fine high condition Low Wall sporter in rare caliber. 4,000.00 - 5,000.00



246 - (A) AS NEW WINCHESTER MODEL 1886 (.45-90) SADDLE RING CARBINE (1894).
Manufacturer: Winchester
Model: 1886
Serial No. 92045
Caliber/Bore: .45-90 WCF
Barrel Length: 22"
FFL Status: Antique

According to the factory letter, this carbine was shipped as a .45-90 and received in warehouse October 18th, 1894. Standard features include full round barrel, full magazine, twin bands, post front sight, folding ladder rear sight, case colored frame, hammer and lever; blued saddle ring, stud and carbine buttplate; and walnut stocks. Barrel and tube retains virtually all of the rust blue finish with razor sharp markings. Barrel bands are thinning. Bolt has 100% blue with Nitre extractor. Brilliant 100% case colors on frame, hammer and lever with some light age freckling. Walnut stocks are near mint. 98% blue on buttplate. Fine action. Strong, rifled bore. A fine, case colored Model 1886 Saddle Ring Carbine in .45-90 is one of the most desirable of all Carbines. It is amazing to witness the workmanship of Turnbull restorations when reviving an old, rare firearm to the point that it is nearly identical in fit and finish to a $50,000 original. Besides being in near new condition this should make a great shooter at a price a working man may be able to afford. 7,000.00 - 10,000.00





247 - (A) NEAR NEW WINCHESTER MODEL 1886 TAKEDOWN LEVER ACTION RIFLE (.45-90).
Manufacturer: Winchester
Model: 1886
Serial No. 107795
Caliber/Bore: .45-90 WCF
Barrel Length: 26”
FFL Status: Antique

Factory letter states Serial No. 107795 was shipped July 16th, 1896 as an octagon barrel, .45-90 takedown rifle with plain trigger. This early rifle remains in almost near new, 98% overall, original, untouched condition. Features full octagon barrel, full magazine, takedown, Winchester sporting front and rear sight, walnut stocks with rifle butt, and Winchester sling eyes not mentioned in letter. There is a hint of wear at muzzle, some slight wear at takedown lever, and slight wear on edges of barrel band. Slight evidence of turning on takedown tube but still blue which indicates rifle was taken apart maybe once or twice. Nose cap retains 99% blue. Frame retains 97% brilliant factory blue with just light high edge wear and a couple of minor storage marks on left side. Lever and hammer exhibit brilliant case colors. Walnut stocks are near mint and proud to metal. Buttplate colors have patterned out. Left side of frame is beautifully engraved “G.L. ESSIG”. Mirror bore and fine action. It would be nearly impossible to uncover a finer near mint example of a .45-90 takedown as this rifle appears to be almost unused.

254 - (A) INCREDIBLE HIGH CONDITION CASED WINCHESTER HENRY LEVER ACTION RIFLE.
Manufacturer: New Haven Arms
Model: Winchester Henry
Serial No. 867
Caliber/Bore: .44 RF
Barrel Length: 24”
FFL Status: Antique

Manufactured 1862. There are Henry’s and then again there are Henry’s! When putting together a collection of every lever action Winchester, the Holy Grail and bedrock of that collection has been, and always will be, the Henry rifle. The adage has been that since the Henry is the bedrock of your lever action collection, it was the condition of your Henry that defined the balance of the lever guns. While it is true that finding a Henry is not the real issue in collecting, it is finding a 100% clean, untouched, unmessed with example that still has condition and has never been altered in any way or sense. This is such an example. There was a time when Winchester was as concerned with aesthetics as the English gunmakers. Both tang screws and the buttplate screw were perfectly set to line up at 12 o’clock. The balance of the screws on this gun are near perfect and not deformed which would indicate that this gun has never been apart since it left the factory. The octagon barrel top flat has the early small address. The magazine spring is perfectly formed with no distortion. American walnut stock has the early abrupt comb and perch belly shape with the regular varnish finish. Rifle is equipped with factory swivel on right side that rides 2 - 1/2” from top to dead center; referred to as a low swivel with no visible bump and is scarcer on the right side than the left. It has the early style rounded heel brass buttplate with loading gate (no cleaning rod). All stock screws are hand fitted to the contour of the brass receiver tang and buttplate. The nickel silver front sight is the early half moon profile rounded on both front and rear, and can be seen on page 120 in the book “The Henry Rifle” by Les Quick. The rear sight is the earliest type, referred to as Type A, as seen on page 122, with the horizontal sliding bar graduated to 1,000 yards; this sight is located at the rear sight slot in barrel. A factory additional sight slot can be found on frame as well with no sight and no sign that any sight has been in or out of this slot. The lower tang screw, lower frame screws, left frame screws, upper tang screws and buttplate screws have generous amounts of the early high polish Nitre blue finish. The standard barrel finish was a highly polished bright blue; this original finish has turned to a soft blue-brown homogeneous patina with flashes of bright blue along recesses with some minor age spotting, sharp octagon edges and a perfect barrel legend. The bolt is basically gun metal grey patina and the insides, as visible through the top, are extremely clean with sharp edges and no molestation. Rear bolt still has original blue finish. Factory case colored hammer and lever are basically a brown-grey patina. The brass has sharp edges, virtually free of marring with the exception of some small storage marks. Sideplates show no pry marks. Walnut stock is excellent, proud to metal, does not appear to have ever been removed, with the usual minor abrasions and still retaining the majority of its original factory stock finish. We are aware that there are numerous internal parts numbers on this rifle but given the pristine condition of the screws and fit, we have decided not to disassemble as is normally done, as it is obvious by its present condition that it has never been altered in any way and is guaranteed to be just as it left the factory. The action and loading spring work correctly and the strong, clean, bright rifling is devoid of any pitting or abrasions, making this the strongest example of a high condition Henry we have ever examined. To compliment this fine Henry rifle, it is housed in one of the rare surviving walnut factory display cases. An exact example of this case can be found on page 92 in the book “Volcanic Firearms” by Lewis and Rutter. Given that no photographs of cases are in the Henry Book, one could surmise that these cases were made for the Volcanic and early Henry production, and are never seen on the open market. The walnut case is lined with red velvet and the partitions are identical to the example on page 92, which would allow for the rifle, three full boxes of ammunition, a cleaning rod and sundry accessories. Features four brass hinges and is secured at the front by two swivel locks and center key lock. The lining is in exceptional condition for its age, showing usual wear where the outline of the gun is still visible on the lid lining showing where a Henry rifle has rested for years leaving its indelible outline into the velvet surface. The walnut case itself was refinished at one time, nicely done and is free of cracks. The last addition to this cased set is a full sealed box of Remington UMC .44 Henry flat (50) rimfire cartridges with green label, sealed on all four sides, and bottom label with guarantee and lot number and has been wrapped for protection. Overall, one of the finest existing standard early commercial Henry rifles extant in fine original walnut display case with a sealed box of rare ammunition. A true gem amongst the Winchester collecting fraternity; sure to be one of your most prized possessions. 60,000.00 - 80,000.00

255 - (A) CASED DELUXE FACTORY ENGRAVED COLT MODEL 1883 HAMMERLESS BOXLOCK SHOTGUN WITH 2 BARRELS.

Manufacturer: Colt
Model: 1883 Hammerless
Serial No. 7370
Barrel Length: (A) 28” (B) 26”
FFL Status: Antique
Gauge: 12 Bore
Chamber: 2 - 5/8”
Choke: Modified Improved

Colt’s Model 1883 shotgun was one of the finest products manufactured in the firm’s long history with a total of 7,360 manufactured. It was best quality all the way. The 1890 catalog stated this gun was made of the best materials and workmanship, and equal to the most costly and best English sporting gun. The parts are simple, strong and few in number. U.S. President Grover Cleveland received two of these guns in 8 gauge. Features a hammerless boxlock action, standard ejectors, the finest Belgian made Damascus patterns finished in brown, deluxe walnut stocks, finely checkered, ebony forend tips, pistol grip cap, double set triggers, top safety, case colored frame (traces remain). Has two complete matching sets of barrels and forends, all numbered to gun. Complete engraving on frame and trigger guard in scroll pattern with duck on trigger guard and pointer and pheasants on right and left sides. Wood is excellent to near mint with original finish and nice checkering. Buttplate has been replaced with solid black plate that deserves a red English style rubber buttpad. Both forend stocks are excellent and features Deeley release. Both barrels have matted ribs, single bead and doll head lock. Mirror bores and tight as new lock-up. Gun was shipped on January 30th, 1897; one gun to Gibson & Woodworth. It is odd that the factory letter does not mention the 26” barrels, nor does it mention engraving. This is obviously a higher grade gun with presentation plaque on butt. These were expensive guns, even on their introduction, with engraving alone costing $125. Record of engraving found under Cuno Helfricht, Huge Reuss, and the Young Brothers. Both barrels are numbered “2” underneath, and an identical font is found on all serial numbers, with serifs. A similar style of tang engraving on 1883 listed as Helfricht can be found on page 355 of the “Colt Engraving” book, which shows the top tang area. Similar pointer and pheasant engraving is found on page 348, which shows the left panel and bottom frame of the H.S. Kearney gun; shows nearly identical patterns and patterns of scroll engraving at base, Serial No. 7654. The pattern of checkering is identical on both of the matching forearms. Barrels are dent-free and have a true ring, no signs of any solder repairs. We believe this to be Helfricht engraved based on the patterns and the quality of engraving. One of the most beautiful, deluxe 1883 Hammerless Colts we have seen. Comes in a monogrammed leather luggage case with brass buckles that needs a new handle a strap. Mirror bores and locks up tight as new. An extremely fine and rare Helfricht engraved complete two barrel cased set that with the addition of a proper English style red pad would be a show-stopper in any collection. 7,000.00 - 10,000.00

256 - (A) HIGH CONDITION WINCHESTER MODEL 1887 LEVER ACTION SHOTGUN.

Manufacturer: Winchester
Model: 1887
Serial No. 16724
Barrel Length: 30"
FFL Status: Antique
Gauge: 12
Chamber: 2 - 5/8"
Choke: Improved Cylinder

Manufactured 1888; second year production. Factory letter states Serial No. 16724 was shipped on July 17th, 1888 as a 12 gauge shogun with 32" barrel. One would generally assume this would be full choke; the barrel currently measures 30 - 1/16" and measures out as improved modified with reblued barrels. There is a repair and return order dated November 4th, 1902, but there is no detail as to work performed; was the barrel shortened and reblued on November 4th? This cannot be determined. The case colors are original, which would indicate the gun was in fine condition when sent for repair. Rarely do you see these lever action shotguns with any amount of finish; the blue has usually turned brown and the case colors are nearly always turned nickel. This example is superb. The barrel and tube retain approximately 90% reapplied blue, just starting to let some patina show through. Walnut stock with round knob is excellent to near mint with beautiful finish. The blued steel shotgun buttplate retains 80% original blue. Frame shows almost 90% color and pattern, albeit not bright, but nearly complete coverage on sides. Action is like new. Fine, shiny bore. One of the nicer examples of this model condition-wise that you will find. 4,000.00 - 5,000.00

Manufacturer: Parker Bros.
Model: G
Serial No. 65062
Barrel Length: (A) 30" (B) 28"
FFL Status: Antique
Gauge: 12

This shotgun was originally manufactured in 1891 with 30" Damascus barrels. All matching serial numbers including forend. Damascus barrels features full rib, single bead, mirror bores. Rings true. Beautiful Damascus pattern with no dents or repairs. The second pair of barrels was made by E.H. Lander, Nitro proofed with 2 - 3/4" chamber, blued finish, matted rib and retaining nearly all of their blued finish. Forearm has Deeley release. Stock is pistol grip, checkered, with dog head buttplate. Stocks are beautifully refinished in near mint condition. Frame has typical G grade engraving with pheasant on right side, ducks on left and pheasants at base with traces of case colors in hidden area. 70% original blue on engraved trigger guard. Twin triggers. Owner's plaque at base of stock. Locks up tight as new. The newly made set of barrels allows this shotgun to be used with smokeless shells and the original barrels for display or black powder shooting. This shotgun is housed in a canvas and leather hard carry case. 2,000.00 - 3,000.00

Model: 42
Serial No. 38133
Barrel Length: 28”
FFL Status: Curio & Relic
Gauge: 0.41
Chamber: 3”
Choke: Full

Manufactured 1939. One of the hardest to find of all Model 42 Winchesters is a pre-war deluxe trap marked model. Even rarer without the vent rib. Features a 3” chamber with full choke, single bead sight, takedown, blued finish, deluxe extra grain pistol grip checkered walnut stock with center diamonds and Winchester black composite buttplate. About the only wear visible is some minor slide wear on tube and arm and a hint of high muzzle wear. Walnut stocks are near mint. Gun retains approximately 98% factory blue finish and appears to have seen little to no use of any kind. Stamped “TRAP” on the base of the frame. One of the finest and scarcest Model 42’s we have ever offered. Mirror bore and fine action. We are unaware of another example like this in this condition. 12,000.00 - 14,000.00

Barrel Wall Thickness: .042”, .040”
Internal Bore Diameter: .658”, .660”
Choke: Improved Modifed, Cylinder
Weight: 6 lbs. - 11 oz.

This is an L.C. Smith Hunter Arms Fulton, New York Trap Grade. This exact pattern gun can be seen on pages 252 and 253 in the book “L.C. Smith” by Houchins. This is a boxlock shotgun with false sideplates engraved with trap shooters and light floral edge work. The base is engraved in a floral pattern. Right side of frame features a single shotgunner shooting a pheasant. Stamped “L.C. SMITH” on both sides of frame. Top of frame is engraved in floral scroll with top tang safety. Features double set triggers, blued trigger guard, straight English type walnut stock with checkering. Example pictured in book on page 250 shows the straight stock with exact pattern of checkering. Straight stocks were far more scarce than pistol grip. Has a splinter forend with engraving around release and base with ebony inset. The barrels are equipped with automatic ejectors. Mirror bores. Retains 95% of the expertly reapplied blued finish with sharp markings. Frame retains approximately 30% case colors with balance nickeled out. Stocks are excellent with no cracks, sharp checkering, some finish added and a period solid red rubber recoil pad. Locks up tight and solid. The Trap Grade was a quality one grade that replaced the pre-1913 No. 1. It has Hunter’s Crown steel barrels, discontinued in 1939, cost had risen to $77. A total of 3,355 Trap Grades were sold between 1913 to 1939 but only 288 in 16 gauge, the second rarest behind the 10 gauge at 25 guns made.

290 - (A) SHARPS & HANKINS MODEL 1862 NAVY BREECHLOADING CARBINE.
Manufacturer: Sharps & Hankins
Model: 1862
Serial No. 10936
Caliber/Bore: .52 RF
Barrel Length: 23 - 5/8"
FFL Status: Antique

The carbines made for the Navy were delivered with a leather covering stitched over the barrel to protect it from corrosion at sea. The first delivery Sharps & Hankin rifles were received at the Philadelphia Navy Yard on March 19th, 1862. Boston Navy Yard received another delivery on May 27th. On March 26th, 1862, Sharps & Hankin received a contract for 1,000 leather covered carbines Pattern 1859. In September 1862 the first 250 carbines arrived in Philadelphia issued to the ironclad New Ironsides. Just the possibility that this carbine could have been on board one of the early Civil War Ironclads makes for a very interesting history. This carbine features a large knifeblade replacement front sight in the original front posts, military rear sight, walnut stock, no forend, and brass buttplate. Frame is stamped "SHARPS PATENT 1859" on left side and "SHARPS & HANKINS" on right side. Stock has no visible inspection marks and is in very good condition with a 1" x 1 - 1/2" repair at butt, nicely done. Frame is grey patina. Leather is excellent with tight sewing, usual high edge wear and minor crazing. Strong, clean, rifled bore. This is a far better than average leather covered Sharps. 2,000.00 - 3,500.00

Caliber/Bore: .50 Percussion
Barrel Length: 21 - 5/8"
FFL Status: Antique

Smith carbines were manufactured 1861 to 1865 by the American Machine Works & American Arms Co. This is a government inspected model but they were sold to civilians in 1864 as well. Widely issued during the war to the 3rd West Virginia, 7th and 11th Illinois, 1st Connecticut, 7th and 17th Pennsylvania, 6th and 9th Ohio, and 1st Massachusetts. The left side of the stock has a "J.H." cartouche in oval for Joseph Hannis, a civilian employee who began to work at the Massachusetts Arms Co. on January 11th, 1862 who inspected Smith carbines. Left side of the barrel has the stamp "L.F.R." for Lafayette F. Rogers, who inspected Smith carbines in 1864 and 1865, which helps us further narrow down the time frame of use. This carbine remains in remarkable condition. Barrel retains approximately 95% original blue with some muzzle wear. Barrel band is brown. 98% bright blue on lock-bar. 70% case colors on frame and hammer, some bright. 70% bright blue on trigger guard and lower tang. Generous amounts of Nitre blue on screws. 30% original blue on buttplate. Wood is excellent with usual minor dings and razor sharp cartouche. Fine action and near mint, shiny bore. Far above average example of a carbine issued in 1864-65. 1,700.00 - 2,250.00

Manufacturer: C. Sharps
Model: Percusion
Serial No. 79347
Caliber/Bore: .52 Percussion
Barrel Length: 22”
FFL Status: Antique

The New Model 1863 carbine came with or without patchbox, with this example having the patchbox on right side, which is twice as scarce with total production at 20,000. Manufactured until the 1865 Model was introduced. Arguably the most popular single shot breechloading carbine and certainly the most reliable of its genre. Features full round barrel, single band, Lawrence folding ladder rear sight, saddle ring and bar, drop breech, walnut stocks and carbine butt. Sharps patent dates on both sides. All metal is basically brown patina. Wood is very good with usual dings. Iron patchbox is brown patina. Fine action and near mint, shiny bore. A very good example of a Civil War carbine that has not been converted. 1,200.00 - 1,800.00

294 - (A) MAYNARD CIVIL WAR 2ND MODEL SADDLE RING CARBINE.
Manufacturer: Mass Arms Co.
Model: Carbine
Serial No. 14655
Caliber/Bore: .50 Percussion
Barrel Length: 20”
FFL Status: Antique

Manufactured by Massachusetts Arms Co., the Second Model was manufactured 1863 to 1865. The 9th and 11th Indiana and the 11th Tennessee were the two primary units issued these weapons during the war for Southern independence. Features an octagon to round barrel, two leaf folding rear sight. Patent dates on left side of frame and manufacturer on right. Made without forearm. Walnut buttstock bears two strong cartouches “A.J.N.” for Augustus J. Noble and “J.M.” for James Mills who inspected 12,040 Second Model carbines in 1864 only, which indicates this model was shipped prior to the end of the Civil War in 1864 and most probably would have seen use as this one appears. The barrel is basically brown patina. Frame is basically grey patina. Stocks are excellent with no cracks or chips and near mint cartouche. Fine action and strong, clean bore. Very pleasing example of a Civil War used Second Model Maynard.

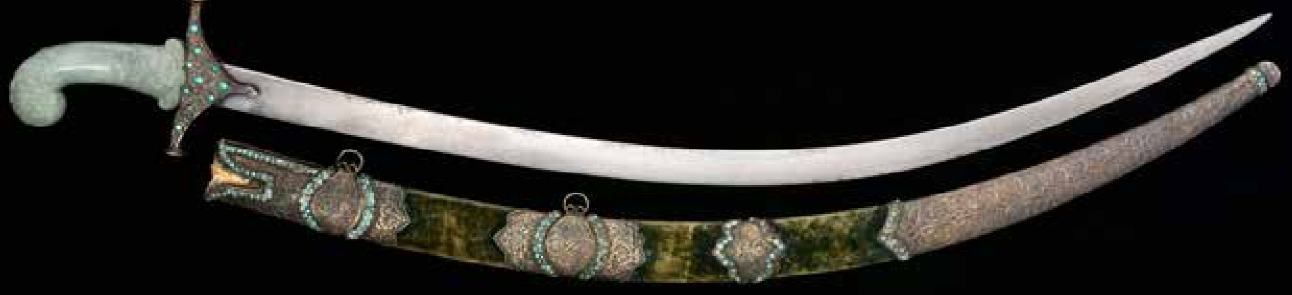
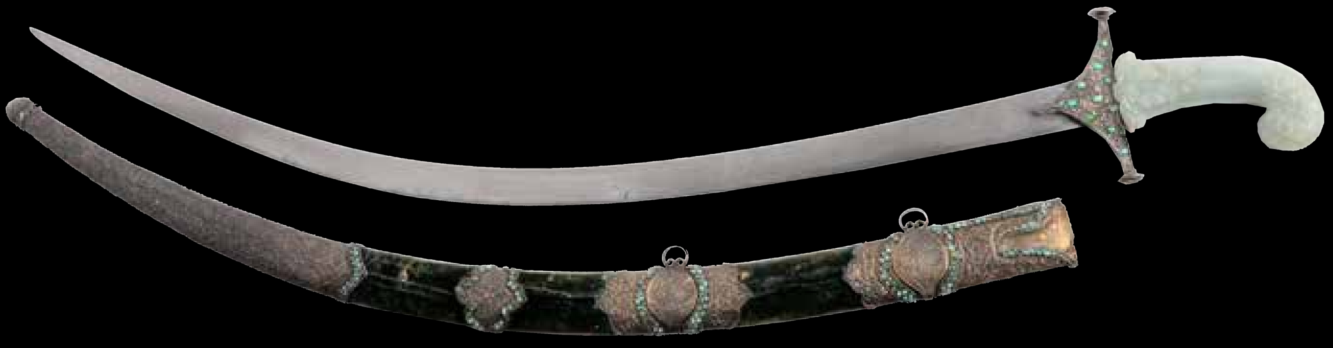
310 - HISTORIC AND ATTRACTIVE FRENCH SABER ATTRIBUTED TO GENERAL BROOKS AND PRESENTED BY LAFAYETTE.
Blade Length: 34”
Overall Length: 40”

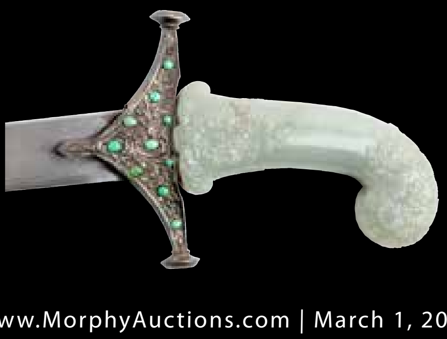
40”L Many high ranking American officers preferred European sabers in the early 19th century. This sword conforms to the regulations prescribed to Marine Corps Officers in 1804 and is very similar to the saber of Francis Wharton, Commandant of the Marine Corps from 1804 until 119. His sword is on display in the Marine Corps Museum. General Lafayette and General John Brooks met while under the command of General George Washington at Valley Forge in 1778. Brooks, who lived from 1752 until 1825, was very close with Lafayette throughout their lives. In 1824, when Lafayette returned to the United States, he visited Brooks at his home, where Brooks had prepared a celebratory dinner. John Brooks, Jr. was General Brooks’ son and lived from 1783 until 1813. According to family tradition, he was sworn into the Marines in 1807 and he took a trip to Paris where he met Lafayette and was presented the sword as a gift for his father. Brooks, Jr. was also sent to France in 1812 as a courier for President Madison. The Brooks family swords are described in the book “Memoirs of Governor John Brooks” by Rev. Charles Brooks. The book states that “John, the son of Governor Brooks, had a sword presented to him by Lafayette in Paris. It had a rich sash attached to it. This sword and sash were on his person when he was killed in the naval battle on Lake Erie.” John Brooks, Jr. carried the sword during his War of 1812 service. He was serving on deck with Admiral Perry when he was wounded on September 10, 1813. Two hours later, he died. Perry wrote a letter to General Brooks regarding his son’s death and Brooks wrote back requesting his son’s “best sword and sash”. Brooks asked that the sword be sent to his elder son, Alexander S. Brooks, an Army officer and the administrator of John Jr.’s estate. Alexander then left the sword to his daughter, Lucy, who married Edward Livingston Keyes. They left the sword to their son, Alexander Scammel Brooks Keyes (1846-1909). The sword was passed to his daughter, Lucy Keyes Fiske, who left it to her daughter, Virginia Fiske Timberman. Virginia’s son, Thomas Timberman, was the last owner of the sword and a direct descendant of General John Brooks. He sold the sword to William Dykes and there is a color photograph of the two holding this sword included. The sword itself features a curved kilij blade with a wide single fuller on each side and a false edge extending back 11” from the clipped point. Both sides of the blade feature deeply etched 15” panels of blued and gilt decoration, including French Louis XVI Directoire motifs, wreaths, and other designs. Due to the absence of any symbols relating to the French Revolution and sparse military trophies, the sword is suitable as a Sword of Honor or for a Head of State. The panel on the left side shows six stars, possibly representing the highest ranking French officers of the period. The sword was probably made at Klingenthal, possibly a LePage, and has similarities to the French Sword of George Washington, attributed to LePage, displayed in the White House. The classic French-style hilt is made of cast brass and features high-relief foliate decoration, a semi-pistol grip pommel terminating in an elliptical disk and is engraved with a flower. The hilt features languettes on each side, engraved with acanthus leaves. Two-piece mother-of-pearl grips, which have been replaced, which is consistent with the damage that the sword reputedly suffered during the War of 1812. The brass scabbard is highly decorated and features four applied panels, in the French style, with relief scenes of Roman soldiers, arms motifs, and diplomats. Repousse foliate scrolls between panels, pierced asymmetrical brass drag. The sword is in excellent condition, overall. Brass has been polished bright and is coated with protective finish. The blade has been polished and has had some of the gilt background re-applied, retains generous traces of original blue and gilt, as well. Hilt has a small crack on left side, in front of knucklebow and a small repair on the strap under the pommel. Scabbard has some denting on the back. The sword is complete with a letter detailing the provenance and history from William Dykes Antiques. This is a very attractive and historically significant sword and is a museum quality saber! 20,000.00 - 40,000.00

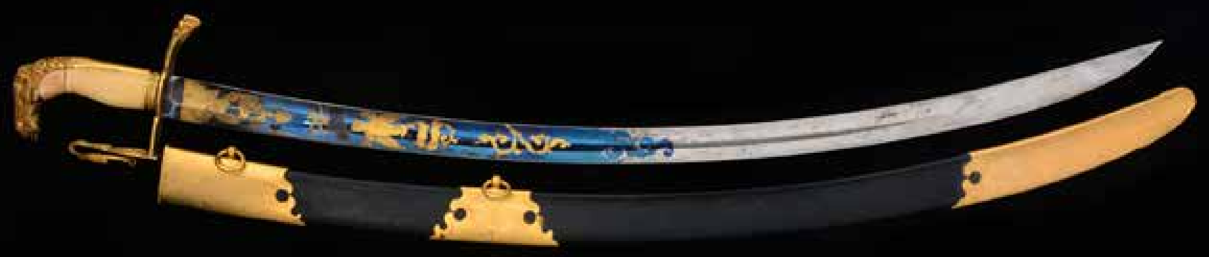


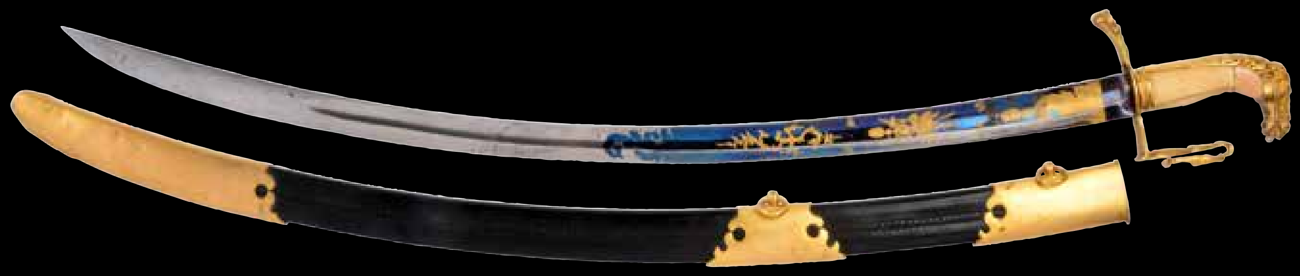


311 - FINE JADE HILTED SILVER MOUNTED SHAMSHIR.
Blade Length: 38 - 1/2”
Overall Length: 32 - 1/4”

38 - 1/2” Curved unfullered Damascus steel blade. Silver guard of familiar form with languettes. Guard decorated with chiseled florals and scrolls with jade and turqoise ornamentation on both sides. Fine jade hilt extensively carved with well-executed relief flowers and foliage, hilt probably 18th century. Wooden scabbard covered with green velour, repousse silver mounts extensively decorated with turqoise. Excellent overall, blade retains a grey patina with a few areas of light spotting and light scratches and scabbard wear, much of Damascus pattern still visible. Guard retains an unpolished patina and has a few minor marks. Hilt excellent with some minor natural discoloration, carving shows almost no wear. Scabbard cover has some fading and minor fraying at seam, mounts dark and with some minor denting and a few small pieces of turqoise replaced or missing. Overall, this is a very high quality sword with a magnificent and early jade hilt. Hilts of this quality are seldom encountered! 15,000.00 - 25,000.00



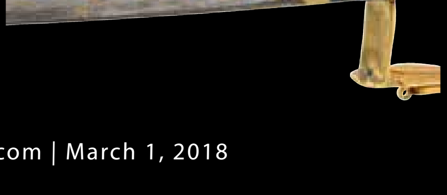


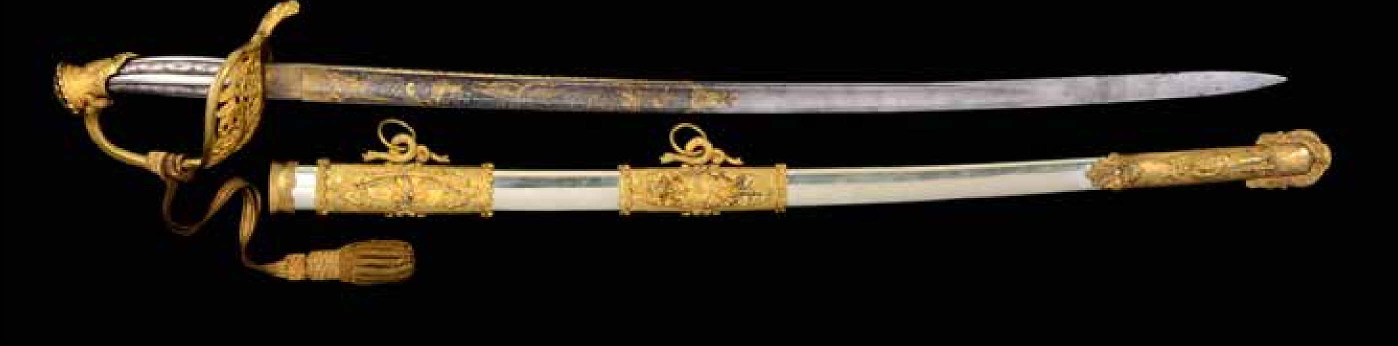


312 - FINE HORSE HEAD POMMEL DRAGOON OFFICER'S SABER WITH SCABBARD.

Blade Length: 33"
Overall Length: 39"

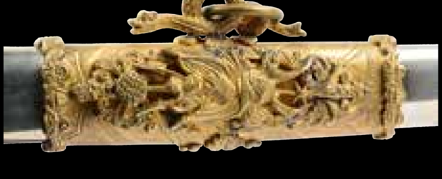
Probably Philadelphia, circa 1820. Features a curved steel blade with large single fuller on each side. Both sides decorated with 16" blued, engraved, and gilt-decorated panels. The right side shows a Federal American Eagle with spread wings and an "E. PLURIBUS UNUM" banner in its beak, along with a liberty cap on a liberty pole, acanthus leaves, and scrolls. The opposite side displays a panoply of arms with a liberty cap and repeats the motifs on the right side. Fine gilt brass hilt with eagle talon quillon and stylized swan knuckle bow with belt hanger. Detailed horse head pommel with mane continuing into faceted back strap. Checkered ivory grip with carved wedding band and gilt brass ferrule at bottom, decorated with roped rings. Complete with black leather scabbard with pressed designs and large gilt brass mounts. Blade retains much of original polish with some minor spotting, retaining about 70-80% original fire blue finish and about the same amount of gilt. Hilt retains generous amounts of gilt finish, especially in protected areas. Small portion at top of grip has been restored. Scabbard is excellent, possibly restored professionally. A very rare hilt and attractive design. This sword is very similar to the sword illustrated on Page 106 of "The American Sword: 1775-1945" by Harold L. Peterson. The sword shown is on the display at the Smithsonian. 10,000.00 - 15,000.00

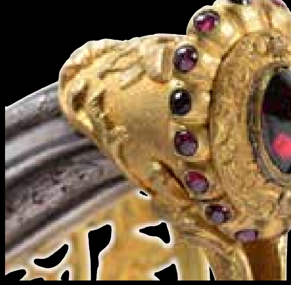


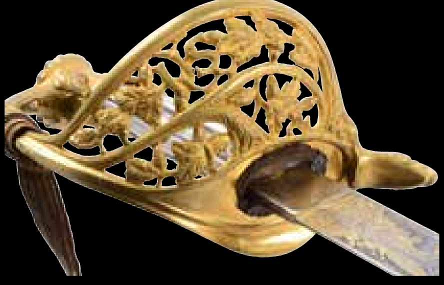


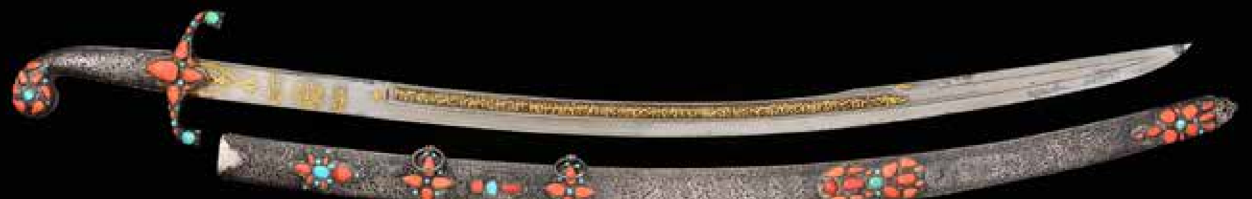
313 - EXTRAORDINARY U.S. MODEL 1850 STAFF AND FIELD OFFICER'S CIVIL WAR PRESENTATION SWORD.
Blade Length: 31 - 3/4"
Overall Length: 39 - 1/4"

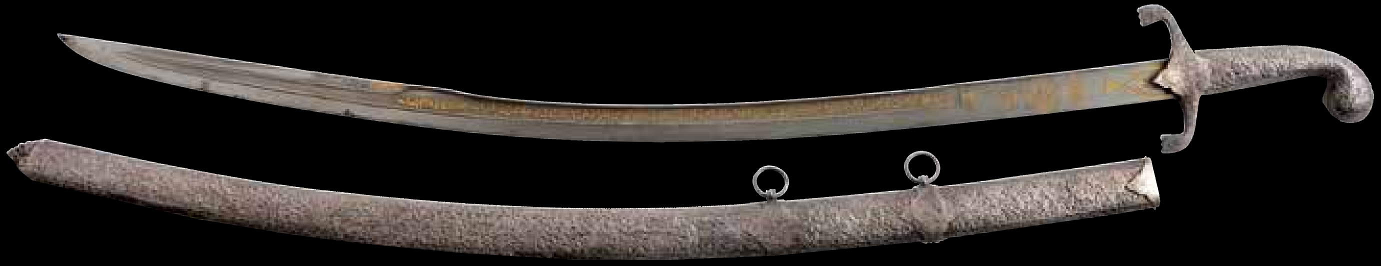
This is an early and high quality American Civil War presentation grade officer's saber. This sword is of the type sold by Schuyler Hartley & Graham to wealthy clients and officers at the beginning of the war. The sword features a slightly curved steel blade with large single fuller and smaller partial fuller on each side. Both sides feature a 14 inch etched panel with gilt highlights. The right side shows detailed scrolls, arms motifs, and a splayed American eagle holding an "E. PLURIBUS UNUM" banner, the opposite side etched with a large "US" and stands of arms with American flags, in great detail. Spine gilt decorated and etched with acanthus leaf patterns and marked "IRON PROOF". Gilt brass hilt with pierced guard featuring a "US" surrounded by relief oak leaves and acorns, eagle head quillon. The pommel features a chased eagle in high relief and a large garnet on top surrounded by 20 smaller garnets. Solid silver grip is fluted and every other flute is decorated with chased repeating acanthus leaves. Nickel-plated steel scabbard with high relief sculptural mounts, the top mount depicts an American eagle with spread wings. Serpent ring mounts. The center mount has shields on both sides of a panoply of arms, and the drag depicts a high relief soldier leaning on a musket with flags in the background, the details show sergeant stripes on the uniform. Complete with period gilt sword knot. Excellent condition, overall. Blade retains most of original polish with some darker areas on etched panels and some wear to gilt, edge with a few minor marks. Hilt retains 80-90% gilt finish with some high edge wear and a few light scattered marks, one small garnet chipped and one replaced. Grip excellent with darker patina in protected areas. Scabbard excellent retaining all of bright nickel finish with some light scratches, mounts retain almost all of gilt finish, a few darker areas. This is a monumental and attractive Staff & Field officer's saber, probably one of the most attractive examples known. 8,500.00 - 10,000.00











314 - FINE OTTOMAN SILVER MOUNTED CORAL AND TURQUOISE ENCRUSTED KILIJ.
Blade Length: 33 - 1/4"
Overall Length: 39 - 1/2"

39 - 1/2" Probably Trabzon, 19th century. Damascus steel blade of familiar kilij form with deep partial fuller, decorated on both sides and spine with gold overlaid inscriptions and decoration. Repousse decorated silver hilt and guard featuring floral motifs and ornamented with pieces of polished turquoise and fluted and polished coral on the right side. Silver repousse scabbard extensively decorated en suite with florals and also inset with coral and turquoise on the front. Pierced and chiseled silver drag and silver mounts with hanger rings. For two similar examples, see page 209, figures 507 and 508 of "Islamic and Oriental Arms and Armour" by Robert Hales. Blade retains a light grey surface overall with fuller retaining a darker patina, some scattered areas of spotting, light freckling, and darker areas, also some light wear to gold decoration. Hilt retains a dark unpolished patina and guard is slightly loose. Scabbard also retains a dark unpolished patina with relief designs slightly brighter. This is a very high quality and decorative Ottoman kilij for the discriminating Eastern collector. 7,000.00 - 10,000.00

319 - HISTORIC U.S. MODEL 1872 OFFICERS SABER INSCRIBED TO THREE-WAR CAPTAIN GEORGE FISHER.
Blade Length: 32 - 1/4”
Overall Length: 37 - 3/4”

39” Captain George L. Fischer served in three wars while enlisted in the United States Infantry. He served as a private throughout the Civil War in Company A, 7th Infantry Regiment, Maryland Volunteers. He was captured in 1864 and held prisoner at Libby and Salisbury Prisons. Fischer then enlisted again after the Civil War, in the 2nd U.S. Infantry as a private in 1866, then was promoted to Sergeant and 1st Sergeant. The 2nd Infantry participated in the Apache and Pine Ridge campaigns. He went on to serve three enlistments in the Indian Wars between 1866 and 1879, then as an officer in the 1st Maryland Infantry. He also served in the Spanish American War between April of 1898 and February of 1899, as a captain in Company B. of the 1st Maryland Volunteer Infantry. George Fischer was well-known and the superintendent of the Antietam Battlefield in Maryland when he died in the late 1920’s. This attractive sword has a slightly curved blade with etched panels on both side, the right side featuring arms motifs and “Geo Fischer”, the other with scrolls, an American eagle, and a patriotic shield, marked “MORGAN/PUHL &/MORRIS/DETROIT/MICH.” on ricasso. Cast gilt brass Model 1872 officer’s hilt with relief chased eagle on back of guard and foliate designs on branches, top of pommel features an American shield. Shagrin grip decorated with twisted brass wire. Complete with nickel-plated steel scabbard with relief-cast gilt brass mounts. Also includes a gilt sword knot, probably from a later period. Blade excellent with only some scattered spotting. Hilt retains much of original gilt finish, especially in protected areas, grip excellent. Scabbard excellent. Includes a large archive of information on George Fischer, including copies of all of his service records throughout his entire military career, discharge papers, muster rolls, letters that he wrote, and pension records. This is a very attractive sword owned and carried by a well documented captain who fought in three American wars!

Lot contains a Nazi era Luftwaffe 1st Model sword (A) and a 19th Century Prussian M1889 sword (B). (A) The Luftwaffe “Fliegerschwert” sword has a 30” nickel plated blade made by “SMF” (Solingen Metallwaren Fabrik) in Solingen. The handle and fittings are made from aluminum, and the handle is covered in blue leather with a wire wrap. The gold finish is intact on the emblems. The scabbard is blue leather with aluminum fittings. The sword hanger is present, however both attaching loops are damaged. The blue leather scabbard has only one small nick in the finish. The blade exhibits a few scattered light marks and a couple of spots of freckling. Overall the sword is in excellent condition. (B) The lots also contains a 19th Century Prussian officer’s Model 1889 sword with a black painted steel scabbard. The sword has a 31” nickel plated blade made by “W.K & C” (Weyersberg, Kirschbaum & Company” with the king’s head and armored knight emblem. The blade is also marked on the other side “Deutsch.Offiz.Verein, Berlin”. The handguard is in brass with the Prussian emblem attached to the shark skin wire wrapped grip. The pommel cap has a coat of arms engraved on it, and the side of the pommel is inscribed with the name “von Hartmann”. The scabbard is a black painted steel pre-1908 dual ring type, with the hanger attached. The unsharpened blade exhibits some freckling near the tip and scattered light marks. The scabbard appears to have been repainted. The sword is in very good condition. A sword knot comes with this lot. The Luftwaffe sword is a very desirable example. 850.00 - 1,200.00

356 - (A) CARVED FULLSTOCK FLINTLOCK KENTUCKY RIFLE MARKED J. DICKERT.

Manufacturer: Dickert
Model: Kentucky Longrifle
Caliber/Bore: .45 Rifled
Barrel Length: 45”
FFL Status: Antique

Jacob Dickert was born in 1740 in Maintz, Germany and his family emigrated to America in 1748, finally settling in Lancaster, Pennsylvania in 1756. Dickert had a shop on North Queen Street in Lancaster and was listed as a gunsmith in tax records in 1770, 1772, and 1776. He opened a rifle barrel boring factory with John Henry in 1774 on a lot in Manheim Township. Jacob Dickert later made contract rifles with James Gill for the U.S. government. This rifle probably dates from between 1790 and 1810. Octagonal barrel marked “J. Dickert” on top flat in script with a maker’s mark in a cartouche. Small crude copper rear sight and brass front sight. Unmarked flat lockplate, double set triggers. Brass furniture includes a typical Lancaster style sideplate with beveled edges, a four-piece patchbox with classic Lancaster daisy finial and engraved with deeply engraved designs, and a silver eight-point star above the cheekpiece. Replaced silver oval wrist escutcheon. Barrel retained by 4 barrel keys, silver ovoid escutcheons around each. Full-length figured maple stock of familiar Lancaster County form with incised moldings on both sides of forend and incised “C-scrolls” behind cheekpiece. Both sides of wrist feature incised designs. Wooden ramrod probably a replacement. Barrel retains a refinished brown surface with signature possibly retraced or refreshed, some edge wear and scattered marks overall. Lock is a professional reconversion to flintlock configuration. Brass retains a mellow patina. Stock has been refinished and has some restoration around lock, sideplate, and a repaired break around wrist, carving possibly cleaned or deepened. This is a good representative example by an early Lancaster gunsmith who also made rifles that were used during the American Revolutionary War. Rifles by Dickert are scarcely encountered. 3,000.00 - 5,000.00

357 - (A) FINE FULLSTOCK FLINTLOCK KENTUCKY RIFLE SIGNED BY MELCHIOR FORDNEY.
Manufacturer: Melchior Fordney
Model: Kentucky Longrifle
Caliber/Bore: .52 Smoothbore
Barrel Length: 45"
FFL Status: Antique

First half of the 19th century, Lancaster, Pennsylvania. Melchior Fordney was famously murdered by a John Haggerty, a crazed religious fanatic in 1846. Fordney denied him the use of one of his rifles to shoot his horse and Haggerty returned with a tomahawk and murdered him. Fordney is remembered today as a grand master of the late golden age, Fordney's work often is seen with deep, bold engraving and beautiful woodcarving. His guns are known as quintessential Lancaster rifles, with their folk art appeal and inclusion of almost all of the Lancaster characteristics. He worked as a gunsmith from 1807 through 1846 at his shop on South Queen Street in downtown Lancaster, Pennsylvania. This rifle features an octagonal barrel signed "M*Fordney" in script on the top flat. Flat lockplate stamped "DREPPERT/LANCASTER" in the center and with stamp-engraved designs. Brass furniture deeply engraved in the typical Fordney style, sideplate engraved with checkered triangles, scrolls, and borders. Four-piece patchbox with engraved scrolls and checkered panels, toe plate engraved en suite. Silver oval escutcheon inlaid above cheekpiece is inscribed "JM", silver wrist escutcheon is vacant and has been replaced. Full-length figured maple stock of familiar Lancaster form, punch-dot checkered wrist and incised border along bottom of both sides of buttstock. Barrel retains a dark brown patina with some edge wear and scattered marks, some light corrosion at breech and signature is very good. Lock professionally reconverted to flintlock configuration and now retains a brown patina. Brass retains a dark patina with some wear and light marks. Stock has been refinished and shows some wear to checkering, about 16 inches replaced on forend, including nose cap, and has scattered age cracks and a few period repairs, some minor pieces replaced around lockplate. This is a very nice example of Melchior Fordney's work. 3,000.00 - 5,000.00

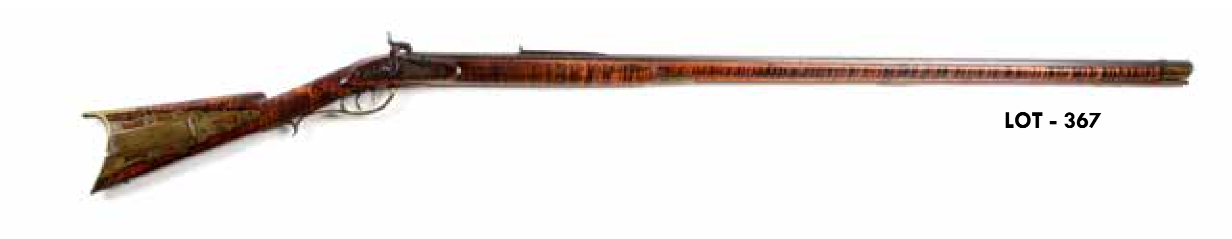
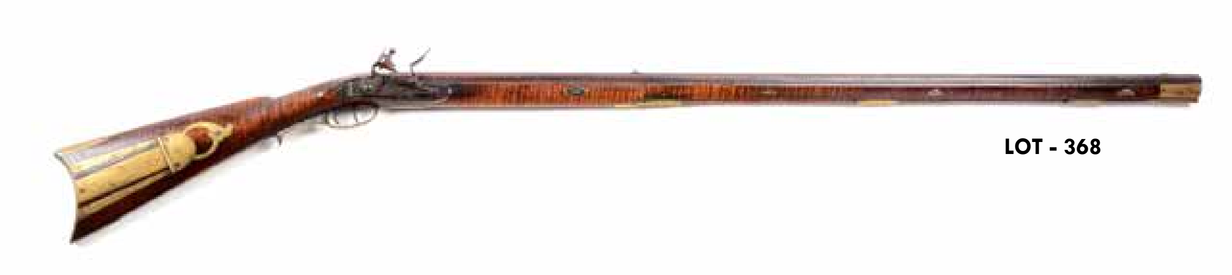
Each barrel has a bolster with nipple and ramrods are fitted on both sides, between barrels. Swivel mechanism operates by pulling a lever forward the triggerguard. Back action percussion lock with scroll engraving, otherwise unmarked. German silver sideplate opposite lock stamped "I.L. BECK". Figured maple buttstock with brass four-piece patchbox on right side and a silver tulip inlaid on the wrist, the left side features three silver tulips, a silver oval escutcheon inscribed "JD", an inlaid silver U.S. half dime, and a silver strip engraved and inlaid into cheeckpiece. German silver oval inlaid above cheekpiece. Barrels retain a dark brown patina and swivel mechanism functions well. One ferrule on each side has been reattached and ramrods probably replaced. Some minor corrosion at breeches. Lock retains a matching brown patina, hammer does not stay in cocked position, nipples replaced. Stock retains much original finish and patina, toe was replaced during period of use. Brass and silver retain an original unpolished patina. This is a very nice Pennsylvania made swivel breech combination rifle in very nice original condition. 1,500.00 - 2,500.00



LOT - 367

367 - (A) CALIFORNIA FULLSTOCK PERCUSSION KENTUCKY RIFLE SIGNED CRAIG.
Manufacturer: William Craig
Model: Percussion Rifle
Caliber/Bore: .36 Rifled
Barrel Length: 43 - 1/2"
FFL Status: Antique

According to "California Gunsmiths" by Lawrence P. Shelton, William Craig was born in England and was a gunsmith in Pittsburgh, Pennsylvania from 1844-1847. He moved to California in 1857 and is still in the 1860 Census in Sonora. Shortly after 1860 he returned to Pennsylvania. Due to the form of this rifle, it was most likely made in California rather than western Pennsylvania. The rifle features an octagonal steel barrel with an adjustable ramp rear sight with "W. CRAIG" stamped directly behind it and a longer than usual barrel tang. Flat percussion lockplate with stamp-engraved designs. Brass furniture includes a pierced western Pennsylvania influenced four-piece patchbox. Figured maple stock of California form with an elongated relief cheekpiece. Very good condition overall. Barrel retains a brown patina with some corrossion at breech. Lockplate retains a matching patina with percussion corrosion on front section. Brass retains a dark and unpolished patina. Stock is excellent with a few light scattered marks from use. This is a very nice and original example by a seldom encountered California maker. 1,500.00 - 2,500.00



LOT - 368

368 - (A) FULLSTOCK FLINTLOCK KENTUCKY TARGET RIFLE SIGNED SCHWEITZER.
Manufacturer: Unknown
Model: Kentucky Longrifle
Caliber/Bore: .55 Smoothbore
Barrel Length: 41-3/4"
FFL Status: Antique

Abraham Schweitzer was the brother-in-law of Melchior Fordney and was a gunsmith and lock maker, and was listed as a lock maker between 1820 and 1822 in Lancaster, Pennsylvania. This rifle displays several features that are similar to Fordney rifles, including the patchbox final and form. The rifle has an octagonal barrel with partially worn signature "A. Schweitzer" in script on the top flat. Flat flintlock mechanism stamped with a small sword or cross beneath the pan, but otherwise unmarked. Double set triggers. Brass furniture includes a four-piece patchbox with scrolls engraved on the lid and a classic Fordney-style Lancaster finial. The sideplate is the style of a Chambersburg school plate and is engraved with checkering and scrolls. Full-length figured maple stock of Lancaster form, inlaid with a silver wrist escutcheon inscribed with later "JS" and an engraved silver half-moon above the cheekpiece. Half moon and oval silver barrel key escutcheons line both sides of the forend. Brass-tipped wooden ramrod is probably a replacement. Barrel retains a spotted brown patina with some edge wear and scattered marks, signature shows heavy wear. Lock is a well-executed professional reconversion. Brass retains a mellow patina with some wear to engraving and some light scattered marks. Stock has been refinished and has a nice patina, some minor professional restoration around lock and about 5 inches replaced at muzzle. This rifle has a great homogeneous and original overall appearance and is a great example of a Lancaster longrifle.

394 - (A) FULLSTOCK SODDY-DAISY TENNESSEE FLINTLOCK TARGET RIFLE.
Manufacturer: Kirkman
Model: Flintlock Target Rifle
Caliber/Bore: .54 Rifled
Barrel Length: 50”
FFL Status: Antique

Plain target rifle from the Soddy-Daisy school in southeast Tennessee. This example features a heavy octagonal steel target barrel with sights mounted on top, a partially visible signature on top, in script, and shaped long barrel tang. Flat stamp-engraved flintlock lockplate stamped “JOHN KIRKMAN / NASHVILLE” in center and features a reinforced cock and roller frizzen. Deep crescent shaped steel buttplate typical of this school and steel triggerguard, ramrod ferrules, and nosecap. The rifle has double set triggers. Plain full-length walnut stock of familiar Soddy-Daisy Tennessee form with narrow and pointed comb and a uniquely carved relief cheekpiece that extends into the wrist. The rifle is in very good condition overall. Barrel retains a dark brown patina with some light edge wear and corrosion at breech. Lock is in original flintlock configuration and retains a brown patina, some wear to markings and frizzen is a replacement. Stock is excellent with a few light scattered marks from use and some horizontal age cracks on forend. This is a fine example of a scarcely seen Tennessee target rifle. 2,500.00 - 3,500.00

395 - (A) CIRCA 1850’S NELSON LEWIS CUSTOM HEAVY BARREL SINGLE SHOT PERCUSSION TARGET/SNIPER RIFLE WITH BULLET STARTER.
Manufacturer: Nelson Lewis
Model: Sharpshooter
Caliber/Bore: 0.52
Barrel Length: 32”
FFL Status: Antique

Nelson Lewis operated a gun shop out of Troy, New York from 1843 to 1888. This rifle features an extremely heavy octagon barrel that is fitted, includes an original brass bullet starter, long tang rear sporting sight, dovetailed knife blade front sight. The breech is stamped “N. LEWIS MAKER / TROY NY”. Appears to be .52 caliber percussion. Has a single piece walnut half stock with deluxe grain and rifle buttplate with metal toe protector, a deluxe trigger guard and double set triggers, right side drop lock, single shot hammer percussion system with period lollipop folding long range tang sight. Barrel is basically a soft brown patina. Wood is excellent with roll-over left side cheek piece. Pewter tip. Strong rifled bore with usual abrasion. These heavy barrel rifles were used for target shooting in the 1850”s-60’s and were called up for dual service as sniper rifles during the Civil War. Extremely handsome, well-cared for rifle. 1,500.00 - 2,500.00

397 - (A) FRENCH MODEL 1779-1786 TULLE NAVAL PERSONNEL OR MARINE FLINTLOCK MUSKET.
Manufacturer: Tulle
Model: Naval Personnel
Caliber/Bore: .73 Smoothbore
Barrel Length: 42”
FFL Status: Antique

This model was supplied to Navy fusilier units responsible for securing the port installations as well as ships and their crews while fulfilling the role of police on board the ships of the Marine Royale, according to “French Military Small Arms” by Didier Bianchi. The musket has nearly the same dimensions as Model 1777 Naval musket. For another example of this exact musket, see pages 71-73 of “French Military Small Arms” by Didier Bianchi. The round smoothbore steel barrel has a bayonet lug on the bottom, near muzzle and has been shortened about two inches during the period of use. Breech has partially visible “86” marking on left side. Flat lockplate with rounded tail section, brass pan, and rounded reinforced cock. Center of lockplate marked with Tulle markings in script. Standard brass Model 1779-1786 furniture with convex sideplate and many parts with inspector stamps. Center band, sling swivels, and rear tang of triggerguard are all iron, as is correct for this model. Complete with steel ramrod. Full-length walnut stock with oval carved cheekpiece on left side and right side of butt with French inspector stamp. Barrel retains a freckled brown patina with some scattered corrosion, especially at breech. Lock appears to be original flint and has been cleaned, now retaining a grey patina with some darker areas and light wear. Brass has also been cleaned and now retains a slightly rough surface and a mellowing patina. Stock has been refinished and shows some edge wear, scattered marks, and minor losses on forend along barrel and on comb. This is a very scarce and desirable French long arm, these are seldom encountered. 2,000.00 - 3,000.00

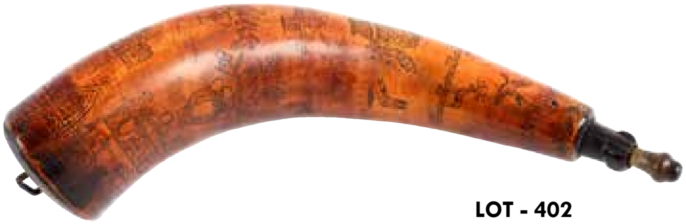
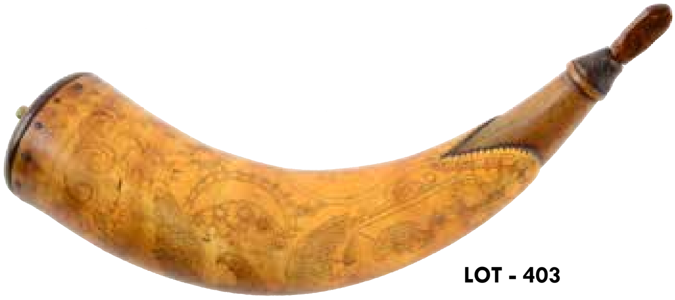
Engraved brass furniture includes trigger guard with daisy on bow, butt cap with daisy and sideplate engraved with shell and detailed borders. Figured maple stock inlaid with brass wire around lock and sideplate as well as in a fleur-de-lis style pattern around barrel tang. Very good condition as restored and refinished. Barrel and lock have been heavily cleaned and refinished. Lock composed of mainly contemporary parts. Brass retains a mellow patina with some areas polished and side plate has been replaced. Stock very good as refinished, showing some scattered marks from use and small loss below tail of lock. This pistol is most likely a composite piece with a mixture of contemporary and original parts. 800.00 - 1,200.00



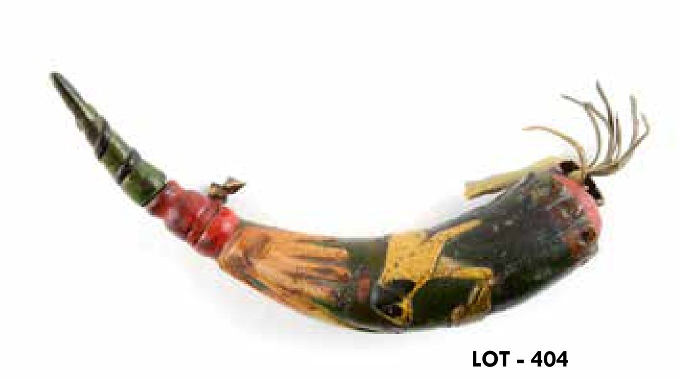
LOT - 402

402 - ENGRAVED POWDER HORN INSCRIBED JOSEPH KINZINGER DATED 1836.
Probably mid 18th century horn engraved when dated in 1836. Curved 13” tapered horn body with carved narrow spout terminating with a rounded relief-carved ring. Top of horn engraved with vine and leaf border and inscribed “JOSEPH KINZINGER 1836”. Body adorned with many nautical and folk art designs engraved throughout, including birds, an elephant, a zebra, many species of birds, deer, pigs, cattle and a vessel. Possibly meant to depict Noah’s Ark, as there are nearly 20 birds, nearly 10 plant depictions, and several mammals. Other images depict Middle Eastern style buildings and churches. Replaced wooden butt and spout plug. Very good condition with a pleasing dark patina and scattered areas of light carry wear and shelf wear, along with a few minor chips and a dark area. Minor chip on spout. Overall, a great horn showing extensive history and used over a long span of time. 2,000.00 - 3,000.00



LOT - 403

403 - PATRIOTIC ENGRAVED POWDER HORN ATTRIBUTED TO TANSEL.
Attributed to the well known Tansel family of horn engravers, probably first quarter of the 19th century. Features a 13 - 1/4” curved horn body with a relief carved “toothed fish mouth” towards the spout. Bulbous wood plug with later brass lanyard ring. Engraved designs are in the typical Tansel style and include a large and detailed patriotic eagle with a shield with arrows in its talons. Detailed borders of scrolls and shaded arches surround the butt and floral and star frames surround detailed animals including two buck, a wolf, a unicorn sea creature and a bear. All animals are folk art interpretations but show great detail. Retains a nice yellow patina overall with some light scratches and areas of light wear. One 1/4” round hole repaired using what appears to be ivory, probably during the period of use. Spout with relief ring now terminates in a cone, which may have been shortened during the period. 2,000.00 - 4,000.00



LOT - 404

404 - UNIQUE PAINTED AND RELIEF CARVED AMERICAN FOLK ART POWDER HORN.
Curved 13 - 1/2” body with red painted and turned spout and bulbous plug. Remnants of period fringed leather on butt and around spout. Carved and paint decorated figures include a rabbit, a black and white dog, and a pair of hands releasing a colorful bird. Conical spout plug painted green and with black spirals carved in relief. Colors include polychrome yellow, red, green, blue, orange, white, and black. All surface shows significant age with yellowing and some areas of crazing. This is a very interesting and unusual piece of Americana! 2,000.00 - 3,000.00

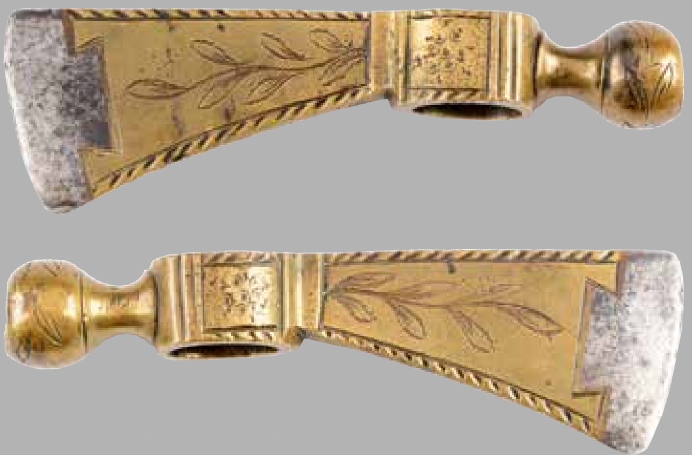
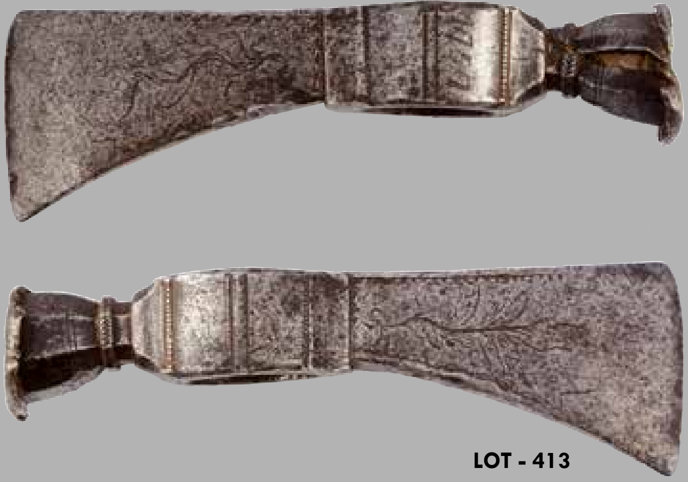
411 - EARLY AMERICAN HALBERD TOMAHAWK.
Halberd-type hand-forged crescent head fitted with faceted spike at rear, measures 8 - 1/2 inches overall with 6 - 3/8” curved edge. Appears to have the original wooden haft, measuring about 20” and fitted with 4” conical brass spike at bottom and brass cap over top of eye. This piece is illustrated in figure 8 of page 58 of “Indian Tomahawks and Frontiersmen Belt Axes” by Hartzler & Knowles. Very nice as found and dry condition, head retains a heavy brown spotted patina with some losses to edge and spike tip slightly rounded. Surface shows some oxidation and brass retains dark green patina. Haft dry and showing some scattered marks. 6,000.00 - 8,000.00



LOT - 412

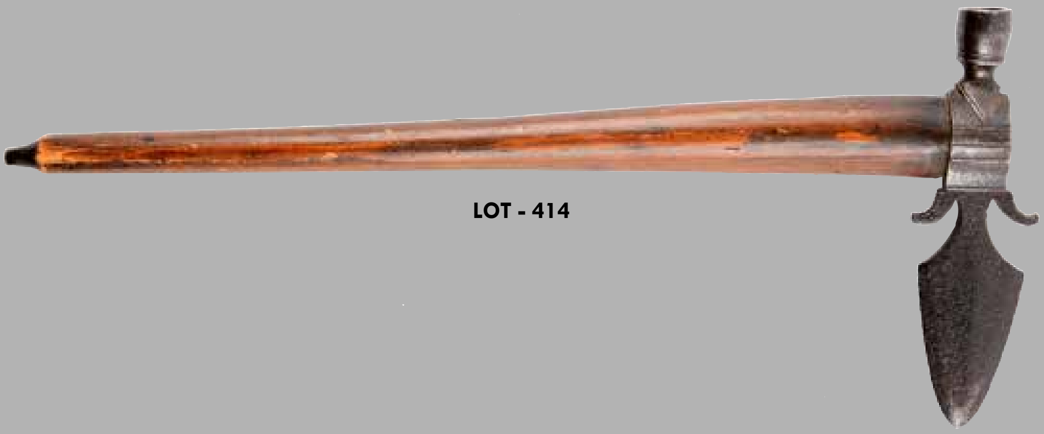
412 - FINE AMERICAN BRASS PIPE TOMAHAWK.
6 - 3/8” Probably Great Lakes region, late 18th or early 19th century. Measures 6 - 3/8” overall with 2” edge. Brass head decorated with seven engraved leaves on each side and with fluted borders on top and bottom. Dovetailed steel cutting blade. Globe-shaped brass bowl with engraved foliage decorations. Very good condition, brass retains a mellow patina with some darker areas and scattered marks from use, steel edge retains a spotted grey patina. This is a very nice example of an 18th century pipe tomahawk. For a similar, nearly identical example made by the same maker, see page 146 of “Accouterments IV” by James R. Johnston. Johnston dates this head from 1775-1800. 3,000.00 - 5,000.00



LOT - 413

413 - FINE DECORATED AMERICAN PIPE TOMAHAWK DATED 1757.

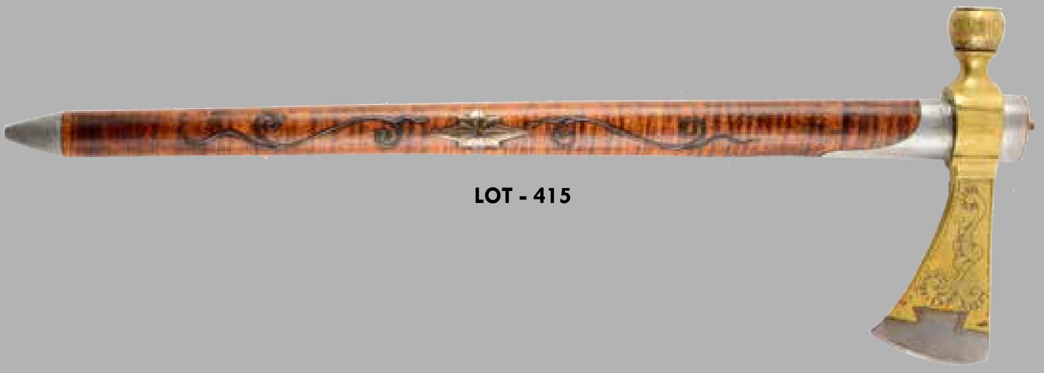
6” Forged steel construction, measures 6” with a 1 - 7/8” edge. Of early and delicate form, head engraved on both sides with foliate scrolls and borders. Both sides feature moldings and chiseled rope borders. Octagonal faceted bowl with double lines engraved near base and relief band around neck. For a similar example, also dated (1758) and probably by the same maker, see pages 87-88 of “Accouterments” by James R. Johnston. Dated “1757” on left side, vertically between moldings. This may be the earliest dated pipe tomahawk, as Johnston lists the example shown in the book as the earliest known pipe tomahawk, dated 1758. Retains a spotted grey patina overall with some edge wear and scattered marks from use. Some damage to bowl, as it was obviously used as a hammer at some time, bowl cracked and separated on left side. Damage appears to have been done during period of use. This scarce example is one of the few dated early American tomahawks and features excellent architecture and engraved decoration. French and Indian War pipe tomahawks of this quality are rarely seen. 3,000.00 - 5,000.00



LOT - 414

414 - 18TH CENTURY STYLE SPONTOON PIPE TOMAHAWK.

16” L. Forged head of 6 - 3/4” overall with spontoon type blade featuring two serrated spurs forward of the eye. Both sides feature moldings and pipe is attached in the saddle fashion. Rounded bowl with brass band inlaid around base. Later Hickory haft with carved mouthpiece. Haft has an encircled “5” painted on it and a small white tag, yellowed from age numbered “149”, these appear to be museum or collection numbers. Dark patina with some edge wear and scattered areas of pitting and marks from use. Haft has some scattered light scratches and is slightly loose. 1,500.00 - 2,500.00



LOT - 415

Manufacturer: Astra
Model: 900
Serial No. 24384
Caliber/Bore: 7.63mm
Barrel Length: 5 - 1/2”
FFL Status: Curio & Relic

Manufactured 1933. This is basically a standard issue flat side with the exception that the left side has the British crown with lion and unicorn. The royal seal reads “DIEU ET MON DROIT” in French and translates to “God and my right”, which is the motto of the Monarch of the United Kingdom outside Scotland. Left side of the slide has the “BNP” proof. Bottom of barrel has “BNP” crown with tonnage and “KB4” in circle. Right side of frame has the “BTC” import stamp (extremely small) with “X”, “E” and “P” individual stamps. The “P” stamp is also found on right side of frame and barrel. Pistol has been beautifully and expertly restored right down to the fire blued small parts; retaining virtually all of this finish. Walnut grips are numbered to the gun and should be refinished to match. Features lanyard loop. The “E” with star stands for Enfield repair. “BNP” is Birmingham proof. Fine bore and action. Beautiful pistol. 1,500.00 - 2,500.00

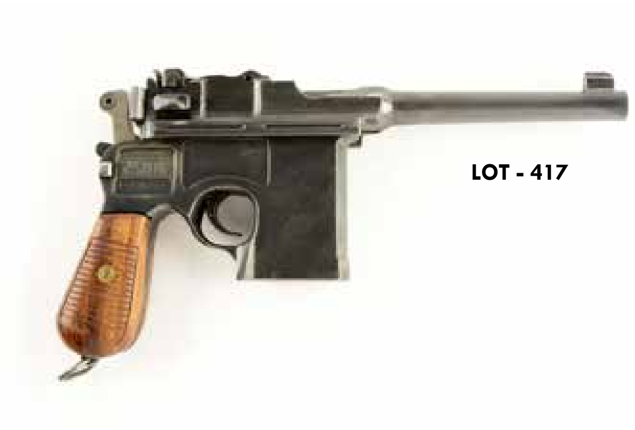
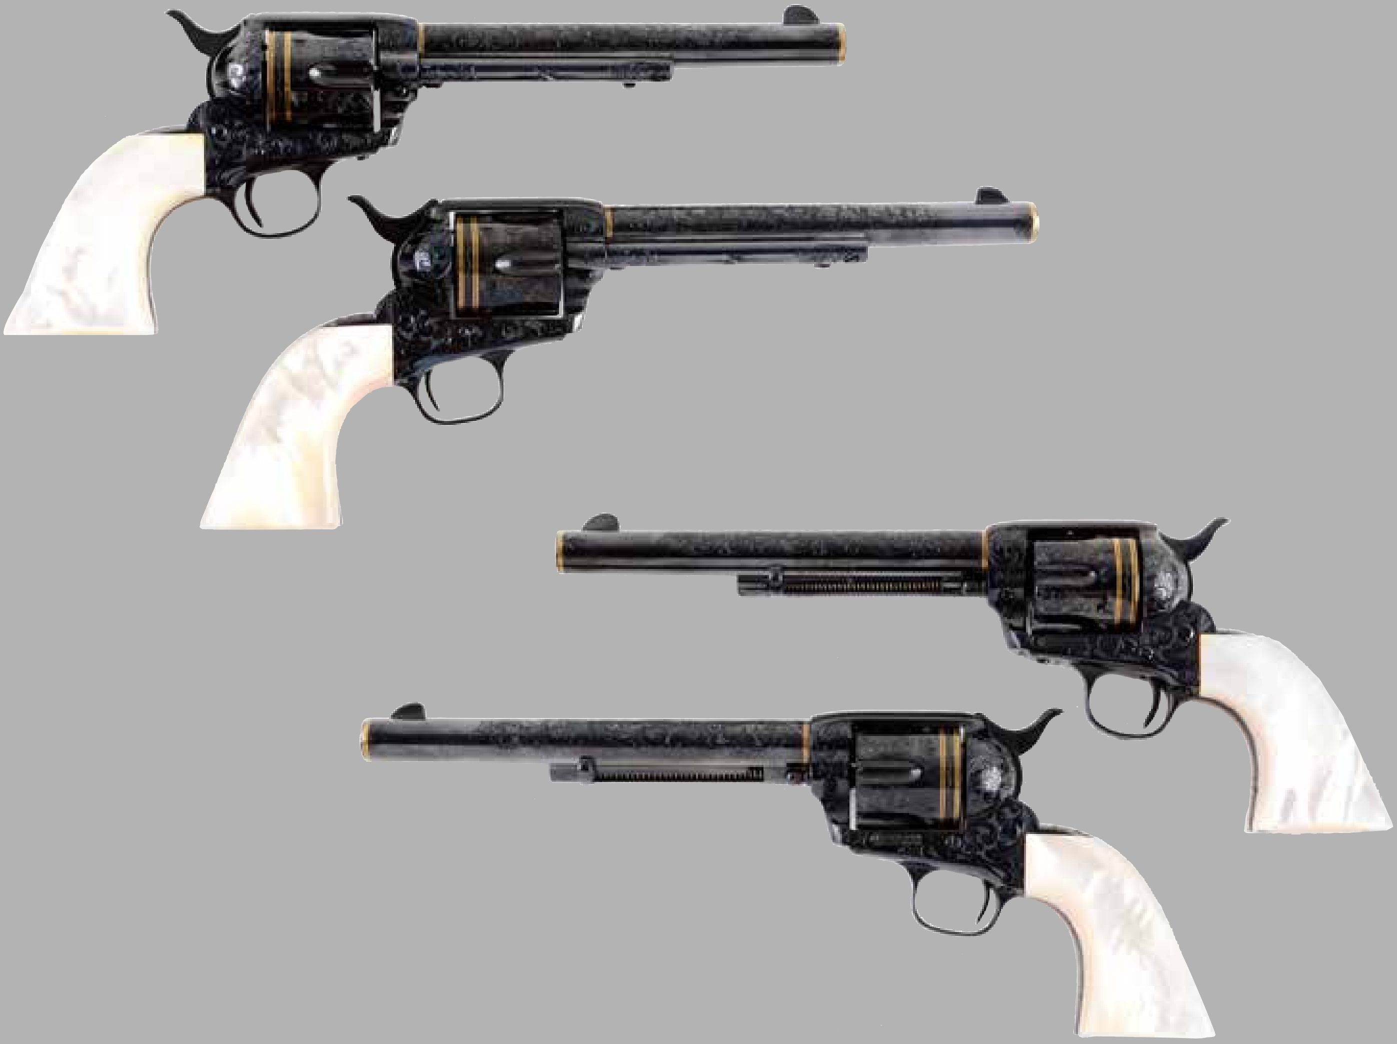
417 - (C) CHINESE BROOMHANDLE MAUSER C96 SEMI-AUTOMATIC .45 ACP PISTOL.

Manufacturer: China
Model: Broomhandle Mauser C96
Serial No. 1214
Caliber/Bore: .45 ACP
Barrel Length: 5 - 1/2”
FFL Status: Curio & Relic

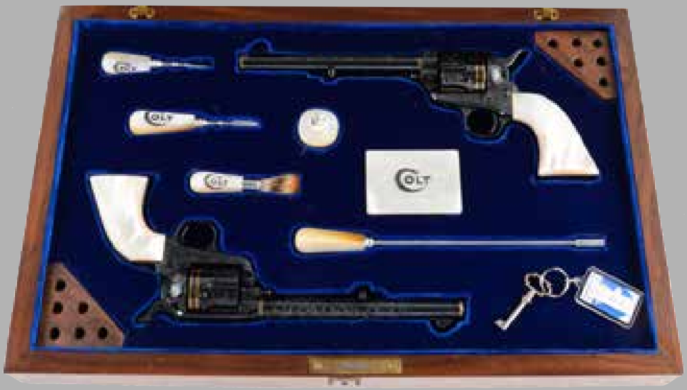


LOT - 417

Sometime around 1925, the Hanyang and Shansei Arsenals were producing Mauser military type pistols in both 7.63mm and .45 ACP. While not as highly finished as the German Mauser, the workmanship and material were good quality, especially those made at the Shansei Arsenal. Approximately 6,000 were made in .45 caliber at this factory. The Chinese characters on the right side indicate year of manufacture, and the characters on the left side translate to “SHIKI FIRST”. A near identical example of this pistol can be found in figure 156, page 141 in the book “The Mauser Self-Loading Pistol” by Belford & Dunlap. These .45 caliber versions are behemoths, with the standard C96 weight approximately 2lbs 11oz and this example weighing in at 3lbs 8oz. This version does not have the removable magazine and is loaded via stripper clips. All matching numbers. The importer is marked inside grip strap. Resembles your basic Mauser with blue finish. No fire blue on small parts. Similar sight but beefier. Features small cone hammer and walnut grips with lanyard ring. Retains approximately 85% of the dull military style factory blue. Strong rifling. Fine action. These 1920’s .45 caliber Broomhandles are quite a handful, very scarce and highly sought. 2,500.00 - 4,000.00



418 - (C) EXQUISITE MASTER ENGRAVED COLT 1ST GENERATION DOUBLE SET SINGLE ACTION REVOLVERS.
Manufacturer: Colt
Model: SAA
Serial No. (A) 278847 (B) 338977
Caliber/Bore: .32-20 WCF
Barrel Length: 7 - 1/2”
FFL Status: Curio & Relic



This fine set started off life as two 7-1/2” pre-war Single Action Army revolvers in caliber .32-20. One revolver is serial no. 338977, shipped as a blued 7-1/2” .32-20 on March 27, 1920, to A&F New York. Serial no. 278847 does not have a letter. The set comes with the following letter from Jeffrey W. Flannery dated January 15, 1988, by serial numbers as follows “This set of Colt SAAs are engraved in American rococco style with 32” of 24K gold inlay, encased in walnut box with complete pearl tool set.” Revolvers are identically engraved with full blue finish, typical 19th century engraving with punch dot background, gold line accents and real pearl grips. Two line patent address on frame. Barrel stamped “.32 WCF”. Colt stamp on top. Revolvers are even engraved on the face of the cylinder. Beautiful as new condition as enhanced. Case has three pearl handled tools, a pearl oil bottle, and genuine pearl box/container. Fine action, timing and lock-up. Strong, clean, shiny bores. Workmanship is of the highest master quality and is an aesthetically pleasing two gun Colt set.

422 - (M) EXPERIMENTAL PROTOTYPE COLT MK III J FRAME (DELTA MODEL) DOUBLE ACTION REVOLVER.

Manufacturer: Colt
Model: Mk III Experimental Prototype
Serial No. X9704
Caliber/Bore: .357 Magnum
Barrel Length: 4”
FFL Status: Modern

On October 16th, 2008 Colt shipped a MK III Model J Frame double action revolver experimental prototype with a yellow tag with simply written “Delta” believed to be the issue name for this model if released for public. Features a heavyweight barrel, six shot, double action, fixed sights, stainless steel and furnished with checkered walnut grips, wraparound, revealing grooved backstrap, with wide spur hammer. Furnished without maker, model, caliber or rampant Colt. It appears they used the heavy barrel with stainless construction and a shorter than normal grip frame with wide spur hammer to introduce a new model for law enforcement and/or public. Obviously, it failed whatever tests were required to become a production revolver and hence, was never manufactured for public consumption. It has obviously been test fired with cylinder burn, drag line, and storage wear. Grips are excellent. The heavy barrel gives it a very solid feel and the cylinder pin is exposed. It is extremely hard to evaluate a prototype factory model that never made it to production and is basically a “one-off”. It would be of great interest to any student or collector of the modern Colt double action era. While its possible more than this one experimental was made, we have no proof of it and as such, are considering this a one-of-a-kind Colt that cannot be replicated. Gun writers often use the word ‘rare’, but it is hard to determine what word can be correctly used with a one-of-a-kind experimental gun.

424 - (C) NORWEGIAN MODEL 1914 SEMI-AUTOMATIC PISTOL (1941).
Manufacturer: Kongsberg Vaapenfabrikk
Model: 1914
Serial No. 26049
Caliber/Bore: .45 ACP
Barrel Length: 5"
FFL Status: Curio & Relic

This Colt 1911 clone is dated 1941 on right slide, produced in Norway and widely used by both the Nazis and with the Resistance. This example has all the Norwegian proofs and no Nazi marks but was made in 1941. The German occupation of Norway began on April 9th, 1940, so the 1941 date clearly puts this pistol as manufactured under Nazi occupation. Matching numbers on frame, slide, safety and slide stop. Sports pre-war style diamond checkered walnut grips specially made for the distinctive slide stop. Features long smooth trigger, short wide spur hammer, all checkered small parts, and flat mainspring housing with lanyard. Magazine is numbered to another gun (101047). Pistol is in excellent condition, retaining approximately 90% of the arsenal applied blue-black finish. Fine bore and action. Nice example of a fairly scarce World War II 1911 style pistol. 1,000.00 - 1,500.00

This beautiful, custom handmade rifle was built by John Bolliger and is signed on right side barrel breech. The barrel has nearly full length milled flutes with a 2” muzzle brake and built with no sights. The bolt is completely jeweled and the knob is hand-checkered and stippled on all five panels. Built using the double stock reinforcing bolts. The exhibition grade straight comb pistol grip walnut stock is checkered and carved in the most exquisite pattern, utilizing stylized Fleur-de-Lis and tipped with an ebony forend. Sling eyes are set in reinforcement blued metal ovals. There is no pistol grip cap, rather the lower tang extends to the bottom of the pistol grip to a skeletal grip cap with exposed wood finely checkered. Has a black rubber buttplate. The upper tang extends up and over the comb ending wit a Fleur-de-Lis shaped design. Right side of the stock has a rollover comb. such exquisite craftsmanship could sport no less of a quality scope than a Swarovski 2x5x15 Z6 finished in matte blue. The custom mounts resemble early German claw mounts but fit flush. About the only flaw that we can find on this entire rifle is a very small 1/4” dent at the angled loading port section of the stock. Rifle is in near new condition inside and out. The quality of workmanship exhibited in unparalleled. Since 1986, John Bolliger has devoted his life to the creation of some of the finest works of the custom riflemakers art being produced, not only in the USA but internationally as well. 3,000.00 - 5,000.00

463 - (C) U.S. SPRINGFIELD MODEL 1922 .30 HEAVY BARREL “MATCH” SPECIAL BOLT ACTION RIFLE.
Manufacturer: Springfield
Model: 1922
Serial No. 1244354
Caliber/Bore: .30-06
Barrel Length: 24”
FFL Status: Curio & Relic

In reading the fine article by William R. Hansen in the September 2016 magazine entitled “U.S. Martial Arms Collector” published by Martial Arms expert Wayne Gagner, he writes, “...after rare, what comes next?” This is a fair question given the survival rate of original and unaltered Model 1922 heavy barrel match rifles can be counted on one hand. It is estimated that the vast majority of these rare match rifles were later altered to the type “T” variation. This rifle by serial number is listed in this fine article as example No. 1 and places this rifle as having been assigned to Captain James F. Laughlin, a top rated marksman on the 1922 Massachusetts National Guard team. The right side of the stock is stamped, “Mass. Rifle Team”. Captain Laughlin made the international shooting team in 1923 scoring an incredible 248/250. These rifles are instantly recognizable to the knowledgeable collector by the following special features. Springfield Armory first assembled new and distinctively American heavy barrel rifles for the 1921 International Rifle Team held in Leon, France. The original drawing for this rifle can be found on page 106 in William Brophy’s book titled “The Springfield 1903 Rifles”. The front sight base is integral to the barrel and does not have the typical band. The scope blocks are factory mounted with no provision for rear sight and spaced 5-3/4” on center using standard AO blocks. The 1917 Enfield front barrel band to allow for the large diameter barrel. Features the NRA style pistol grip, two bolt, walnut sporter stock with wide finger grooves. Has the short stem Lyman 48 receiver sight and swept bolt stamped “WL3”. Non serif safety. Left side of stock has the deep “D.A.L.” in rectangle for Springfield Armory production 1918 - 1942. Wrist has block letter “P” in circle. Sling swivel on toe of stock. Has the Type 7 stamped, cupped steel buttplate. Rifle is in excellent all original untouched condition. The receiver remains the majority of the original factory high polish commercial type blue finish. The barrel retains 85% original factory rust blue, thinning from age. Stock is excellent with a few minor storage dings and a few bumps at the left side of forend. It is equipped with special order, adjustable double set triggers. Bore has an ME reading of 0 and a TE reading of 7. Bolt is polished in the white. Rifle is accompanied by a copy of the U.S. Martial Arms Collector magazine that features an article on this exact rifle. Also comes with a photocopy of Captain Laughlin’s shooting score from 1923 from the American Rifleman with a picture of Laughlin that appears to be him holding this exact rifle. According to the article all of the known examples are serial numbered from 124,349 to 124,889 with nine listed known examples that have been identified to date. Long referred to by knowledgeable Springfield collectors as the “ghost rifles” as they are often talked about but never seen. This may be a once in a lifetime chance to add what is arguably the rarest U.S. Springfield Model to your collection. Includes a Springfield research letter. Comes with factory letter. 8,000.00 - 10,000.00

Manufacturer: Springfield
Model: 1903 Sporter
Serial No. 1270417
Caliber/Bore: .30-06
Barrel Length: 24”
FFL Status: Curio & Relic

According to the Springfield Research Service letter this rifle was shipped from the DCM on May 25, 1926, to one Mr. Charles N. Stark of Portland, Oregon and is recorded in the arsenal sales record. Barrel is dated “10-25” with “SA”. Most frequently called the NRA Sporter, its official designation is Rifle, U.S., caliber .30, Model 1903, Sporting Type, star gauged, fitted with Lyman No. 48 receiver sight, and was first announced in January of 1924. Listed in the 1925 DCM sales list for $49.50, it was last listed in 1932. The action of this rifle is hand-fitted and identical to the National Match action, except runways are not bright. Bolt and extractor are polished and electro-pencil marked with serial number (no longer visible). The barrel is blued and has star gauge marks on muzzle. They came with a half-stock, pistol grip, two stock bolts, no checkering, with a special checkered steel buttplate with no trap. Between 1925 and 1932, only 5,538 sporting type 03’s were manufactured. All were finished in a commercial blue finish. The sporter could be special ordered drilled and tapped for telescopic blocks. This rifle is equipped with the case colored blocks and additional two tap holes to move rear mount. Rifle retains approximately 95% of the commercial high polish blue finish with some light plum. Stock is in near mint condition with barely any storage marks. Buttplate has 95% original blue. Comes with a period sling. ME reading: .75. Fine, clean bore and in working order. Barrel never had a factory cut for a sporting sight. The NRA special 1903 sporting rifle was considered one of the finest bolt action sporting rifles of its day and was used world-wide by many famous and notable shooters, hunters and writers alike. This was the premier sporting rifle of the 1920’s. Include a fine condition Fecker tube scope, Serial No. 3115. 2,500.00 - 4,000.00

Manufacturer: Springfield
Model: 1903
Serial No. 563055
Caliber/Bore: .30-06
Barrel Length: 24”
FFL Status: Curio & Relic

Frame dates to 1913 and matches barrel date. Left side of stock has the “J.F.C.” cartouche in box for James F. Coyle, who, serving as inspector ran from 1907 to 1918. This gun is correct in every respect. Trigger guard has the “NRA” with Ordnance bomb stamp. Walnut stock has the wide finger groove with single bolt. Sports the high hump early walnut hand guard. All milled parts. Serif “P” in circle on wrist. Early sight with dish knobs but no platinum line. Straight bolt. Original blue finish of which 80% remains on frame. Barrel is a brown patina and has some light corrosion on front sight and muzzle. Stock is excellent with a few dings. Great wood and finish. No cracks or chips, but some sling damage at base where is wears an early “ORUC” no buckle canvas sling, Patented 1914. ME reading: 1. Fine clean bore. These rifles were made availablet o the NRA prior to World War I and are a high sought variation of the U.S. Model 1903. This is a fine example. 1,200.00 - 1,600.00

467 - (C) DOCUMENTED U.S. SPRINGFIELD MODEL 1903 NATIONAL MATCH BOLT ACTION RIFLE.
Manufacturer: Springfield Armory
Model: 1903 National Match
Serial No. 1479256
Caliber/Bore: .30-06
Barrel Length: 24”
FFL Status: Curio & Relic

This National Match Model 1903 comes with all the original paperwork: five documents dated 1937 including the Star Gauge record by serial number (No. 1479256). It appears as if the rifle was originally an RIA serial No. 20995 that was received by the factory in 1937 where they replaced the receiver serial No. 1479256, assembly, National Match, with bolt stop per DCM order from Mr. H.E. Wright of Little Rock, Arkansas with a National Match barrel, National Match hand guard; and where they also disassembled and adjusted head space. Complete cost to convert was $15.24. All documents are framed. Barrel is stamped “SA (bomb) 5-36”. Receiver number places manufactured in 1934. Has a Star Gauge barrel, polished rail, nickel silver bolt, matching serial number etched on polished bolt, Type C pistol grip stock with block “P” cartouche in circle. Left side of stock has “SA / SPG” cartouche in box used 1938 to 1940. The shipping ticket is dated November 11th, 1937, so it is obvious stock was manufactured at the tail-end of 1937. Comes with a set of P.J. O-Hare front and rear sight protectors. Has the sight groove hand guard, two bolt no groove stock, all milled parts, and finely checkered trapdoor buttplate. Rifle retains nearly all of the dull blue-black arsenal finish. Walnut stocks are excellent. Fine bore and action. A lovely, excellent to near mint National Match rifle with complete documentation detailing all aspects of this rifle. 3,000.00 - 4,000.00

Manufacturer: Springfield Armory
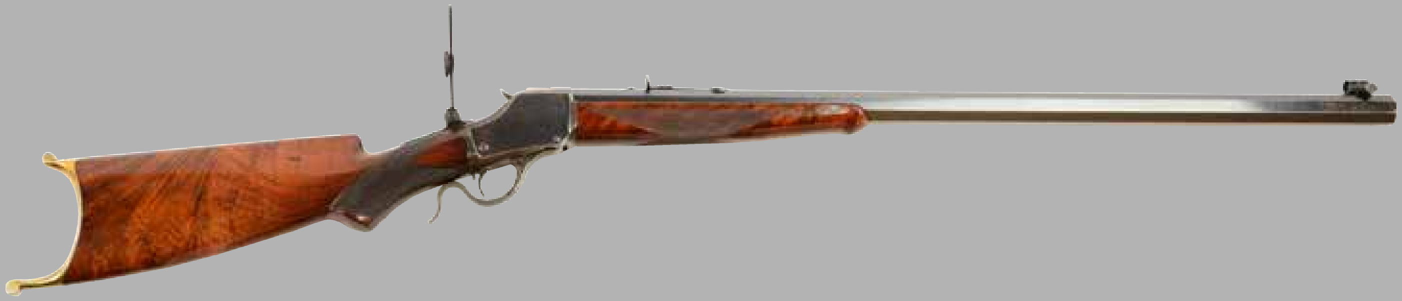
Model: M-1 Garand
Serial No. 3683890
Caliber/Bore: 7.62 NATO
Barrel Length: 24”
FFL Status: Curio & Relic

Frame was built between March 1945 and June 1945. Barrel is stamped “H&R 7.62 NATO” with three star DOD stamp, dated May 1965, SA No. 11010457. Stock has a block style proof “P” with no serif or circle, no other cartouche, is made of birch and is a period replacement. In the mid-1950’s the U.S. Navy began to develop a 7.62 NATO M1 Garand rifle. These were service grade rifles. This is a Type III with the H&R conversion. Assembled at H&R in 1955-56 and were designated the U.S. Rifle Navy Mk II Model I Cal. 7.62mm. Receivers on Type III were not marked “NATO”. Used an original SA barrel. Has the enlarged gas port hole. Stock is an obvious replacement. Bolt is stamped “6528287-SA 814”. Has a “D.R.C.” stamped right sight adjusting wheel. Trigger guard is stamped “C46025WRA”. Metal retains nearly all of its arsenal applied finish. Fine bore and action. This information can be found on page 189 in the book “Collecting the Garand II” by J.C. Harrison. 1,200.00 - 1,600.00

472 - (C) NEAR NEW UNFIRED PRE-WAR WINCHESTER MODEL 1894 .38-55 SADDLE RING CARBINE (1921).
Manufacturer: Winchester
Model: 1894 Saddle Ring Carbine
Serial No. 900881
Caliber/Bore: .38-55
Barrel Length: 20”
FFL Status: Curio & Relic

This Saddle Ring Carbine, like the .25-35, .32 Special and .30-30, appears to be basically as new and unfired. The most desirable and largest caliber of this series. This carbine was manufactured in 1921. Features the scarce half magazine, full round barrel, single band, post front sight, Winchester three leaf folding express sight, blued finish, walnut stocks, carbine butt, and saddle ring and stud. We are unaware of any time prior of an offering of four of the five caliber 1920’s Saddle Ring Carbines being offered in one sale in near unfired condition for all examples. This carbine has a hint of muzzle wear, the blue is thinning just a bit behind rear sight, and has the usual saddle ring mark. The barrel band retains all of the original factory blue, as does nose cap. The frame, lever and bolt retain 100% of the original factory blue with no cartridge wear on loading gate. Buttplate retains 99.9% original blue that has thinned 1/8” at toe of buttplate. Walnut stocks are as new with raised grain. Arguably the finest classic .38-55 Model 1894 carbine in existence. Even the screw heads are near mint and untouched. Mint bore and action. Incredible condition and as part of this set of four, could never be repeated again. Factory research states that 1894 Winchester serial number applied May 15th, 1920. No other information available. 9,500.00 - 12,500.00



473 - (C) EXCEPTIONAL WINCHESTER MODEL 1885 DELUXE SINGLE SHOT RIFLE (.40-90 SS).
Manufacturer: Winchester
Model: 1885
Serial No. 104822
Caliber/Bore: .40-90 SS
Barrel Length: 30”
FFL Status: Curio & Relic

Manufactured 1907. This special order Model 1885 features the scarce full heavy No. 4 octagon barrel, blued frame, pistol grip, set trigger, deluxe high gloss checkered walnut stock with cheek piece and plated Swiss buttplate. Sights include hooded wind-gauge, mid-range tang and Winchester sporting rear. Blued frame with case colored hammer and lever. Octagon barrel has wear on high edges with 90% blue mixing with beautiful plum. Sides of frame retain approximately 85% original high polish blue. Traces of color on lever. The highly finished checkered stocks are near mint with usual bumps and bruises. Fine action. Strong, clean rifled bore. Very difficult to find in this caliber with the heavy barrel in this condition. Serial No. 104822 on March 18th, 1907; record is blank. 8,500.00 - 10,000.00

474 - (C) AS NEW WINCHESTER MODEL 1894 SADDLE RING CARBINE (1924).
Manufacturer: Winchester
Model: 1894 SRC
Serial No. 942067
Caliber/Bore: .32 Winchester Special
Barrel Length: 20”
FFL Status: Curio & Relic

This lot, along with the following two, were purchased as a set from the late William P. Harvey collection. All were standard carbines with walnut stocks in nearly new unfired condition. It would be virtually impossible to find a finer set of the classic 1894 Saddle Ring Carbine in this condition, let alone three different examples. All three, with the exception of light saddle ring mark, retain 99% of the brilliant factory blue finish with nearly pristine walnut stocks. Standard features include full round barrel, full magazine, twin barrel bands, post front sight, folding ladder rear sight, blued finish, walnut stock and saddle ring and stud. This rifle shows a 3/4” saddle ring rub on left side. No wear or loss of finish to the muzzle, not even the barrel bands. Loading gate shows no signs of ever having been fed a cartridge. Walnut stocks are near mint and proud to metal with a couple of minor storage scuffs. Even the buttplate retains all of the original blue including toe and heel, no rubs of any kind on the high edges. Right side of frame has two minor storage marks. As close to new as you will find. According to the factory records, the .32 Winchester Special is the least produced cartridge in this model. Unimprovable. Serial No. 942067 applied May 16th, 1922. No record. 7,500.00 - 9,500.00

Manufacturer: Winchester
Model: 1894 SRC
Serial No. 910416
Caliber/Bore: .25-35
Barrel Length: 20”
FFL Status: Curio & Relic

Purchased as a set from the late William P. Harvey collection. All were standard carbines with walnut stocks in nearly new unfired condition. It would be virtually impossible to find a finer set of the classic 1894 Saddle Ring Carbine in this condition, let alone three different examples. All three, with the exception of light saddle ring mark, retain 99% of the brilliant factory blue finish with nearly pristine walnut stocks. Standard features include full round barrel, full magazine, twin barrel bands, post front sight, folding ladder rear sight, blued finish, walnut stock and saddle ring and stud. This rifle shows a 3/4” saddle ring rub on left side. No wear or loss of finish to the muzzle, not even the barrel bands. Loading gate shows no signs of ever having been fed a cartridge. Manufacturer: Winchester
Model: 70
Serial No. G292821
Caliber/Bore: .22-250
Barrel Length: 24”
FFL Status: Modern

This amazing rifle was custom built by famed riflemaker John Bolliger. John Bolliger, the founder of Mountain Riflery, Inc. began following his dream in 1966 creating custom rifles. Since 1986, John has devoted his life to the creation of some of the finest works of the custom riflemakers art being produced, not only in the USA but internationally as well. From his record setting Grizzley Rifle, (sold at auction in 1992 for $225,000.00) the highest price ever paid for an American Custom Sporting Rifle. John began this project utilizing a Winchester Model 70 action. He custom built and signed a .22-250 barrel, sans sights, and finished it in beautiful rust blue. The bolt was finely jeweled. Bolt handle is finely checkered on five panels, but it is the stock work that sets this exquisite rifle apart. Using highly grained circassian walnut, finely hand checkered in a beautiful wrap-around pattern, extended wood with inset sling swivel, straight comb, roll-over cheek piece, hard rubber buttplate and mounted with Swaroski 3x10x42 Habicht scope, the finest glass available on the planet. Rifle is in as new condition inside and out. Pictures will show the beauty of this rifle far better than any writer’s words. 3,500.00 - 5,500.00

Manufacturer: Winchester
Model: 70
Serial No. 126897
Caliber/Bore: .220 Swift
Barrel Length: 24”
FFL Status: Curio & Relic

Manufactured 1949. The .220 Swift was offered in the model 70 line from 1936 to 1963 but only accounts for 3.43% of production. The .220 Swift with 24” stainless barrel was considered the Medium-Heavy Barrel Varmint Model. No factory provision for a front sight. Barrel has three taps on back third of barrel and frame is tapped, this would allow for use of either the shorter or longer tube scope such has the Unertl’s. There are not other sights. Features the matte finish on barrel similar to frame, straight comb checkered walnut stock with sling swivels, and checkered steel buttplate. Matching numbers etched on bolt. Barrel and frame retain approximately 98% of the original matte finish. Floorplate retains 90% of the high polish rust blue with some minor age freckles. Wood is excellent but has had some added varnish that can be seen in the checkering, and there are some areas of wear to the checkering. Fine bore and action. According to the book The Rifleman’s Rifle by Roger Rule, on page 120 only 904 Varmint rifles were manufactured in .220 Swift. The 24” barrel guns were a special order. Special order barrels could be ordered to your specification from the custom shop at Winchester that was started by R.G. Owen in 1936.

506 - (A) CASED W.W. GREENER (HOWDAH) .577 DOUBLE BARREL PISTOL.
Manufacturer: W.W. Greener
Model: Howdah
Caliber/Bore: 0.577
Barrel Length: 6”
FFL Status: Antique

One of the most famous and recognizable English gun manufacturing firms of the 19th century built this fabulous double barrel side by side rifled .577 Howdah pistol that features right side barrel release, blued barrels with scooped rib, engraved breech, rare factory installed sash hook on left side, double hammers, double triggers, fully checkered forearm with ebony tip, checkered saw-handle type stock with nickel shield escutcheon on wrist and a metal grip cap. Right side of frame is stamped “W.W. GREENER / ST. MARYS WORKS BIRMINGHAM” (W.W. Greener manufactured guns at St. Marys Works from 1863 until 1894). Barrels are equipped with an extractor. Functions and locks up like new. Barrels are basically a soft mix of blue and patina. The side locks exhibit sparse engraving and are basically grey patina as is balance of metal. Stocks are excellent with fairly sharp checkering and just a few minor bruises. Action is tight as new. Near mint rifling. This incredibly rare pistol comes housed in a period leather case lined in blue velvet whose contents includes a box of ten Kynoch Solid Snyder black powder cartridges with 480 grain bullet. The built in cartridge block holds an additional five cartridges. There are three ebony handled tools, a nickel oil bottle, an ebony grease jar, a large brass jag and some extra parts. For those unfamiliar with the Howdah pistols, they were designed for the specific purpose of hunting tigers in India while riding in a howdah atop an elephant. This was a favorite pastime for the British officers as well as the social elite and foreign dignitaries during the 1870’s and 1880’s. Original examples of these pistols are extremely difficult to find due to their original cost and hard use. This is one of the finest examples we have encountered and the only we have seen that is cased and equipped with the rare sash hook. A wonderful piece of early British history, highly coveted yet rarely found. 10,000.00 - 15,000.00

508 - (A) UNFIRED EARLY 1ST MODEL MERWIN HULBERT .44 SINGLE ACTION REVOLVER.
Manufacturer: Merwin and Hulbert
Model: 1st Model
Serial No. 1120
Caliber/Bore: .44 M&H
Barrel Length: 7”
FFL Status: Antique

Offered is an unfired example of the earliest Merwin Hulbert .44 single action. Earliest features include case colored humpback hammer, scoop flutes, twin indent screws above trigger, mottled red saw handle gutta percha grips, fire blue trigger and factory nickel finish. This is a six shot single action with factory lanyard ring. The earliest models were offered in .44 M&H only. Left side of barrel is stamped “HOPKINS & ALLEN NORWICH”, top of barrel is stamped with the Merwin Hulbert New York patent dates. Cylinder face and chambers show no signs of having been fired. Hammer retains the majority of the brilliant case colors. Trigger guard has a mix of nickel and brown patina. The red grips are in near new condition. 80% fire blue on trigger. Frame and grip straps retain 95% original nickel finish with some light age freckling. Cylinder has a light drag line, some high edge wear but still retains 95% nickel as well. The barrel is approximately 75% nickel mixed with some usual age spotting, mostly on right side from storage. Indexes tight as new with good suction and a strong clean bore with minor abrasions. An extremely nice example of a mid-1870’s Merwin Hulbert .44 M&H revolver. 5,000.00 - 6,000.00

511 - (A) CONFEDERATE ID'ED MARTIALLY MARKED REMINGTON MODEL 1858 ARMY REVOLVER WITH HOLSTER.

Manufacturer: Remington
Model: 1858
Serial No. 48223
Caliber/Bore: .44 percussion
Barrel Length: 8"
FFL Status: Antique

One of the most popular and durable side arms used during the Civil War. Features full octagon barrel, solid frame, six shot percussion, single action with standard blue finish, brass trigger guard and two piece walnut grips. Barrel has a sharp three line address with pinched front sight, 30% original factory blue, and laser sharp legends with military inspector stamp "C". Loading lever is stamped "H" and is basically a brown patina. Right side of frame retains 10% original blue with "L" stamp; left side of frame is stamped "B" and has traces of blue. Cylinder is brown patina with an "L" stamp. Walnut grips are very good with a few light marks and a cartouche in box on left panel says "BH" for Benjamin Hannis; a noted inspector of Remington New Army revolvers. Indexes and locks up like new with a strong, clean, rifled bore. Includes an original period leather flap holster in very good to excellent condition. Additional information: the left grip panel has a light and crudely carved "TM" which is attributed to Tom Morrison of the 18th Virginia Calvary. The revolver was on the estate of James Tiddles. It was sold at auction in Virginia May 19th, 1947 and is signed by a relative, Batty Morrison. Tom Morrison is listed as a corporal who enlisted in 1862 in West Virginia and was a member of the 18th Cavalry Company F. Tom Morrison lived on a farm near Bethel Church on Route 50 (currently). There is a copy of the Morrison Estate auction flyer. He fought at the third battle of Winchester, as well as the battles on New Market, Lynchburg, Harper's Ferry and Front Royal; and was wounded in action. In addition, this lot comes with a book titled "The 18th Virginia Cavalry" of which Tom is listed and a tin type of Tom Morrison with his Civil War kepi at his side. This Confederate Cavalry was formed in 1862. From 1863 to 1865 the regiment saw almost constant action. This is a wonderful Confederate ID'ed revolver and holster with family history in excellent condition for having seen so much action during the war. 3,000.00 - 5,000.00

515 - (A) CUSTOM MADE PRESENTATION COLT WALKER DRAGOON.

Manufacturer: Unknown
Model: Walker
Serial No. 2752
Caliber/Bore: .44 Percussion
Barrel Length: 9”
FFL Status: Antique

Looks like a standard 1847 Walker stamped “U.S. 1847” on right side of barrel. Has a roll-engraved Texas Rangers cylinder scene, square back brass trigger guard, iron grip strap, blue and case colored, New York address. Cylinder has oval catches. Backstrap is engraved “GEN. THOMAS F. RUSK Compliments the Inventor”. Barrel retains approximately 30% blue. Cylinder is basically patina. Color patterns on frame. Grip strap is a dulled gun metal grey. Square back trigger guard of brass is not polished. One piece walnut grips that is cut into frame. Several issues indicate it is not original, to include angle, rifling and fonts; all of which are incorrect. That said, it does not appear to be an Italian gun, but rather a custom gun made to look like a real presentation Walker, of which it is not and is being sold strictly as a shooter/reenactment gun. Still an interesting piece with a fine bore and action. 1,500.00 - 2,000.00

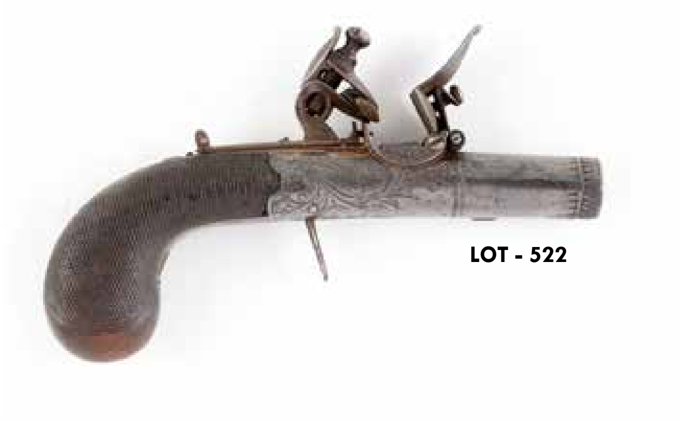
522 - (A) DIMINUTIVE FLINTLOCK SCREWBARREL PISTOL BY CONSTABLE OF PHILADELPHIA.

Manufacturer: Constable
Model: Flintlock
Caliber/Bore: .45 Smoothbore
Barrel Length: 1 - 1/2”
FFL Status: Antique



LOT - 522

Richard Constable worked between 1815 and 1845 at 88 South Second Street in Philadelphia, Pennsylvania. He made and retailed flintlock pistols and rifles. This example was made in England and imported to America for commercial sale and retailed by Constable. English firearms were in demand as they were thought to be superior in terms of quality. This pistol has a round smoothbore steel barrel with a lug for removal, muzzle is engraved with stiff leaf borders, underside stamped with two British proofs. Rounded boxlock action with folding trigger on underside. The left side is engraved with scrolls and “CONSTABLE” in a banner. The opposite side is engraved en suite and features a banner engraved “PHILADELPHIA”. The action features a reinforced cock and a sliding thumb safety which locks the frizzen shut with a pin and secures the hammer at the half-cock position. One-piece checkered walnut grip with octagonal silver wrist escutcheon. Very good condition, functions well and all steel components retain a grey patina with some scattered dark spots and light marks from use. Grip good with wear and marring to checkering. A very nice Philadelphia marked pistol! 1,000.00 - 1,500.00

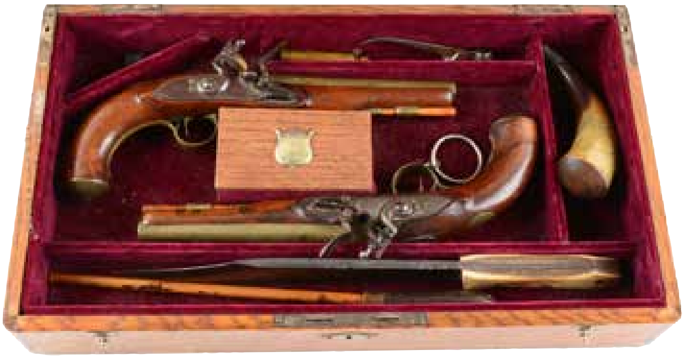
Caliber/Bore: (A) .54 (B) .54
Barrel Length: (A) 8 - 3/4” (B) 8 - 3/4”
FFL Status: Antique



LOT - 523

An interesting pair of Ketland pistols, probably made for the American market or as a secondary contract pistol. Round brass smoothbore barrels marked “LONDON” on tops with engraved borders and left sides of breeches marked with typical British proofs and also with two “P” over a possible liberty cap proofs stamped in cartouches with scalloped edges. Also, breeches engraved with stars and marked with another unknown mark of a dog. Flintlock mechanisms with detached pans and single line borders, marked “W / KETLAND / & Co.” in center of each lockplate. Plain walnut stocks brass furniture engraved with single-line borders. Wooden ramrods. Other than the unusual proofs, these are typical Ketland imported pistols in all respects. With associated later, but vintage oak box with partitioned burgundy velour interior. Associated accessories include a later coffin handles Bowie knife with blacksmith forged blade and stag grips, a priming horn, a bullet mold, a key for the box, and a wooden cleaning rod. Barrels of pistols retain an unpolished patina and have very good markings, although some are stamped lightly. Locks retain a light grey patina, cock of one pistol has been replaced and has a repair, both in original flintlock configuration. Stocks very good and retain much of original finish with some scattered marks from use. Brass furniture retains a mellow unpolished patina and one sideplate has been replaced. Box has some scattered marks from use and areas of wear. Knife blade retains a dark heavy patina, other accessories in fair condition. This is a nice set that displays well. These pistols are very unusual due to the probable American proofs. 1,000.00 - 1,500.00

525 - (A^) LOT OF 2: S&W .38 SINGLE ACTION 3RD MODEL PROTOTYPE & .38 SINGLE ACTION 2ND MODEL REVOLVERS.
Manufacturer: Smith & Wesson
Model: (A) .38 Single Action (B) No. 1 1/2
Serial No. (A) 0 (B) 96187
Caliber/Bore: (A) .38 (B) .32
Barrel Length: (A) 4” (B) 3 - 1/2”
FFL Status: Antique

Gun (A) is a unique, one of a kind Third Model .38 single action Model of 1891 prototype. Serial number is 0, which can be found on butt, cylinder and latch. The barrel has two small Birmingham proofs. the main difference between this and the standard Model 1891 is that the standard Model 1891 is not stamped on the barrel, which not all were. Otherwise, it is a standard model to include round barrel with rib, pin front sight, flared hammer, five shot, single action, nickel finish with Smith & Wesson black composition grips. Serial No. 1 was manufactured in 1891. Both grips have a little chip at the base and are not numbered. When grips are removed there is a stamp that reads “D 4 3 24” which would could indicate that gun was either refinished or originally finish in 1924. Gun does not appear to have been refinished as all legends are sharp as new. Overall, this revolver retains approximately 97% original nickel, with the exception that it appears someone tried to hand clean the area the sideplate and left numerous scratches. Strong case colors on hammer. Trigger guard is grey. Fire blue extractor and latch. Indexes and locks up like new with a strong, near mint bore. These pre-serial number prototypes are never seen in any model and are twice as rare in a 19th century model.
Gun (B) is a fine .38 single action Second Model. This revolver has the 1877 patent date on top of frame. Matching number on cylinder and barrel. Features five shot, single action, round barrel with rib, pinned front sight, case color, spur trigger, blued ejector and latch, and Smith & Wesson logo hard rubber bird’s head grips. Revolver retains approximately 97% original nickel finish. Right grip panel has a chip at bottom. Bright case colors on hammer. Grips show wear and given condition of revolver have probably been replaced. Indexes and locks up like new. Near mint bore. A fine pair of 19th century single action Smiths, especially rare with prototype. 1,000.00 - 2,000.00

531 - (A) CUSTOM REMINGTON ENGRAVED ROLLING BLOCK SPORTING RIFLE.
Manufacturer: Remington
Model: No. 1
Serial No. 9361
Caliber/Bore: .45-70
Government
Barrel Length: 32”
FFL Status: Antique

This rifle was custom built and is referred to as a Gemmer style, which is basically a half stock sporting rifle with exposed cleaning rod and thimbles. The basis for this rifle is an original Remington rolling block large frame No. 1 that has been beautifully scroll engraved and case hardened. It sports a cast steel extra heavy octagon barrel in caliber .45-70. Features a globe front sight and a long tang sporting rear sight. In addition, it has an original period long range tang sight. The walnut forend is not checkered and features a pewter end cap, barrel retaining wedge and escutcheons. Walnut buttstock is beautifully checkered with extra grain wood, bull nose and case colored Remington buttplate. Engraving was done by a master engraver as evidenced by the quality of workmanship. The upper right area of forend at frame has a 1” hairline crack, otherwise wood is near new. Metal retains virtually all of the expertly reapplied finish. Original serial number was 9361. Strong, as new, rifled bore. This is a beautiful, custom Remington rifle that should be as much fun to shoot as it is handsome. 1,500.00 - 2,000.00

534 - (A) SPRINGFIELD ALTERED SHARPS MODEL 1870’S SINGLE SHOT RIFLE.
Manufacturer: Sharps
Model: 59
Serial No. C39036
Caliber/Bore: .50-70 CF
Barrel Length: 35 - 1/2”
FFL Status: Antique

Sometime during the 1870’s, Springfield Armory converted approximately 700 First Types from percussion to centerfire. They featured walnut stocks with case hardened breech block, frame, lock, lever, trigger plate and lever catch. The barrel, bands, buttplate, sling swivels and ramrod were left in the white. Featured full forend with two bands instead of three. They were serial numbered on the tang and left side of barrel. Lock has the proper Sharps patent dates. Bands are stamped “U” and butt is stamped “US”. Left side of frame has patent dates. Military sights. All metal is basically a grey-brown clean patina. Wood is clean and proud to metal with usual minor dings. Excellent bore. Comes with a period sling and bayonet.

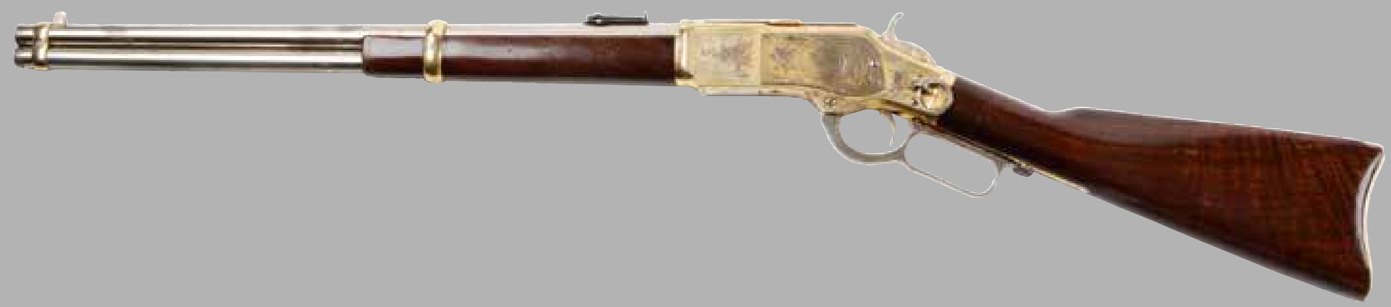
539 - (A) 1889 PARIS EXHIBITION WINCHESTER DELUXE MODEL 1873 SADDLE RING CARBINE.
Manufacturer: Winchester
Model: 1873
Serial No. 288973
Caliber/Bore: .44-40
Barrel Length: 20”
FFL Status: Antique

All features of this carbine are verified by a factory letter which lists no shipping date but places the order number as “Paris” and received dated as March 13th, 1889. The saddle ring carbine has a nickel trim barrel, trigger, hammer, lever, bottom of the cartridge elevator, and magazine with block mounted front sight and folding adjustable leaf rear sight. The barrel bands, receiver, dust cover and buttplate are gold plated. The receiver has the integral dust cover rail and dust cover with serrated edges. The buttplate has a sliding trap door. The loading gate is Nitre blued. The stock and forearm are standard grade walnut. The engraving on this carbine has a list price of $2.50. The receiver, dust cover, and heel of the buttplate are decorated with engraved scrollwork and punch dot background. The left sideplate features a white tail buck in circle, almost identical to the pattern seen on page 230 by the shop of John Ulrich in the book “Winchester Engraving” by R.L. Wilson. The top of the barrel is roll-stamped with the two-line legend: “WINCHESTER’S-REPEATING-ARMS NEW HAVEN CT./KING’S-IMPROVEMENT-PATENTED-MARCH 29. 1866. OCTOBER 16. 1860” between the lower barrel band and the rear sight. The bottom of the cartridge elevator is engraved “44 CAL”. The upper receiver tang is roll-stamped: “MODEL 1873”. Serial No. 288973 is stamped on the lower tang. The gold plating on receiver remains at about 80% with some light flaking; barrel bands and buttplate are about 90% with some light flaking. Retains approximately 85% nickel with some minor flaking and razor sharp legends. This carbine is listed in the “Winchester 1873” book by serial number by Gordon. The rear sight is a blue brown patina. Wood is in excellent condition with no cracks, just usual impressions and is slightly shy to metal. Fine action and a near mint bore. 30,000.00 - 50,000.00



540 - (A) WINCHESTER 1885 LOW WALL & GROUPING ATTRIBUTED TO PAWNEE BILL'S WIFE, MAY LILLE.
Manufacturer: Winchester
Model: 1885
Serial No. 18657
Caliber/Bore: .32 Rimfire
Barrel Length: 24"
FFL Status: Antique

Manufactured 1887. Shipped March 6th, 1888 with full octagon barrel, walnut stocks, plain trigger, sporting sights. Barrel is apleasing mix of blue and soft patina with razor sharp edges. Standard sporting sights. Frame colors have darkened. Walnut stocks are excellent, proud to metal, with rifle buttplate. Sharp rifling and fine action. The left side of the stock is adorned with a 1 - 3/4" x 4" engraved silver plaque that reads "PAWNEE BILL'S HISTORIC WILD WEST TO MISS MAY LILLIE MY STRAIGHT SHOOTER FROM G.W.L." (Gordon William Lillie 1860-1942). World renowned as "Pawnee Bill", he was recruited by Buffalo Bill Cody's Wild West Show in 1883. He met May Manning, a 15 year old Quaker girl in 1883 while in Philadelphia and they married on August 1st, 1886. May's urged him to create his own Wild West show and in 1888 he began touring the country as Pawnee Bill's Wild West, but they continued to appear as special guests on Buffalo Bill's show. He led a group of 4,000 in the Oklahoma Land Run on April 22nd, 1889. That same year his Wild West traveled the United States and Europe starring May Lillie as the champion horseback shot of the West. His show re-joined Bill Cody in 1908. May and Gordon settled in Pawnee, Oklahoma where they built a cabin in 1910. May managed the Lillie Buffalo Ranch, she also starred in the film "May Lillie: Queen of the Buffalo Ranch". May died on September 17th, 1936 as a result of injuries sustained while the couple was driving home from their 50th wedding anniversary on Taos, New Mexico. She was inducted into the cowboy Hall of Fame in 2011. This rifle comes with numerous supporting items; photographs and history, includes an original 1880's cabinet card of the couple, factory letter, letter of provenance dated June 16th, 1946 from Dr. Christian Meyers who attended to May from September 13th until she died and also took care of Gordon. This rifle was presented to Dr. Meyers by Gordon for his gratitude in his care of the couple. Dr. Meyers was mortally wounded at the Battle of Bestogne and his rifle inherited by his son, Christian Meyers, who wrote this letter. In addition to this album or provenance is a brass tacked leather jewelry box with "MAY LILLIE" brass plaque. Inside is a 1896 Buffalo Bill Wild West Show flag with "MAY LILLIE" stenciled on front, a Pawnee Bill hand signed Wild West pocket card, a brass keyplate stamped "MAY LILLIE BBWWS" with back stamped "MAY L." with a key for the box, and a pair of beautiful beadwork woman's leather Western gloves. A lovely ensemble from a famous woman of the West. 25,000.00 - 30,000.00

The .38-40 in the 1885 High Wall Model is virtually never seen, combine the caliber rarity with the outstanding all original condition and you have a real gem. Barrel retains approximately 98% original factory blue with razor sharp edges and legends. The case colors are nearly 100% intact with the exception of the bottom of the lever. Colors and extremely bright and vivid. Has a special order set trigger. Wood is excellent and proud to metal with very few minor indentations. Fine action and near mint bore. It would be virtually impossible to find a better condition .38-40 High Wall. An outstanding example. 4,000.00 - 6,000.00

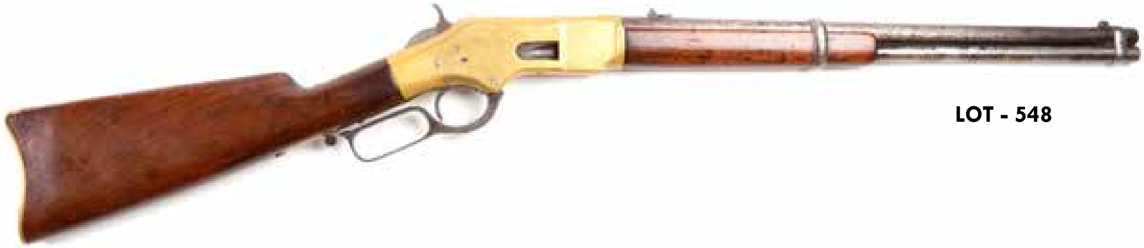
547 - (A) WINCHESTER MODEL 1866 SADDLE RING CARBINE.
Manufacturer: Winchester
Model: 1866
Serial No. 45296
Caliber/Bore: .44 RF
Barrel Length: 20”
FFL Status: Antique

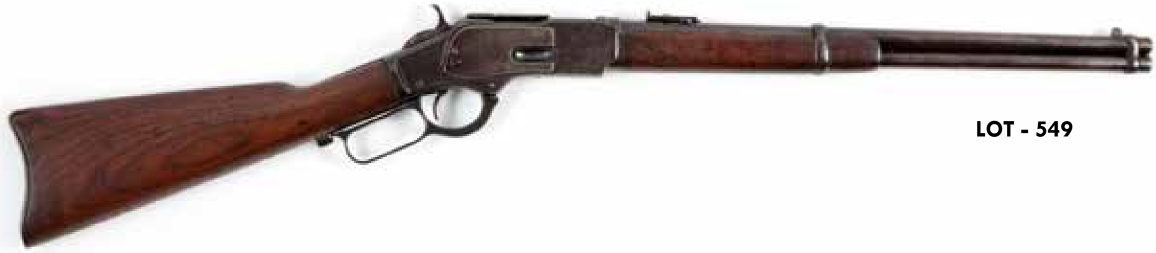
Manufactured 1870-71. Features full round barrel, full magazine, two barrel bands, front sight is part of the barrel band, two leaf folding rear sight, brass frame, walnut stocks, brass carbine butt, and saddle ring and stud. The all steel parts are a grey-brown patina with usual age freckling and sharp barrel legends. Brass frame is excellent and has never been touched, but previous owner has scratched his name into the bottom of lifter “MOROBINSON”. A few of the screws show severe distortion. Wood is good with open grain and a repaired crack on right wrist. Loading gate still has 30% original blue. Strong, visible rifling with usual black powder abrasion. Overall, has a great Western look with that attic-found untouched eye-appeal. 3,500.00 - 4,500.00



LOT - 548

548 - (A) WINCHESTER MODEL 1866 SADDLE RING CARBINE.
Manufacturer: Winchester
Model: 1866
Serial No. 155081
Caliber/Bore: .44 RF
Barrel Length: 20”
FFL Status: Antique

Manufactured 1881. This late production carbine features full round barrel, full magazine, double barrel bands, post front sight, two leaf folding rear sight, brass frame, walnut stock, saddle ring and stud, and brass carbine buttplate. Barrel tube and bands are basically grey-brown patina; have been cleaned with scattered pitting, address partially readable. Brass was cleaned at some time. There is pitting on the bolt, lever, trigger and loading gate. A few replaced screws. Wood has been refinished. Stock has a repaired piece on left side at wrist. Very good action. Visible rifling. 3,000.00 - 4,500.00



LOT - 549

549 - (A) WINCHESTER MODEL 1873 SADDLE RING CARBINE.
Manufacturer: Winchester
Model: 1873
Serial No. 478241
Caliber/Bore: .38-40 WCF
Barrel Length: 20”
FFL Status: Antique

Manufactured 1894. The offered Model 1873 has a handsome, homogeneous eye-appeal. Standard features include full magazine, double bands, post front sight, folding ladder rear sight, blued finish, walnut stock, saddle ring and stud, and carbine butt. All metal surfaces are a clean, smooth rich patina with razor sharp legends. Buttstock is a bit shy at wrist and has been freshened up. Forearm is proud to metal. Fine action. Very strong rifling. If you are looking for a nice, clean, classic ‘73 carbine you should be very pleased with this example. 2,750.00 - 3,500.00

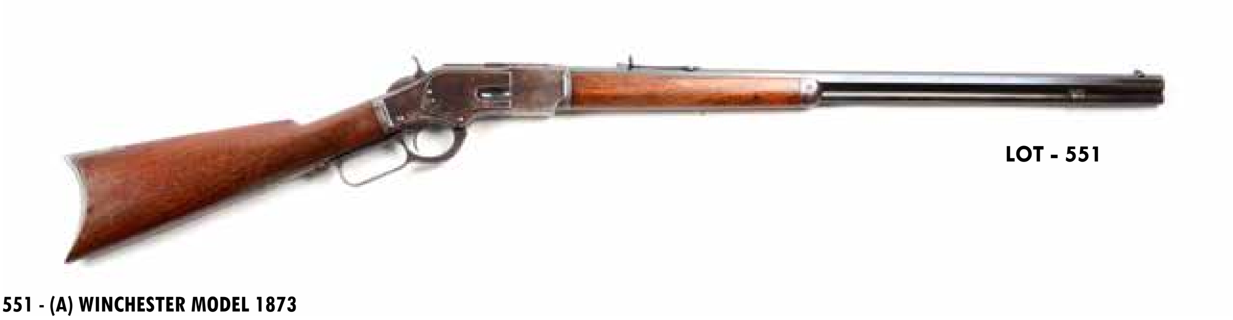
550 - (A) WINCHESTER MODEL 1895 LEVER ACTION RIFLE.

Manufacturer: Winchester
Model: 1895
Serial No. 5073
Caliber/Bore: .30 Krag
Barrel Length: 28”
FFL Status: Antique

Manufactured 1896. Given that the first 5,000 were Flatsides, this is a very early scalloped framed example in the antique serial range. Standard model all the way. Barrel retains 90% original factory blue finish with some storage marks on the right side of barrel. Left side of frame and magazine retain approximately 90% original blue and approximately 80% on right side with some flaking. Lever is basically brown patina. Fire blue extractor. Generous case colors on hammer. Wood is excellent with no cracks and fine finish. Strong bore and action. 1,500.00 - 2,500.00



LOT - 551

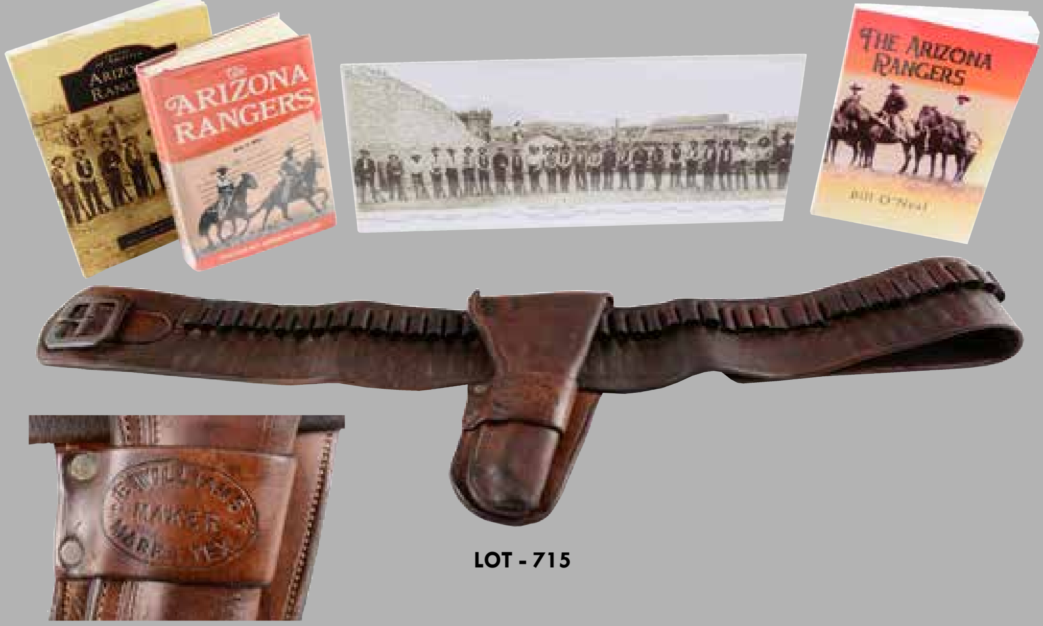
715 - MAKER MARKED & DOCUMENTED ARIZONA RANGER MONEY BELT & HOLSTER.



LOT - 715

Handed down through the family of William Sanders Peterson, who was a private with the famous Arizona Rangers from 1901-1905. The holster passed to his daughter Mary Ethel Peterson Kenisell in 1929, after her death in 1964 and the rig was passed on to her daughter Emma Kenisell Benner, and finally to John A. Benner, great-grandson of William Paterson. The original marked money belt was made by Kelly & Harrison of Silver City, New Mexico; and during its lifetime had the bottom set of loops removed, as the double set made it difficult to remove cartridges from the belt. There is a picture of Peterson wearing this belt before the second row of loops was removed, taken during the mining strike of 1903, while Peterson was assigned to the protection of Teddy Roosevelt. The holster is a single loop, border tooled, for 4 - 3/4” or 5 - 1/2” Colt 1873 Single Action Army or Bisley. There is a maker stamp in the oval “E WILLIAMS MAKER MARFA TEX”. Peterson is listed as having served from 1902-1905 in the Arizona Territory. This lot comes with three books on the Arizona Rangers, in which Peterson is photographed several times. His occupation is listed as cowboy and his place of birth is Texas. The Arizona Rangers were modeled after the Texas Rangers, were formed 1901 and disbanded in 1909. They were an elite well-trained agency, mounted on quality horses and well equipped to deal with the infestation of outlaws in the territory of Arizona along the Mexican border. In addition to outlaws, the rangers were called on to deal with several minor strikes. The Rangers recruited from old cowboys and the ranks of Teddy Roosevelt’s Rough Riders. Raids and murders were so common that they were scarcely noted and no livestock was safe. The Rangers essentially put an end to that, and to their credit it is estimated that nine out of ten men they went after were brought back dead or alive. Several books have been written on collecting rigs of the Wild West and these marked holsters and belts have skyrocketed in price and demand, but seldom can a rig be identified to a distinct personage, especially someone so illustrious as an Arizona ranger. This rig comes with signed personal history from the family, a 1903 picture and three books all titled the same: “The Arizona Rangers” by Joe Miller, Bill O’Niell, and M. David DeSoucy. The rig: the money belt is stamped “30-30” on the billet with the California clip point buckle. The cartridge loops have been replaced with a single row for .45 caliber pistol cartridge. The opposite billet has the maker stamp. Total length of belt is 43”. It is in excellent condition, intact, and billets have not been adjusted. The holster is also in excellent condition; the maker marks are extremely strong, with the majority of stitching intact and just a small 1/2” area of lost stitching. It is a beautiful double marked rig, especially collectable due to it detailed history and family provenance, and the best of its type that we have ever offered. A true piece of American history. 3,000.00 - 4,000.00

716 - LOT OF 37: MICROFILM PLATES - ZORK HARDWARE, EL PASO, TEXAS PERSONAL GUN SALES 1902-1918 WITH READER.

LOT - 716

Have you ever wondered when you get a Smith & Wesson or a Colt that went to Zork Hardware who the ultimate end buyer was? Tens of thousands of guns were shipped to Zork Hardware from the time it was established in El Paso in 1887. These records list the gun, serial number, buyer and date for individual purchases of Colts, Smiths, Winchesters, Marlins, Savages, Stevens, Remingtons, Lugers, Webleys, Iver Johnson, L.C. Smith, Mauser Combination Guns, et al. The records start in 1902 and run through 1918. Each record page is listed by maker, model, caliber, buyer, and date; i.e. Colt Bisley 4 - 3/4” .32-20, and is very easy to go right to your model and year and look up the specific record for any particular gun. There are 36 individual plates with approximately 60 pages of entries per page; approximately 2,160 pages total with average guns sales per page of ten to 20 with an average of 20,000 to 40,000 entries. 1902 - three plates, 180 pages 1904 - four plates, 240 pages 1905 - three plates, 180 pages 1906 - three plates, 180 pages 1906/07 - six plates, 360 pages 1911-12 - two plates, 120 pages 1913-14 - two plates, 120 pages 1915 - two plates, 120 pages 1917-18 - 11 plates, 660 pages 36 plates total, all other numbers approximate. One has only to verify one historic gun sold out of this historic destination, such as a personality, historical, sheriff, outlaw, etc., which will more than pay for the cost of this lot. The historical data within would be a fascinating study itself. This lot comes with an original microfilm reader in working condition and we replaced it with a new light bulb. This information is invaluable to Texas firearms enthusiasts.

721 - 1926-27 WINNETKA, ILLINOIS RIFLE CLUB TROPHY WITH INDIAN & RIFLES.
It is probably hard to believe for anyone familiar with the affluent Chicago North Shore, that the Chicago suburb of Winnetka has ever had a firearm within its city limits, but in 1926 when a cooler and more logical thought process existed, Winnetka had a rifle club. The original newspaper article shows a picture of the trophy as won by Winnetka chief of police W.M. Pederson in 1927 at the historic Fort Sheridan. The trophy comes with the article as well as a business card of W.M. Pederson. This trophy was won in 1926 by Kenneth Beall and was never awarded after 1927. Features a black enamel wood base that measures 5” tall with a 6” trophy base and a silver plaque inscribed with the two winners. The trophy is spectacular, silver plated, and stands 19” tall. Features a column with a 5” Indian chief in full headdress and the base is attached with three Winchester pump action .22 rifles. Lovely original patina and basically free of dents. No evidence of repair. This trophy was once owned by author Lawrence Shelton who was going to use it in on of his books. 600.00 - 800.00

781 - BIRCH BARK NATIVE AMERICAN MINIATURE CANOE.
53" L. Offered is an antique hand-built miniature birch bark Native American canoe that measures 53" in length and 7 - 3/4" at its widest area. It was hand-built around a solid wood frame, assembled with brads that show lots of age. The wooden slats, also homemade, are typical in their inconsistency. The birch body is in excellent condition with a minor repair on one end that has come loose; otherwise excellent. This is a beautiful, early hand-made canoe; probably turn of the century. 400.00 - 800.00

782 - G.C. WENTWORTH WESTERN BRONZE.
13-1/4" x 13-1/4". This bronze sculpted by G.C. "Gerry" Wentworth (American, 1932-1985) and was probably carved from wax. The highly dynamic scene portrayed is that of a Native American horseman with a tomahawk doing battle with a frontiersman armed with a rifle at the edge of a creek. The artist signed and numbered this piece "33". Also in the base is stamped "© LARRY F BUSCH/1975", who probably executed the bronze work at the foundry. The bronze has a rich brown patina and the fine piece of the horse's rein is still intact. It has been mounted on a 1" thick wood plinth. (Good) 1,500.00 - 2,000.00

Manufacturer: Winchester
Model: Lee Straight Pull
Serial No. 18511
Caliber/Bore: 6mm Lee
Barrel Length: 28"
FFL Status: Curio & Relic

This was the first high power small bore rifle ever used by the military. Approximately 15,000 were sold to the United States Navy. This rifle has become favorite to collectors due to the fact that it was the model that was on board the battleship Maine when it was sunk during the Spanish American War. It is a magazine fed, bolt action, U.S. Navy marked and inspected rifle with typical military profile and parts to include military folding rear sight, short 11" hand guard and full length walnut stock. It is the second contract stock with finger grooves. These rifles were inspected by John Jordan, whose name can be found stamped on the chamber. This rifle is fitted with sling eyes; missing one swivel. The buttplate is a replacement; pressed steel, similar to a Mauser. Stock is excellent with the usual dings and a 2" closed crack on top of wrist, while balance is basically a blue-brown patina. Fine action with a strong clean bore. A very early example of a U.S. Navy issued rifle which are extremely desirable and were made in very small numbers.

Serial No. 310254
Barrel Length: 29 - 1/2”
FFL Status: Curio & Relic
Gauge: 12
Chamber: 2 - 3/4”
Choke: Interchangeable

Model 37T. This was a very expensive gun in its day. Price had risen to almost $100 in 1942. As a result, very few were sold. After the war, the 37T was listed as the target grade. Given the serial number of this gun is below 509699, this is a trap grade and not a target grade but seems to be a mix or a transition gun. The gun features a full vent rib, blued finish, retains 98% of the reapplied finish, beautiful checkered walnut stocks with original Ithaca recoil pad. Barrel started as full choked but has been tapped to use thread in choke tubes; includes one Briley S-26 thin wall .708” choke. This is the first example of this war era trap gun that we have ever seen and it is in beautiful condition. 600.00 - 900.00

Twin blued shotgun barrels with solid matte rib, thumb engaged rear sight. Tops of barrels marked “KRUPP” near breeches. Blued round rifle barrel mounted below, with sling swivel mount. Casehardened scalloped boxlock actions with fences, cocking indicators, thumb barrel selectors, double set triggers, and switch safety on left side behind action. Casehardened actions engraved on all sides with game scenes. Plain walnut pistol grip buttstock, with carved cheekpiece on left side, checkered panels on each side of wrist, and hard black maker’s buttplate. Bottom has spring-activated steel shell compartment with engraved bird scene, shaped horn triggerguard. Checkered splintered forearm, with Deeley release. Good condition, as refinished. Barrels retain almost all of reapplied blue finish, sight does not engage any longer when barrel is selected. Action is very good with some reapplied bright case colors and others turned to brown, a few minor marks, opener bent upward and has been repaired. Stock good with some scattered marks from use and an old repair on both sides of wrist, some chipping at tip of forearm. This is a nice, high quality German Drilling and would be a great one to shoot. 800.00 - 1,200.00

1083 - (C) L.C. SMITH IDEAL GRADE SIDE LOCK SHOTGUN.
Manufacturer: L.C. Smith
Model: Ideal Grade
Serial No. 14601
Barrel Length: 30”
FFL Status: Curio & Relic
Gauge: 12
Length of Pull: 14”
Chamber: 2 - 3/4”
Choke: Full Modified

Manufactured 1919. Barrels are stamped “LC SMITH 12 GA IDEAL FULTON NEW YORK”. The Ideal Grade was introduced in 1913 and continued production until 1950. Frame and plates are engraved with a simple oak leaf relief design and color case hardened. It was a quality O gun and the most reasonably priced hand engraved L.C. Smith and cost $37 when introduced in 1913. It competed directly with the Parker VH Grade and had final retail price in 1950 of $138. The barrels sport standard ejectors with a raised matte rib, single bead, and have been beautifully restored to near new condition with mirror bores. The engraved trigger guard retains approximately 70% original blue. Frame retains approximately 70% original case colors, some brilliant. Walnut stocks are excellent, proud to metal and have razor sharp checkering with black composite pistol grip cap and buttplate. Has a splinter forearm with ebony tip and L.C. Smith release; checkering does show some wear. Lock-up is tight as new. 1,500.00 - 2,000.00

1114 - (A) SPENCER REPEATING U.S. CONTRACT SLIDE ACTION SHOTGUN.
Manufacturer: Spencer Repeating Arms
Model: 1886
Serial No. 1876
Barrel Length: 28-3/4"
FFL Status: Antique
Gauge: 12
Chamber: 2-5/8"
Choke: Cylinder

On April 13, 1886, 240 shotguns were ordered by the U.S. Army Ordnance department and were delivered on May 15th. On December 5, 1887, 10 additional shotguns were ordered and were delivered on January 24th. According to Roy Marcot, in his book entitled "Spencer Repeating Firearms" on page 277 – "On December 24, 1887 (This is prior to the ten shotguns shipped 12/5/87 and delivered 1/24/88) another Ordnance board met at the Springfield Army and tested ten recently delivered Spencer shotguns. (These would appear to be from the April 13, 1886 shipment. The book lists these ten shotguns as being delivered on 1/24/88 but we think it was on 12/24/87 and the record had a date typo and this shotgun is from the December 24th order of ten guns). Minor problems were noticed… but ten guns were accepted. Serial numbers… 1876…". This shotgun (Serial No. 1876) is one of the ten documented shotguns accepted by the Ordnance Department. According to the book, these shotguns were used for guarding prisoners. It's interesting that this model is referred to as the Model 1887 because these shotguns were delivered in 1886. This is a secondary U.S. government accepted Martial arm. This shotgun is a standard Model 1887 with round barrel, single bead, slide action, and walnut stocks. The barrel is stamped "Spencer Arms Co. Windsor CT. U.S.A. P.A.T. A.P.R. 1882". Fine Damascus pattern. The forend on this weapon is a replacement. The butt stock has been refinished with some hand checkering and a military eagle button set into the left side of the stock. Metal is basically patina. Given that this shotgun is one of only ten known U.S. accepted weapons, it is so rare that the likelihood of seeing another is quite slim and for a collector of martial arms, finding a surviving example of this shotgun may be impossible. Includes a copy of the book "SPENCER REPEATING FIREARMS" by ROY MARCOT with chapter 15 dedicated to the Spencer Slide Action Shotgun.

Manufacturer: A. Waters
Model: 1836
Caliber/Bore: .54 Smoothbore
Barrel Length: 8 - 1/2”
FFL Status: Antique

The Model 1836 was the last U.S. martial pistol made using the flintlock mechanism. About 41,000 were manufactured between 1836 and 1844 by Asa Waters and Robert Johnson. This was the standard issue pistol for the Mexican War and many were converted to percussion for later use during the American Civil War. Round smoothbore steel barrel marked “U.S. / LS / P” near breech, small brass half moon front sight and oval rear sight on tang. Flat beveled lockplate with rounded tail section, stamped in the center with eagles head and “A. WATERS / MILBURY, MS. / 1840”, brass pan and reinforced cock. Standard Model 1836 steel furniture and replaced swivel type ramrod with button plunger. Triggerguard and sideplate stamped with small inspector’s marks. Plain walnut half-stock with two inspectors cartouches stamped behind sideplate, on left side. Stamped “LS” for Luther Sage and “M.P.L.” for Mann P. Lomax. Very good condition, all steel components retain a heavy brown patina with some freckling and light scattered marks from use. Lock is in original flintlock configuration, excellent markings, cock screw is replaced. Stock very good with a few scattered marks from use, cartouches excellent. This model is considered by many collectors to be the best made, best looking, and best performing flintlock martial pistol produced.

1128 - (A) SYSTEME LEFAUCHEAUX PINFIRE PEPPERBOX PISTOL.
Manufacturer: Belgium
Model: Pinfire Pepperbox
Serial No. 5559
Caliber/Bore: 7mm
Barrel Length: 1 - 3/4”
FFL Status: Antique

These scarce arms are a featured chapter in Chris Curtis’s book the “Lefaucheaux Style Revolvers”. Dating from the mid-18th century, the little multi-shot pocket cannons were easy to conceal and packed a punch. This example is not marked where it can be seen, no serial number, maker or inspection stamps. A nearly identical shaped example can be found on page 252 in the book. The book example is engraved but the shape of the gun itself is almost a mirror image. Another can be seen on page 249. This gun is a six shot 7mm with an 1-3/4” cylinder and no barrel. “Arendt Brevette” is stamped on front cylinder axle pin. Light engraving on frame and cylinder. Dark walnut grips. Overall grey patina. Folding trigger and indexes fine.

1141 - (A) COLT MODEL 1877 DOUBLE ACTION (THUNDERER) REVOLVER.

Manufacturer: Colt
Model: 1877 Thunderer
Serial No. 52894
Caliber/Bore: .41 LC
Barrel Length: 4 - 1/2”
FFL Status: Antique

Manufactured 1885. This blue and case color Thunderer was the same model that Billy the Kid was reported to carry. Designed by William Masson. This is the first double action that Colt put into production. It was made to compete with the double action revolvers coming out of Europe at that time. The action on this model is noted for its weakness. This one does not work correctly in either double or single action. Gun retains approximately 50% of the original blue and 5% of the case color with the remainder turning to patina. Excellent two piece hard rubber grips. Fair bore. 400.00 - 600.00

Manufacturer: Gillespie
Model: Deringer
Caliber/Bore: .41 rifled
Barrel Length: 2-3/4”
FFL Status: Antique

This well-made and quality pistol is a close copy of one of the famous Philadelphia Deringer pistols, copied by Gillespie, one of the countless makers that imitated the Deringer. Gillespie is originally listed as a member of the Wolf & Gillespie firm in 1848, located at 193 Pearl St in New York City. The firm is listed as an importer of guns and pistols until 1858, when he becomes a “hardware merchant”. An identical example can be found on pages 104-105 of “Volume I: The Deringer in America” by R.L. Wilson and L.D. Eberhart. Faetures a rounded rifled steel barrel with tapered top flat stamped “CAST STEEL”, patent breech engraved with scrolls and stamped “GILLESPIE/WARRANTED” on top. Small front and rear sights. Flat back action percussion lock with scroll engraving and stamped “GILLESPIE” behind hammer. Partially figured Deringer style varnished walnut stock with checkered panels around back of grip. Mounted with engraved steel triggerguard and German silver Deringer type furniture. Very good condition, overall. Steel components retain a light grey patina and have excellent markings, showing little wear, hammer functions an mechanism is tight. Bore has deep lands and grooves with some light black powder corrosion. Stock very good, retaining much of original finish, some flattening and wear on left side of grip and some edges worn slightly. German silver mounts retain a mellow patina. 1,000.00 - 1,500.00

Manufacturer: Hacker Martin
Model: Flintlock
Caliber/Bore: .36 Rifled
Barrel Length: 9 - 1/2”
FFL Status: Antique

Hacker Martin was born in 1895 and lived until 1970 near Grays Station, Tennessee. He is credited for continuing the traditional method of making Kentucky rifles and pistols completely by hand, using tools that he made himself. He learned the art of Appalachian gunsmithing from his grandfather and made his first gun stock at age 14 out of a pillar from his grandfather’s porch. He was recognized by the Smithsonian for continuing the tradition of muzzle loading rifle making. This example features a rifled two-stage steel barrel stamped “HACKER MARTIN” on the top flat. Diminutive front and rear sights. Flat handmade flintlock mechanism and lockplate. Hand crafted and filed plain brass furniture includes buttcap, trigger guard, full sideplate, ramrod ferrules and nosecap. Full length partially figured stock with two silver inlays on each side of forend and an oval escutcheon on wrist. Wooden ramrod. Very good condition, barrel retains a dark grey patina with some edge wear and scattered marks. Lock also retains a dark patina with some lighter areas, functions well. Stock very good with a few minor scattered marks. Brass retains a nice patina. This is a nice pistol made completely by hand in the cruder Appalachian style by a famous late maker. 800.00 - 1,200.00

1182 - (A) PERIOD COPY OF PHILADELPHIA DERINGER PERCUSSION PISTOL MARKED "DERINGER".
Manufacturer: Unknown
Model: Deringer
Caliber/Bore: .38 Rifled
Barrel Length: 2/7/2016
FFL Status: Antique

The maker of this period counterfeit "Deringer" pistol is unknown. Due to its popularity, many people copied and made counterfeit pistols marked "Deringer". For a nearly identical example by unknown maker, see page 122 of Volume I of "The Deringer in America: The Percussion Period" by R.L. Wilson and L.D. Eberhart. Very similar to an authentic Philadelphia Deringer in most respects. Round rifled steel barrel with top flat and patent breech engraved with scrolls, small sights on top. Back action percussion lock with engraved scrolls and stamped "DERINGER", hammer engraved en suite. Walnut stock of familiar form, checkered panels around grip, and plain German silver Deringer style furniture. Triggerguard engraved with scrolls. Very good overall, barrel and lock retain a light grey patina and show very little wear, bore is very good. Stock good, but checkering is nearly worn away and edges show some wear. Furniture retains a mellow unpolished patina. This is a very interesting and particularly nice period imitation of the famous Deringer. 1,000.00 - 1,500.00

1183 - (A) UNUSUAL UNMARKED DERINGER STYLE PERCUSSION PISTOL.
Manufacturer: Unknown
Model: Deringer
Caliber/Bore: .45 Rifled
Barrel Length: 3-3/8"

This is a well-made percussion single shot in the style of Deringer, although it is completely unmarked and the maker is not known. Copying the popular Deringer pistol was a lucrative undertaking in the first half of the 19th century. This example features a round rifled steel barrel with top flat and patent breech. Back action percussion lock with scroll engraving and fancy pierced and engraved hammer. Nearly full length walnut stock of familiar Deringer form, with pewter end cap and replaced steel ramrod. Engraved German silver furniture with florals on triggerguard bow and butt cap. Very good condition, overall, with steel components retaining an even light grey patina, barrel tang is cracked through at tang screw, bore shows some wear. Stock very good with some light wear and scattered marks. A very interesting and possibly unique Deringer style pistol. 900.00 - 1,100.00

Manufacturer: Dennis Griffith
Model: Half Stock Percussion
Caliber/Bore: .36 Rifled
Barrel Length: 37”
FFL Status: Antique

This well-made rifle was built by Dennis L. Griffith of Robesonia, Berks County, Pennsylvania. This rifle won second place in 2017 at Dixon’s Gun Fair in Kempton, Pennsylvania. The rifle features a brown octagonal rifled barrel with solid rib mounted below, silver front blade sight and notched rear sight. Barrel features a gold band at the breech and is signed on the top flat “D / G”. It is a Douglas barrel. William Robins percussion lock is polished bright. The rifle features a detailed, curled trigger and has brass furniture including a Berks County trigger guard. Oil finished cherry half stock of familiar Berks County form inlaid with a silver Moravian star on the left side above the carved cheek piece, the center has a diamond shaped piece of ivory inlaid into it. The rifle is in as new condition. It is easy to see why this rifle was an award-winning piece with all of the wood proud to metal and great care taken to fit and finish alike throughout. Half stock rifles of this quality are seldom seen. This would make a great small game hunting black powder rifle. 500.00 - 800.00

1205 - (A) J. DICKERT HALF STOCK PERCUSSION RIFLE.
Manufacturer: J. Dickert
Model: Half Stock Percussion
Caliber/Bore: .44 Rifled
Barrel Length: 32 - 1/2”
FFL Status: Antique

J. Dickert was one of the most renowned Lancaster County, Pennsylvania long rifle makers around the time of the Revolutionary War. At some time, somebody brought this barrel to a custom gunmaker to have it modernized utilizing the original signed barrel, incorporating into a newer and more contemporary half stock sporterized design. A Partridge percussion lock was installed, a new stock was made that features pewter forend tip, brass trigger guard and rifle buttplate, brass patchbox, rollover cheek piece with and inset Moravian star possibly from original rifle. Has a nickel thumbplate on wrist. Metal is basically a deep rich dark chocolate brown patina. Stock is excellent with rich finish and no cracks or repairs, just a couple of chips around lockplate barely worth mentioning. Extremely strong rifling. Fine working order, albeit hammer spring tension could be attended to. Fine 18th century rifle derived from a famous Lancaster, Pennsylvania gunsmith. 550.00 - 750.00

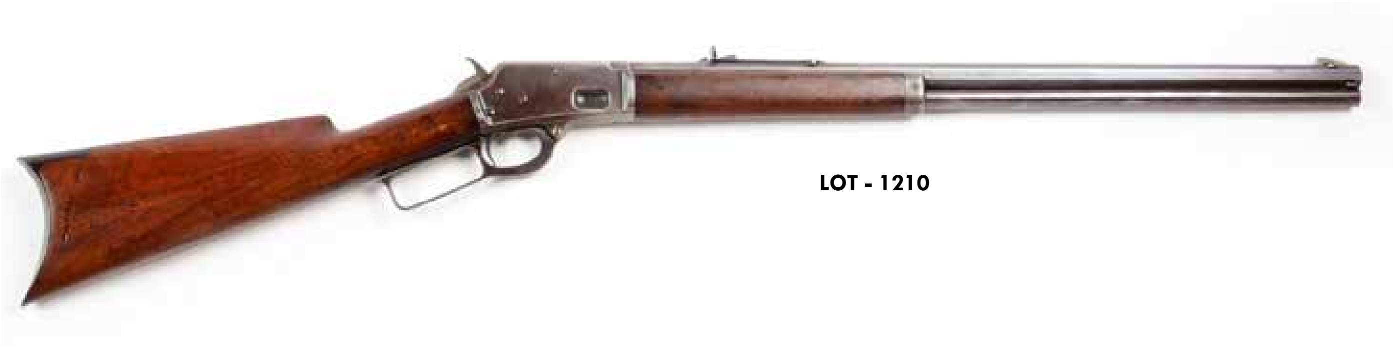
Standard steel Model 1777 furniture, most components with inspector marks. Walnut full length stock with inletted cheekpiece on left side of comb and large “11” rack number deeply branded into left side of butt. Complete with triangular steel socket bayonet with French markings at top of blade. All steel components retain a spotted brown patina, some corrosion at breech. Lock is in original flintlock configuration and markings are excellent. Stock has been refinished and has some scattered marks from use and edge wear, ramrod is absent. Bayonet retains a grey patina with some scattered freckling and marks. A very nice and original example made at the Versailles factory. These muskets are quite scarce. 1,200.00 - 1,800.00

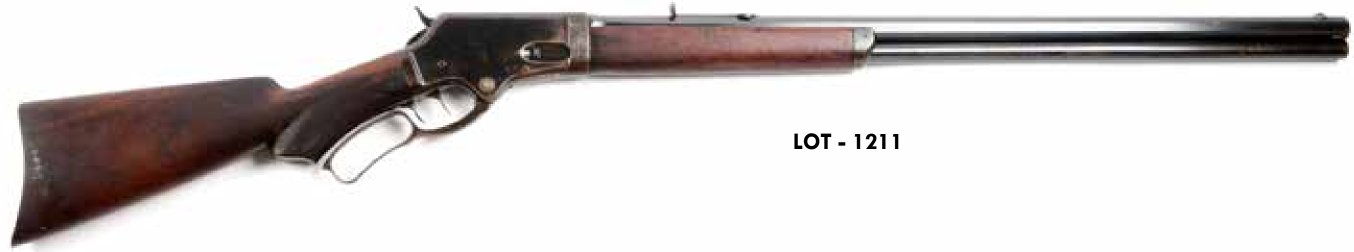


LOT - 1210

1210 - (A) MARLIN MODEL 1888 LEVER ACTION RIFLE.

Manufacturer: Marlin
Model: 1889
Serial No. 22206
Caliber/Bore: .38-40 Winchester
Barrel Length: 24”
FFL Status: Antique

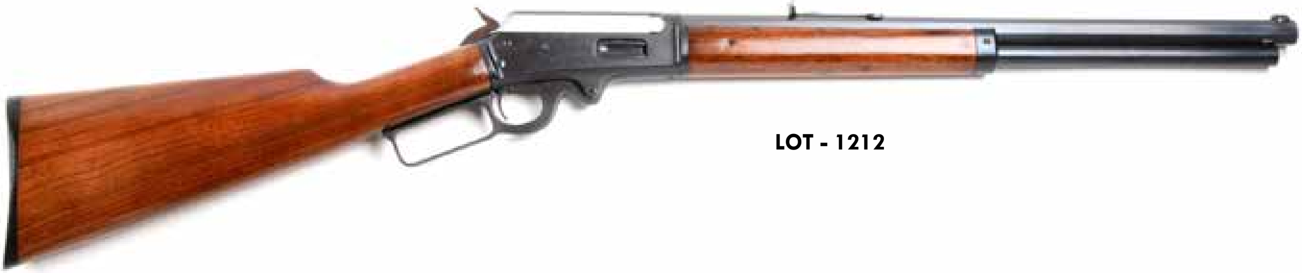
Manufactured 1888. One of the scarcest of all Marlin lever action rifles, it was only in production for one year, being replaced with the Model 1889. Total production of this model was a scant 4,814 rifles in all calibers, barrel lengths and types. Featured a short throw top eject action, blued finish; case colored hammer, lever and buttplate; with plain walnut stocks and rifle butt. It was the second Marlin lever action rifle after the Model 1881. A total of 1,776 rifles were manufactured in .38-40. This rifle remains in lovely untouched condition. The loading gate retains approximately 70% original blue. Balance of all metal is a smooth, pleasing blue-brown patina. Features knifeblade front sight and sporting rear. Sharp legends. Excellent walnut stocks are proud to metal with beautiful finish and very few minor dings. Strong, clean barrel and fine action. Has simply a lovely plummed patina devoid of any major scarring or obtrusive damage. 1,500.00 - 2,500.00



LOT - 1211

1211 - (A) DELUXE MARLIN MODEL 1881 LEVER ACTION RIFLE.
Manufacturer: Marlin
Model: 1893
Serial No. 13813
Caliber/Bore: .45 Gov't
Barrel Length: 28"
FFL Status: Antique

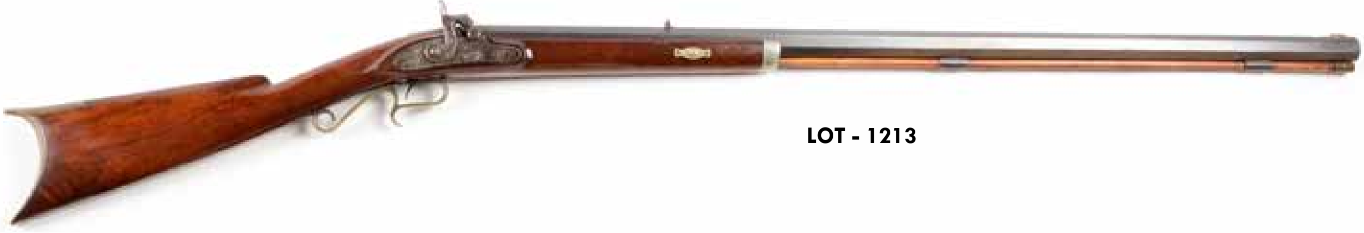
Manufactured 1886. Features full octagon barrel, full magazine, sporting sights, blued finish, case colored hammer and lever, and deluxe pistol grip checkered stock and forend. Barrel retains approximately 85% factory blue mixing with patina and some age freckling. Frame retains approximately 70% original factory high polish blue, balance turning brown patina. Walnut stocks really need some help to make this a nice, honest '81. The forearm checkering is almost completely gone with a couple of hairline cracks. Buttstock is missing a sliver at top right. Left wrist has been recheckered, but not finished and right side is almost worn smooth with a wood putty repair running the length of the right tang. No buttplate. Scarce double set triggers. Working. Rear sight needs an elevator. Strong rifling. If one could restore or replace the stock, this would be a fine '81 Deluxe. 450.00 - 750.00



LOT - 1212

1212 - (A) CUSTOM MARLIN MODEL 1893 LEVER ACTION SHORT RIFLE.
Manufacturer: Marlin
Model: 1893
Serial No. 103431
Caliber/Bore: .38 Bore
Barrel Length: 19"
FFL Status: Antique

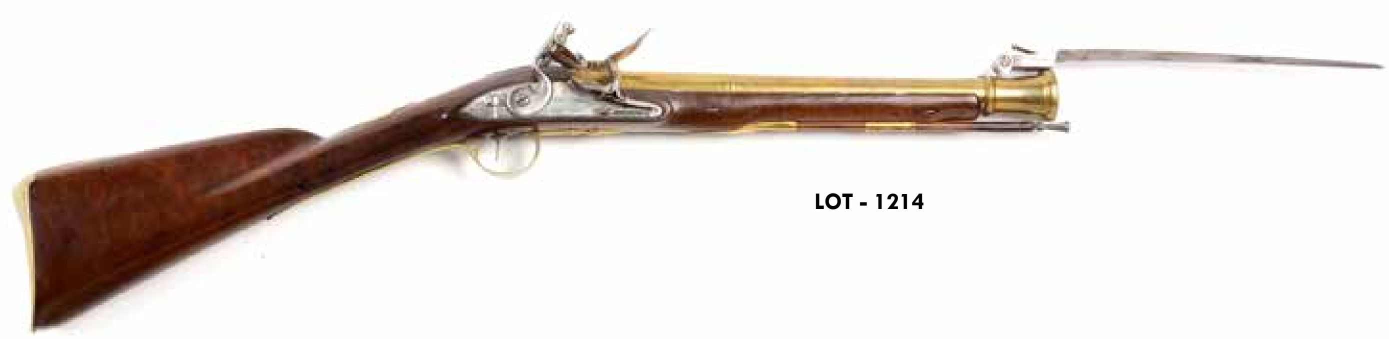
Frame manufactured 1894. Breech stamps at barrel have been restamped by hand. Has proper barrel address. Features a shortened barrel, full magazine, reblued to full blue finish, walnut stock and modern buttstock and buttplate. Left repair on forend. Caliber is not marked on barrel, appears to be a .38-55 but could be custom. This gun should be chamber cast before even thinking of shooting. 300.00 - 400.00



LOT - 1213

1213 - (A) HALF-STOCK PERCUSSION RIFLE.
Manufacturer: Missouri
Model: Percussion Half-Stock
Caliber/Bore: .49 Rifled
Barrel Length: 37 - 3/8"
FFL Status: Antique

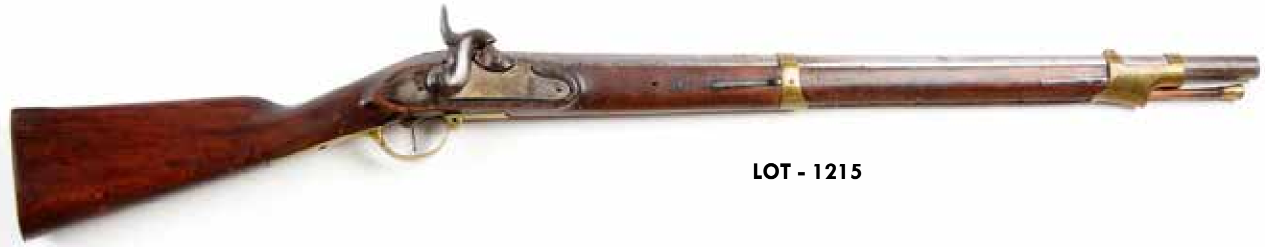
Probably circa 1860 and made around St. Louis, Missouri. Heavy rifled octagonal steel barrel with browned finish. Flat stamp-engraved percussion lockplate marked "R.B." in a banner. Plain brass furniture, pewter nose-cap and German silver barrel key escutcheons. Partially figured walnut half-stock with brass-tipped wooden ramrod. Very good condition, overall. Barrel retains much brown finish with one empty front sight dovetail behind front sight and some scattered light marks. Lock retains a light grey surface with some freckling. Brass furniture retains a mellow patina and stock is excellent with a few scattered marks from use and one minor chip around barrel tang. A very nice western half-stock rifle. 1,000.00 - 1,500.00



LOT - 1214

1214 - (A) ENGLISH BRASS BARRELED FLINTLOCK BLUNDERBUSS BY PARKES.
Manufacturer: Parkes
Model: Blunderbuss
Caliber/Bore: 1.20”
Barrel Length: 14”
FFL Status: Antique

Circa 1770 blunderbuss by well-known quality English gunsmith John Parkes. Brass three-stage blunderbuss barrel with flared muzzle and marked on left side of breech with Birmingham proofs. Tang and breech decorated with engraved scrolls. Top of barrel features a triangular steel spring bayonet of 10” with brass and steel release mounted on top of breech. Engraved flat steel lockplate decorated with scrolls and marked “PARKES” in center, half-cock sliding safety behind cock. Engraved brass furniture includes sideplate decorated with scrolls, triggerguard with acorn finial, vacant relief-cast wrist escutcheon, and an engraved buttplate tang. Partially figured walnut stock of typical 18th century English form with shell inlaid in silver wire around barrel tang. Steel-tipped wooden ramrod. Barrel and furniture have been cleaned and have some wear and light scattered marks. Ramrod ferrules with some minor denting and triggerguard has small area of loss on right side of bow. Lock has been cleaned and is in original flintlock configuration, now retains a polished surface with some light freckling and wear. Stock has scattered marks from use and a few period repairs and right side has a portion replaced, probably when manufactured. Much of silver inlay is now missing. A very attractive Revolutionary War period blunderbuss. 800.00 - 1,200.00



LOT - 1215

1215 - (A) PRUSSIAN PERCUSSION IMPORTED CIVIL WAR MUSKET.
Manufacturer: Potsdam
Model: Musket
Caliber/Bore: 0.71
Barrel Length: 38”
FFL Status: Antique

This musket was shortened during the period of use. Many of these Potsdam style Prussian muskets were used by both the Union and the Confederates during the Civil War. This example is dated 1831 at the breech and buttplate, which also has some unit or rack markings. The musket has brass furniture. Complete with brass-tipped wooden ramrod. Overall, shows scattered marks from use and light wear and corrosion. This is an interesting specimen that probably saw American use. 300.00 - 400.00

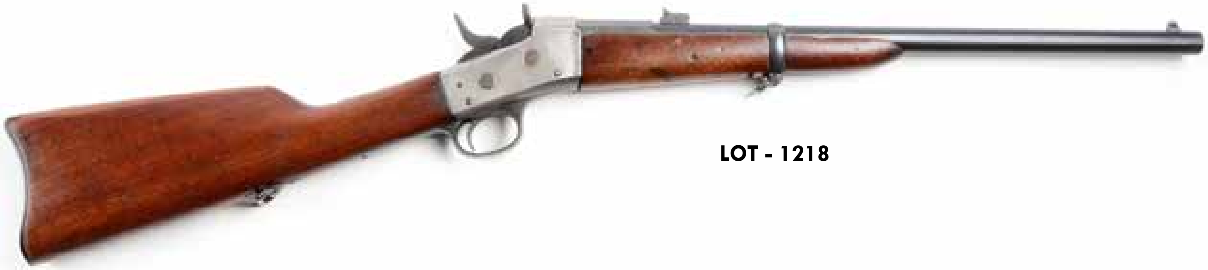
Manufacturer: R. Douglas
Model: Bench Rifle
Caliber/Bore: .50 Rifled
Barrel Length: 43 - 1/2”
FFL Status: Antique

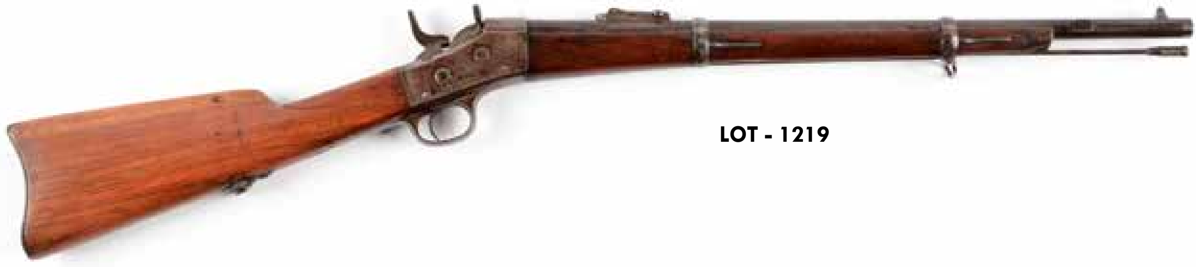
Heavy rifled octagonal barrel with hooded adjustable front sight and adjustable rear peep sight. Top flat marked “G.R. DOUGLAS .50 CAL.” Flat unmarked percussion lock and double set triggers. Plain brass furniture. Heavy plain maple stock with bench slot towards muzzle, on bottom. Barrel and lock retain a dark brown finish with some freckling on surface. Excellent shiny bore. Brass unpolished and stock has a few scattered marks from use. Would be a very accurate bench rifle! 700.00 - 1,000.00



LOT - 1218

1218 - (A) CUT DOWN ARGENTINE REMINGTON ROLLING BLOCK RIFLE.
Manufacturer: Remington
Model: 1879
Caliber/Bore: .43 Spanish
Barrel Length: 20 - 1/2”
FFL Status: Antique

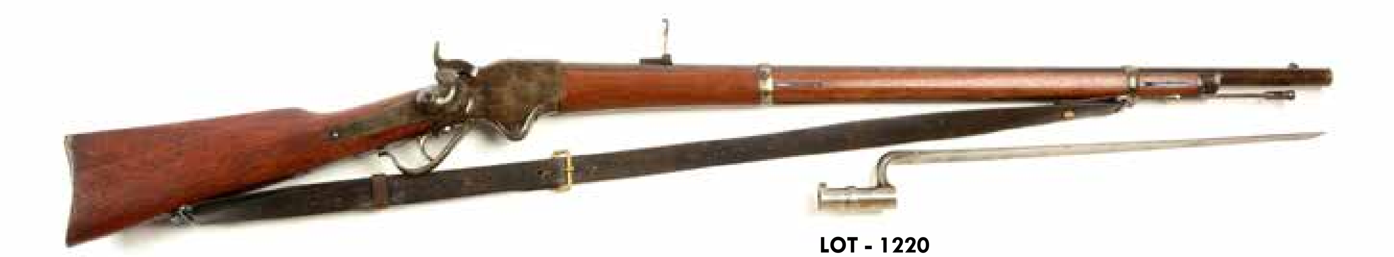
This is a Model 1879 rifle that has been converted to carbine with round barrel, military rear sight, single band, sling swivels, walnut stock and carbine butt. Retains 90% of the reapplied blue on barrel, trigger guard, bands and butt. Frame has been cleaned. Fine action and strong, clean bore. Should be a great shooter as is or a nice large frame for a custom rifle. 300.00 - 500.00



LOT - 1219

1219 - (A^) REMINGTON ROLLING BLOCK EGYPTIAN MUSKATOON.
Manufacturer: Remington
Model: Rolling Block
Caliber/Bore: .43 Spanish
Barrel Length: 23 - 1/2”
FFL Status: Antique

The tang on this muskatoon has the Remington patent dates and the only other markings are an inspection “R” on left side of barrel and frame, and a crown with star on rear barrel band. Based on the numbering on rear sight, we can surmise that this muskatoon was sold to Egypt. Features two barrel bands, forend cap, saber bayonet lug on right side, military post front sight and folding ladder military rear sight with Egyptian numbering. These rifles are discussed on page 135-144 in the book “Remington Rolling Block Military Rifles of the World” by Layman. The book states that the muskatoon on page 138 that only four of these have been examined. They list the muskatoon with 28” barrel and the carbine with 22 - 3/4” barrel. If this rifle was shortened from 28”, the front barrel band would have had to have been moved back along with forend cap, cleaning rod, and the front sight reset, none of which appears to have been done on this carbine, or this is simply another unseen variation as this rifle appears to be all original. All metal is a grey-brown patina. Forend wood is excellent and measures 16 - 1/2”. Buttstock is very good with chip out of left wrist. Very good bore and fine action. 300.00 - 600.00



LOT - 1220

1220 - (A) SPENCER MODEL 1865 LEVER ACTION RIFLE.
Manufacturer: Spencer
Model: 1865

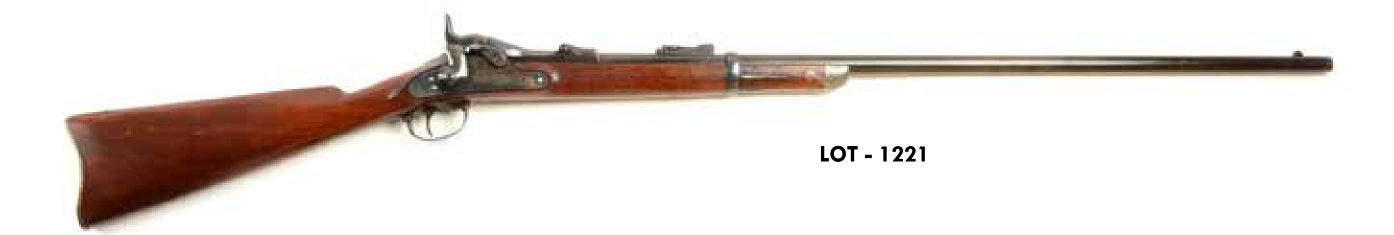
FFL Status: Antique

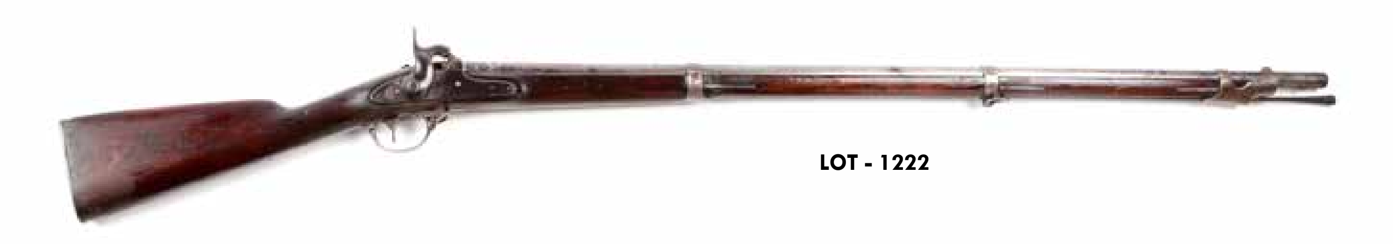
Approximately 1,000 rifles manufactured for the U.S. Government. Marked 1865 on frame. Features full round barrel, two barrel bands, cleaning rod, 3/4 length walnut forend, walnut buttstock, buttplate with loading tube, stabler cut-off, lever action and military sights. All metal is a smooth brown-grey patina. Barrel bands stamped “U”. No visible cartouche in wood. Stock has a couple of drying stress cracks on left and right sides, otherwise very good. Fine action. Strong, rifled bore. Comes with an original bayonet and period sling. 800.00 - 1,200.00



LOT - 1221

1221 - (A) SPORTERIZED SPRINGFIELD 1873 TRAPDOOR RIFLE.
Manufacturer: Springfield
Model: 1873
Serial No. 1145
Caliber/Bore: .45-70 Government
Barrel Length: 32 - 5/8”
FFL Status: Antique

The supply of surplus trapdoor rifles on the Western Frontier during the Indian wars were both abundant and inexpensive compared to a new Winchester, Marlin, Sharps, or Remington rifle. As such, numerous military rifles were converted by clever gunsmiths to a more adaptable sporting rifle capable of killing buffalo on a budget. The conversion from military to sporting variation was simply a matter of cutting the stock just forward of the rear barrel band retaining spring. A decorative pewter forend tip was fitted with a long tail and that was all. The remainder of the rifle exists just as it was made for the military with original 1873 rear sight and original front sight. The barrel is a combination of blue mixing with patina. The Springfield 1873 sideplate is a mix of blue and gun metal grey as is the hammer. Lock is dated “1873” and is a dull reapplied blue-black finish. Original stock is in excellent condition with a slight chip at left frame and refinished eliminating the military cartouche. Rifle still has US marked buttplate. Action is fine with a strong, clean bore. 500.00 - 800.00



LOT - 1222

1222 - (A) U.S. MODEL 1842 PERCUSSION MUSKET BY SPRINGFIELD.
Manufacturer: Springfied
Model: 1842
Caliber/Bore: .69 Smoothbore
Barrel Length: 42”
FFL Status: Antique

Springfield manufactured about 14,265 of these muskets in 1846 and a total of 165,970 between 1844 and 1855. This was the first regulation armory-pattern percussion musket and also the first arm fabricated at both national armories that had interchangeable parts. It features a round smoothbore steel barrel with a bayonet lug on the underside, near muzzle and stamped “V / P” over an eagle’s head on the left side of the breech. Flat percussion lockplate with beveled edges, center stamped with an eagle over “US” and tail stamped “SPRING / FIELD / 1846” vertically. Standard steel Model 1842 furniture, buttplate tang stamped “US” and many components marked with small “L” inspector’s mark. Full-length plain walnut stock stamped with two partially visible cartouches behind sideplate, on left side. Steel ramrod. All steel components retain a freckled grey patina and were cleaned some time ago, some scattered marks from use overall, breech with some percussion corrosion. Lock has a strong spring and retains a darker patina and has not been cleaned, very good markings. Stock shows edge wear and scattered marks from use, small chip missing between right side of breech and top of lockplate. This is a very historic model and many went on to be used in the Civil War. 500.00 - 800.00

1224 - (A) HIGH CONDITION U.S. SPRINGFIELD MODEL 1884 TRAPDOOR RIFLE.
Manufacturer: Springfield
Model: 1884
Serial No. 446077
Caliber/Bore: .45-70
Barrel Length: 32 - 5/8"
FFL Status: Antique

It is obvious by the condition that this rifle saw very little, if any, use. Breech block and tang retain the majority of their case colors. 85% original blue on hammer, latch, sideplate. 80% original blue on trigger guard. Lower tang thinning. 90% bright blue on both bands and forend tip. 95% blue on barrel. Features 1884 rear sight. Ramrod swivels on front band and trigger guard. Even buttplate has 60% original blue. The full length walnut stock is excellent to near mint, with a few minor bumps and an excellent "S.W.P." Sam Porter 1889 cartouche. Action is like new. Strong, near mint bore. Bands and buttplate have "U.S." stamp. Even the ramrod has most of its original blue. Barrel shows muzzle wear and some storage scratches on left side forward of tip. Accompanied by a blued "U.S." marked bayonet and metal scabbard in excellent to near mint condition as well. A very nice example. 1,000.00 - 1,500.00

1250 - (A) 1ST YEAR PRODUCTION WINCHESTER MODEL 1894 TAKEDOWN LEVER ACTION RIFLE.
Manufacturer: Winchester
Model: 1894
Serial No. 824
Caliber/Bore: .32-40
Barrel Length: 26"
FFL Status: Antique

Manufactured 1894. This is an unusual rifle in that it is a first year but it does not have the ten o'clock screw. No PW's. Features full octagon barrel, full magazine, Winchester sporting sights, blued finish and walnut stocks. If ever there was a case to be made for refinishing a rifle, this is it. It appears to have been stored in a non-climate controlled environment, where it retains most of its original blue finish but it has spotted finish loss. The edges and markings are razor sharp. Frame has age freckling. Nice flashes of color on hammer and lever. Wood is excellent and proud to metal with nice grain. Strong bore and fine action. Rare very early rifle that did not see much use, but was just improperly stored and would be worth the money and effort to bring it back to life. The lovely stocks even have extra grain wood. 1,000.00 - 1,500.00

Manufacturer: Winchester
Model: 1873
Serial No. 197449
Caliber/Bore: .32-20
Barrel Length: 20”
FFL Status: Antique

Made in 1886. The late barrel markings and “PW” stamps indicate that this barrel and tube were changed long after manufacture date. It is a true full octagon Winchester barrel with full magazine, sporting sights, blued finish, and walnut stocks. Barrel and tube retain approximately 95% original blue with razor sharp edges and legends. Frame is basically brown patina with 50% blue on loading gate. Receiver is grey. Wood is excellent, flush to metal and has been lightly refreshed. Fine action and bore. 900.00 - 1,200.00

These dug up relics are in a collector category all their own. This one was buried or under water for over a century. The octagon barrel has layers of attached rust, the bolt is rusted shut, the hammer is rusted in the open position, the lower tang is missing, and there is no lever, trigger, nor any wood. It does not appear there has been any attempt to clean. When collecting relic dug up guns, ones mind races with the possible circumstances in which a fine rifle was left abandoned with the hammer still cocked. A great display or conversation piece. 400.00 - 600.00

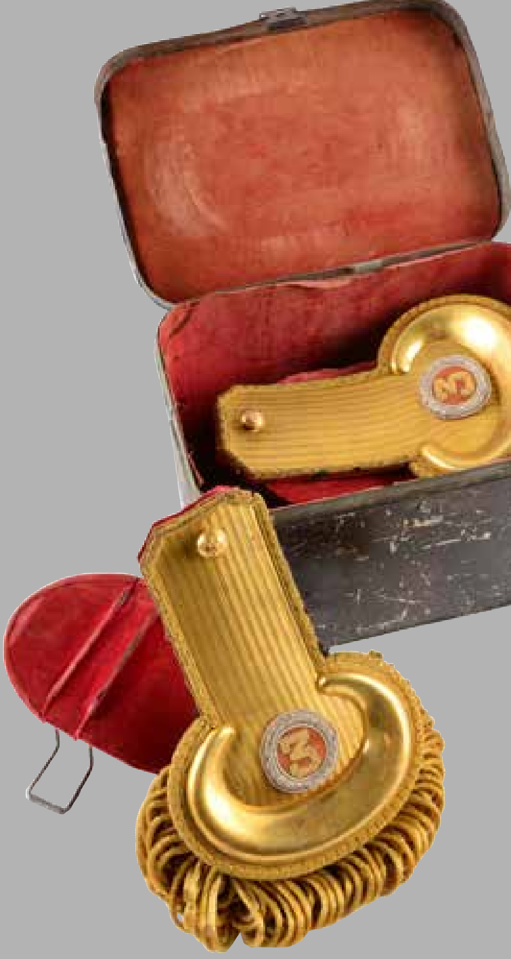
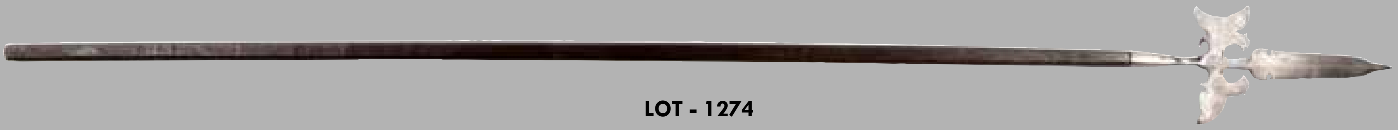
1272 - U.S. REGULATION 1839 PATTERN CIVIL WAR CARTRIDGE BOX PLATE PIERCED WITH BULLET.
A regulation 1839 Pattern infantry enlisted man's cartridge belt plate, sheet brass with embossed "US" and lead-filled back with remnants of two steel loops for securing to cartridge box. Appears to have been dug, brass has a very dark original patina with some dirt in low protected areas. Steel loops have deteriorated and edges are bent. A minie ball has pierced through between the "U" and "S" and area around lead ball is concave from impact. Lead on bullet and back appear to have an authentic patina. This is an interesting and rare find, a great addition for any cartridge, bullet, or belt plate collector! 400.00 - 600.00



LOT - 1273

1273 - RARE CASED 3RD U.S. DRAGOON OFFICER'S EPAULETTES.
9-1/2"x7"x7" The 3rd Regiment of Dragoons were a United States Army Dragoon Regiment raised for one year of service in the Mexican American War, by Congress on February 11, 1847. It was led by Colonel Edward G. W. Butler, who was appointed from Louisiana. Pre-Civil War, these are the type of epaulettes worn by American Dragoons during the Mexican American War. In excellent all original condition, constructed of gold bullion ribbon with applied brass clam shell decoration on top of each, both have an eagle button. Pillows have gilt "3" embroidered on the orange centers with silver borders. In addition, there are two loose silver embroidered lieutenants bars. Inner liner is of red leather and felt with brass attachment panels. Excellent condition in original case. Complete with all original tin case painted black with red velour lining, red velour stand or divider is present. Paint on case with some fading and paint losses marks. These are very rare as the 3rd Dragoon Regiment was formed during the Mexican American War and only lasted one year. This is the only known pair in private hands. Even the Fort Riley Museum in Kansas does not have a set. The 3rd Regiment of Dragoons was assigned to the expedition to Central Mexico, landing near Vera Cruz with Major General Winfield Scott's army and participating in the Siege of Vera Cruz, Battle of Churubusco and the Battle of Molino del Rey. The Third Dragoons took part in General Joseph Lane's pursuit of General Santa Anna in January 1848, and Lane's campaign against the guerrilla forces of Joaquín Rea at the Action of Atlixco and of Padre Jarauta in late February 1848. Major William H. Polk and a portion of Lane's forces engaged and defeated the Jarauta guerrillas in the Action of Sequalteplan at Zacualtipan on February 25, 1848. In late May 1848, two companies under Polk's command escorted an American delegation to Querétaro, where the two countries exchanged official ratifications of the Treaty of Guadalupe Hidalgo, bringing the war to an end. At the end of the war the regiment was disbanded. 1,500.00 - 2,500.00



LOT - 1274

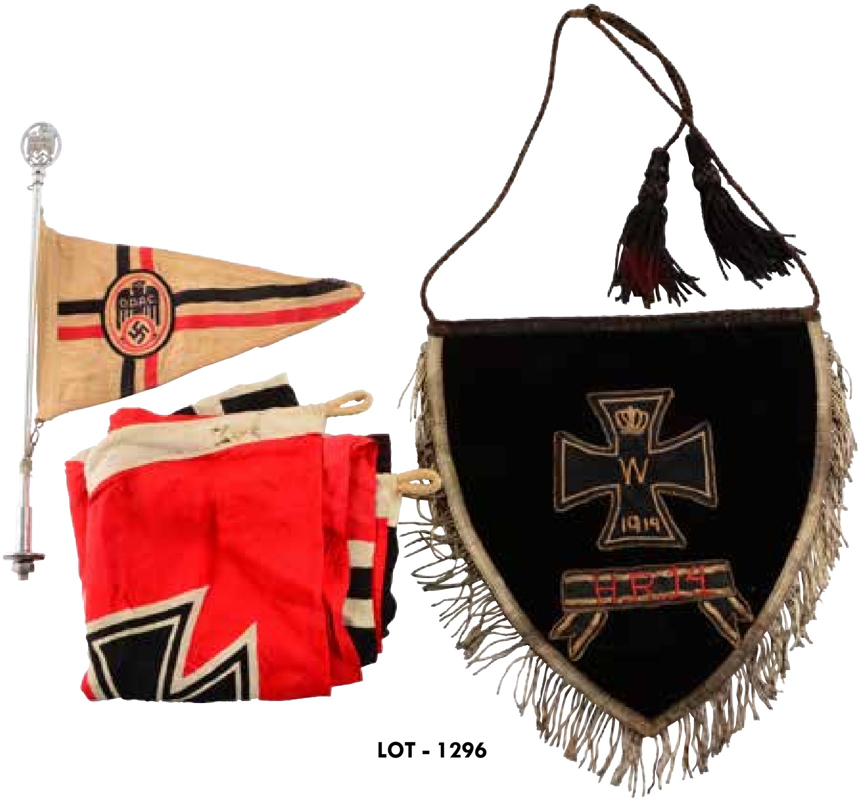
LOT - 1295

1294 - GERMAN REICHSWEHR CAVALRY LANCE & PENNANT.
10'5"L. x 1-1/2"W. This lance and pennant are a post-World War I, but pre-World War II, Germany Army set. The lance is unit marked to the 18th Reiter Regiment, which was part of the 3rd Reichswehr Reiter Division after 1919. It represents the 4th Squadron of the Regiment. The lance is dated 1915, as well as 1920, which was common to weapons used again by the post-World War I German military. Measures 27" x 13". The black pennant has a large white skull on it. The pennant attaches to the lance via four attachment points. Pennant has several tears, but otherwise is in nice condition. A very uncommon set as the post-World War I German Army was very small. (Very Good). 650.00 - 750.00

1295 - LARGE 4' X 10' WAFFEN SS FLAG.
Flag has large double runes are each side. Consignor states flag was picked in Munich by US veteran in April of 1945. Mounting hardware is present on both left corners, and consists of two nickel plated loops and hooks attached to a cord which runs along the flag's left edge. Fittings are unmarked. Sewing of runes to flag is superbly executed. Since flag is double sided and the runes are back to back, the thread used switches from white to black, based on which surface the runes are stitched to. Flag is manufactured with the correct era type of tightly woven thin cotton. Several minor snags, and white areas exhibit minor age staining. A very desirable flag. (Very Good). 500.00 - 600.00

LOT - 1294



LOT - 1296

1296 - LOT OF 3: IMPERIAL & NAZI ERA FLAGS.
Lots contains a German WWII Battle Flag (A), a Nazi era automobile club fender pendant (B), and an Imperial German WWI podium flag (C). (A) An original German World War II Kriegsmarine battle flag approximately 39" x 66" in size. Flag is marked with an eagle and swastika as well as a "M" for the German Navy along the roped end. Flag is also marked "Reichskriegs Fl 100 x 170" which means the Third Reich's war flag and the size in centimeters. Flag colors are strong and vibrant. Flag has a 2" tear near the top which has been repaired, and 1.5" rip on the bottom which has also been repaired but come loose. Flag also has two small holes near the right edge. Very good. (B) An original Nazi era automobile club fender pendant with fender mount and emblem. The "D.D.A.C." represents "Der Deutscher Automobil Club" which was the Nazi era designation for a club which was founded in 1903. Pendant measures 12.5" in length and 7.5" at its widest point. Fender mount is made from aluminum and is 16" in height with steel mounting hardware. Pendant is attached to pole with 2 spring clips, and exhibits age staining on most of it. Good. (C) An original Imperial German World War I unit "podium type" double sided flag which measures 14" x 14" at its widest points. On reverse the flag presents the Imperial German national colors of black, white, and red woven in silk. On the front the flag presents a 1914 Iron Cross with silver bullion trim on a velvet base, and Iron Cross ribbon pieces with silver bullion trim, and the unit designation "HR14" for Hussar Regiment 14. Entire flag is bordered with bullion tassels. Flag also has a long brown/ black woven hanging cord attached to the top edge. Moderate damage to the top silk trim and some age staining to the white portion of the Iron Cross and ribbon. National colors on reverse are strong and vibrant. (Very Good). 400.00 - 600.00

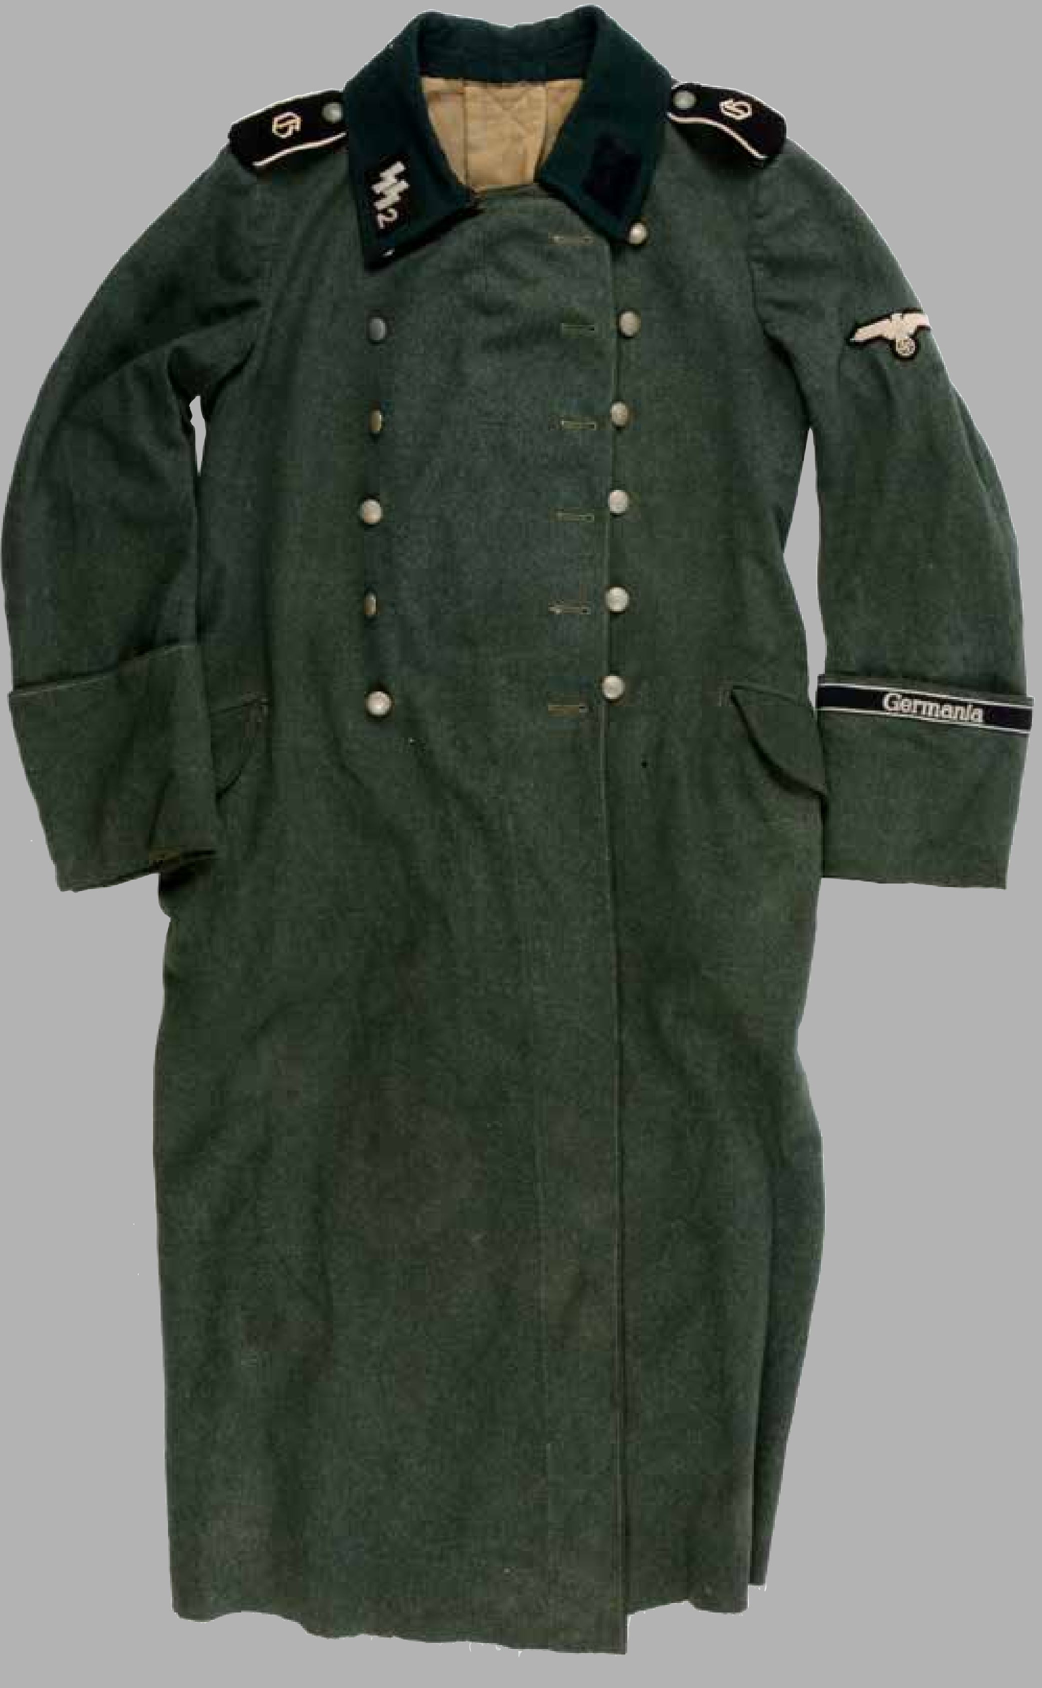
1330 - GERMAN WORLD WAR II SS OAKLEAF REVERSIBLE CAMO WINTER UNIFORM.

Complete original German World War II SS oak leaf reversible camo winter uniform. This four piece set was worn by formations of the Waffen SS on all fronts of World War II. The set contains a pair of winter mittens, a detachable hood, trousers, and jacket with hood. The entire set has a winter white reversible camouflage on the inside, and the rare oak leaf camouflage pattern on the outside. The winter mittens appear unissued and are tied to each other, as they are normally issued. The oak leaf pattern has bold colors, while the inside white exhibits some aging. A "10" is lightly written on the inside. The detachable hood also appears to be unissued, and has two ties (20" and 7") still attached on the left side. The oak leaf pattern is vibrant with bold colors. Inside exhibits some aging to the white, as well as brown freckling. The padded winter jacket is made from several minor variants to the oak leaf pattern; as commonly encountered. Two front sections are made from a fabric with a higher rayon content than most of the uniform. Half of the right sleeve is also made from this fabric. There is a subdued rank insignia present on the left sleeve, 6" from the shoulder sleeve. The rank indicates an "Untersturmfuehrer" (2nd Lieutenant). The green subdued on black rank insignia is machine sewn to the jacket with black thread, and is not sewn through the lining. The waist belt is present. There are six white pressed paper buttons on the inside facing, and two on the inside pockets. There are six metal buttons on the outside facing, as well as two on the pocket flaps. Those eight buttons are painted field grey. All buttons appear to be originally applied. The jacket has been worn and exhibits soiling around the neck, along the bottom, and both sides of the open facing. A faint "1" in a circle is present on the right side area near the button holes. The oak leaf trousers are also reversible, and is lightly worn. It has six glass buttons around the waist on the outside for the attachment of suspenders. The fly area is secured by another three glass buttons. All buttons appear to be originally applied. A very rare and desirable Waffen SS reversible winter set with rank insignia. (Good - Very Good). 3,000.00 - 3,500.00



1331 - NAZI PRE-WAR SS GERMANIA OVERCOAT.

Pre-war SS “Germania” Regiment enlisted overcoat. This 1938 and 1939 dated overcoat represents the Waffen SS “Germania” Regiment, one of the first regiments of what later became the Waffen SS. This overcoat has a pair of SS collar tabs originally machine sewn to the collar. The rank tab is bare, and the other tab exhibits the “SS2” of the “Germania” Regiment. An early SS sleeve eagle is originally machine sewn on to the left sleeve in a zig-zag pattern. The SS shoulder boards are made from black wool with a rayon piping. The stylized “G” monogram, representing the “Germania” Regiment, is embroidered to each shoulder board. The stitching of the monogram does not go through the entire top of the shoulder; on the top layer of the top portion. A “Germania” cufftitle is machine sewn in black thread to the French cuff of the left sleeve. The lettering is machine sewn to the cufftitle, while the outer silver border is constructed with the correct seven strands. The overcoat has the maker mark of “Max Muller of Nurnberg” (with the proper Umlauts), and six sets of sizing numbers. Belone the size markings is what appears to be a “NL 39”. Below that marking is a “VA 1938” in a rectangular box in black ink. The collar is in dark green wool with two moth holes on the right rear. The two pocket flaps do not have any buttons. The front of the coat have two rows of six buttons. All the buttons are originally applied and made by “HA”. In addition to the two moth holes on the collar, there are two holes about the right side pocket flap; one to the right of the left pocket, and one under the left armpit. The coat is lined in a light gray cotton twill. There are two buttons on the rear false belt. The entire jacket appears to be untouched with all insignia originally applied. Very light and matching aging throughout. A very rare and desirable overcoat to an infamous early SS unit. (Very Good - Excellent).

LOT - 1332

1332 - 26- EARLY SS BROWNSHIRT TUNIC

Early Nazi SS "Brownshirt" tunic. This rare tunic is a very early SS tunic from the late 1920's. There are faint markings inside the collar, but they are illegible. Early collar tabs are machine sewn to the collar with black thread. Left side rank tab has one pip, and prongs do not go through collar. Right side tab is blank. Right side shoulder has black and white shoulder board, sew in style. Top of shoulder board appears to have been attached with a brown glue to the bottom half, at some point, but it was long ago. Seam inside jacket near shoulder board appears to have been opened at some time and sewn with green thread. The rest of the tunic has been assembled with a golden brown thread. Nazi armband is likely to have been added in the early 1930's. The top of armband is machine sewn around its entire circumference. Lower end of armband is spot sewn down on the front, and sewn down near the rear seem. Tag inside the armband states "vom Reichsfuehrer SS befohlene Ausfuehrung", with a pair of SS runes on the left in a circle on the left and a "RZM" in a circle on the right. There are six belt hooks sewn into the bottom, with one hook being broken off. The inside of the hook is cloth covered and marked "BOBI Ges.gesch.". Inside shoulder area is lined in an off white cotton, and is marked with a "54 42". There are three nickel plated steel buttons on the front and one on each side pocket. Light aging through and jacket seems to be unworn. A very rare and desirable early SS "Brownshirt" jacket. (Excellent). 1,500.00 - 2,000.00

Lot contains an enlisted WWII Ike jacket (A), a WWII overseas cap (B), two photos (C), and a Major's summer tunic (D). (A) Lot contains a size 38R World War II Ike jacket to an enlisted member of the 34th Infantry Division. Jacket has the correct enlisted infantry collar brass, a "Ruptured Duck", Presidential Unit Citation ribbon, marksmanship badges for rifle and machine gun, a Good Conduct medal pinned to the pocket, a Combat Infantry Badge, and ribbons for a Purple Heart, Good Conduct, and a European Campaign ribbon with three bronze star clusters. Jacket also has a 34th ID patch on the left sleeve, and appears to be unworn with no damage. Excellent. (B) a US World War II enlisted overseas cap in size 7.5. Cap has a machine sewn patch for the 34th ID on it, and appears to be unworn. Excellent. (C) Two photos of 34th ID soldiers in World War II. Unlikely these photos are of the soldier who wore the Ike jacket. One photo portrays a Staff Sergeant and the other has the caption of "Co. C 133rd Inf., 34th Inf Div, Italy Jan. 1945". A troop assignment pass is also included. (D) A Major's jungle jacket with no markings. Tag attached to jacket states "Howard Maxwell, Adjutant, OSS Det. 404, CBI, 6/1/85". Also present is a "Relief from Active Duty, Officer Personnel" dated 6 December 1945 for Major Howard Maxwell. His relief effective date is 25 February 46. A very unique tunic. (Excellent). 500.00 - 700.00

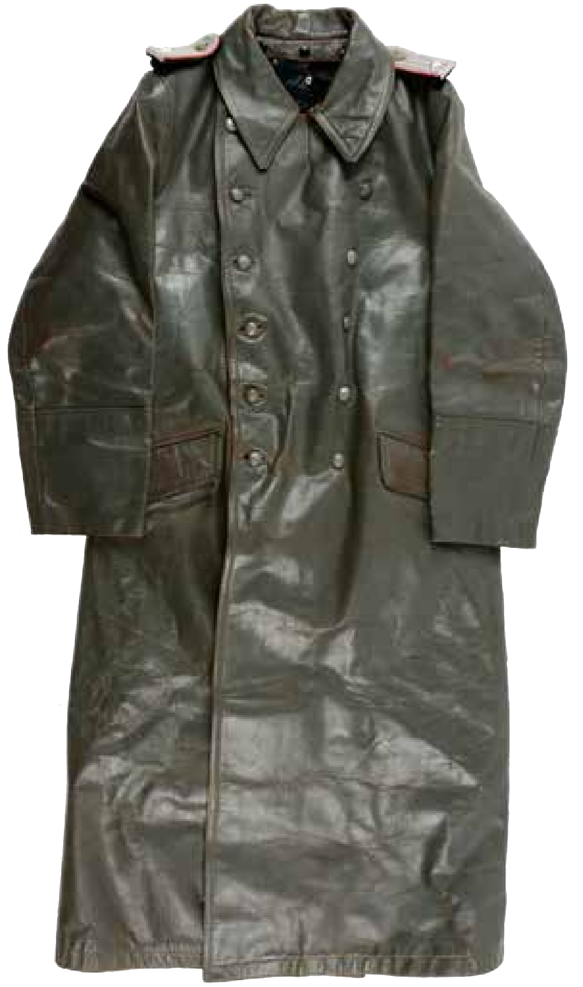
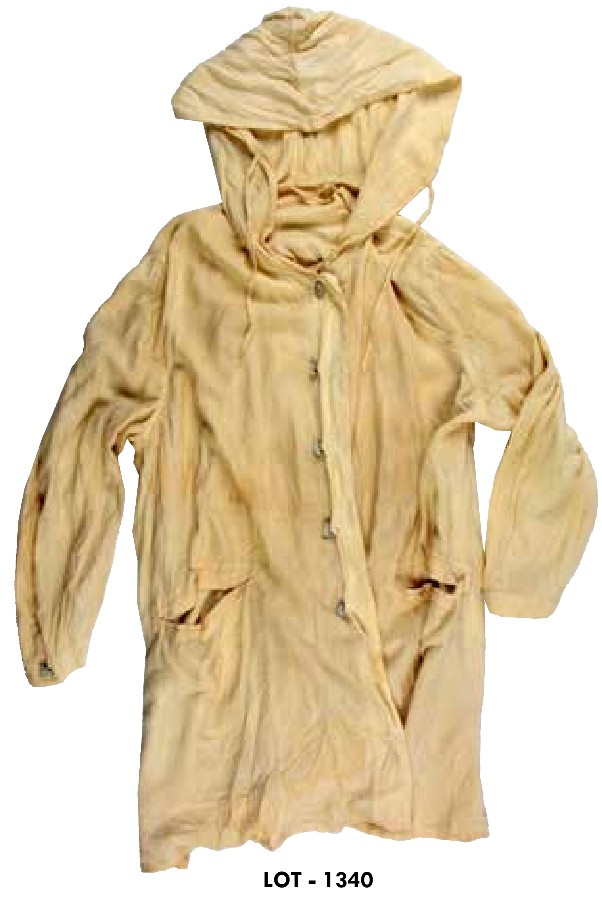
LOT - 1338



LOT - 1339

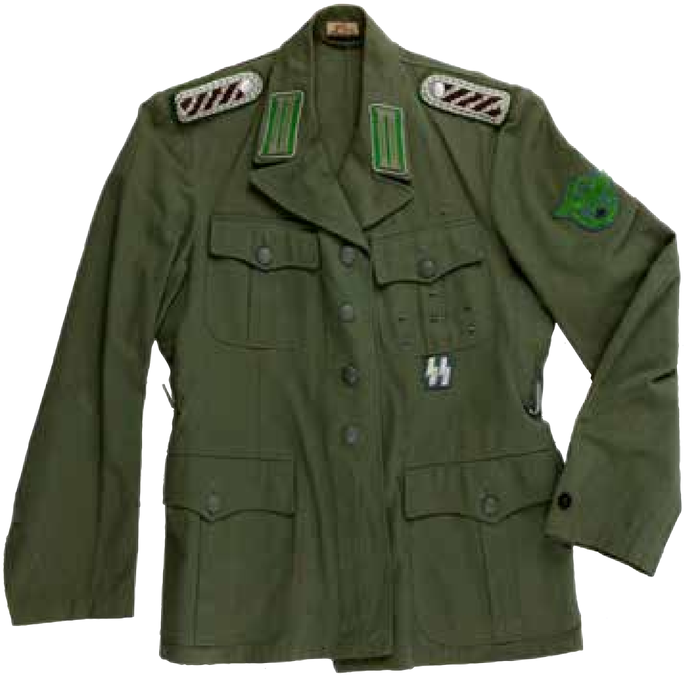


LOT - 1340

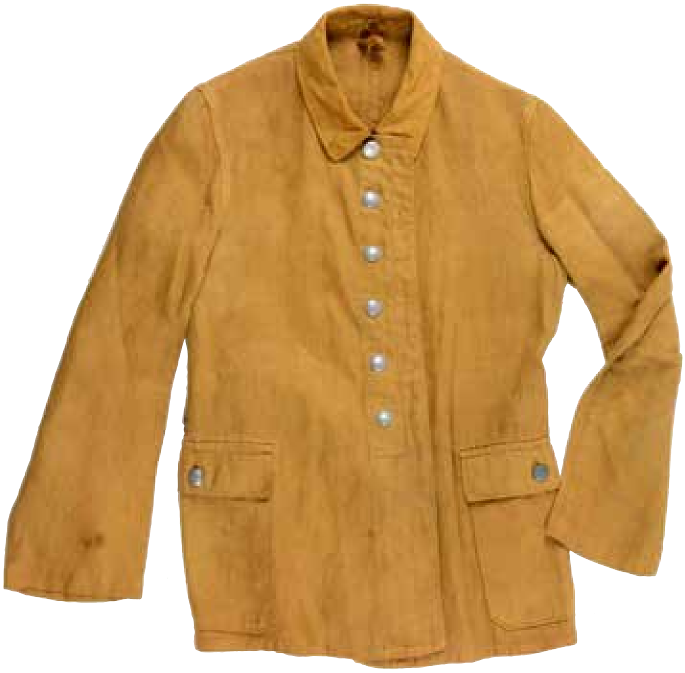
1338 - LOT OF 2: GERMAN WORLD WAR II OVERCOATS.
(A) This green rubberized overcoat is marked "Be Kla, Regen- Belklidung", meaning rain clothing. Coat has a field grey wool collar, and is lined at the shoulder in a ventilated fabric. Coat has ten aluminum buttons on the front and also has two flapped pockets. Inner coat has buttons for lining. (B) This black leather overcoat is fully lined in a green flannel material. Coat is closed via a belt and buckle arrangement. (Very Good). 400.00 - 600.00

1339 - GERMAN WORLD WAR II LEATHERETTE OVERCOAT.
Overcoat is manufactured from a field grey Leatherette. Some fittings, such as button backings, are made from field grey leather. Coat is lined in a rayon material. Coat also comes with a removable dark green wool lining, which is attached via 15 snaps. Coat has two inner pockets, and a dagger hanger. Dagger hanger also passes through slot in liner when attached. Overcoat includes a pair of SS Panzer 1st Lieutenant boards, which may not be original. Coat exhibits modest age and storage wear with folded areas being more worn. Would display rather nicely. (Very Good).
300.00 - 350.00

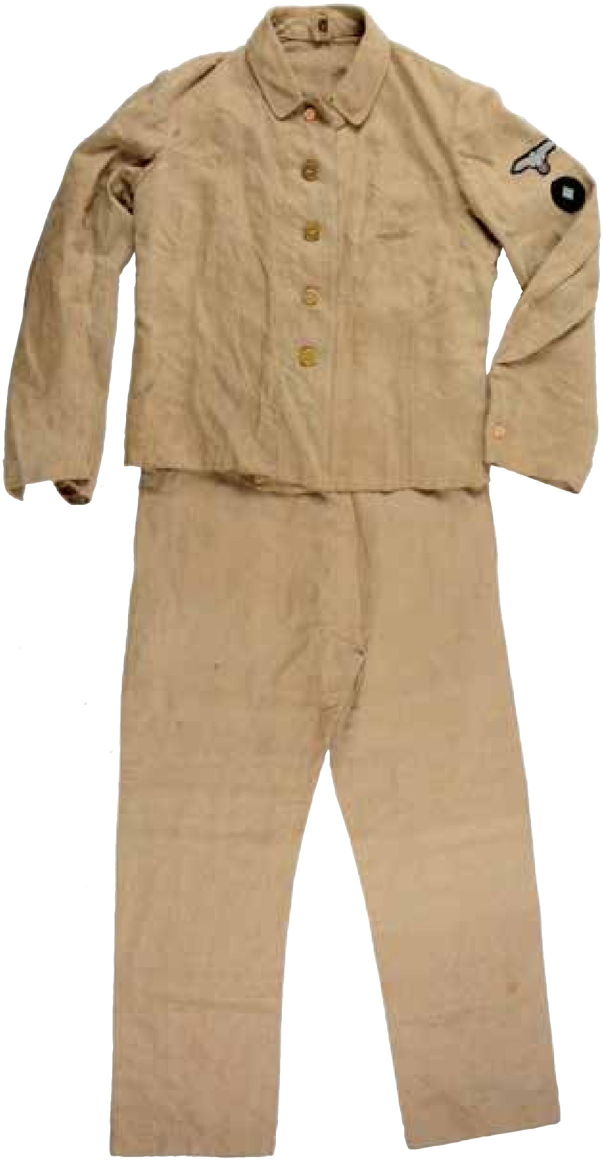
1340 - GERMAN WORLD WAR II WEHRMACT WINTER CAMO SMOCK.
This off-white linen winter smock is unworn. Smock has size marking of "III" which represents a large size. Smock has a large oversized hood which is meant to be pulled over the helmet. Front of hood has a steel hook, which is meant to clip on to front of helmet visor in order to secure the hood. Hood also has two tie strings. Smock is closed by five white painted buttons which are marked "68 19 JFS 42" which may indicate a helmet size of 68, and made in 1942. Each sleeve cuff also has two white buttons with a fastening tab. Two pocket slits on the front enable the wearer to reach his uniform pockets or field gear. A very difficult to find desirable piece of winter camouflage in great condition. (Excellent). 300.00 - 350.00



LOT - 1341



LOT - 1342

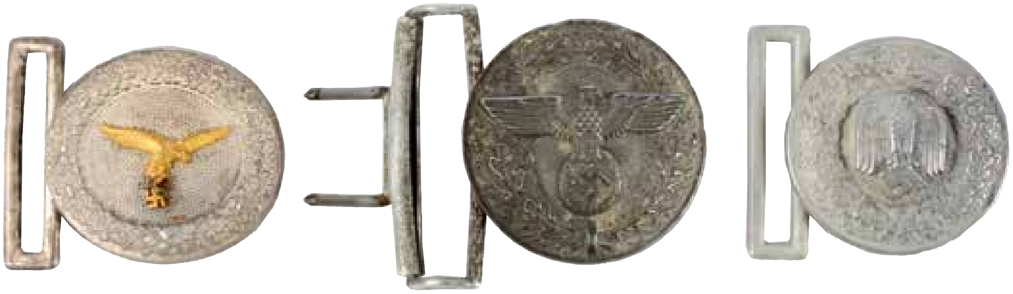


LOT - 1343

1341 - GERMAN WORLD WAR II POLICE TUNIC.
This early municipal police tunic was manufactured from the pre-war green "mottled" fabric. The tunic has a tag inside the collar which represents the maker of "Lige, Hannover". The left sleeve as the left sleeve has the wool municipal police insignia machine zig-zag sewn to the tunic. The collar tabs are factory machine sewn to the collars, and the slip on municipal shoulder boards are secured by an aluminum button. The tunic is secured via four removable painted metal buttons marked with an "A & S". Buttons are secured with a steel ring behind them. The front of the tunic has four pockets, and each is secured with the same painted steel buttons, affixed with a metal loop. The partial inner lining is in blue grey cotton twill. Jacket is unworn, but someone has added post war markings in two locations. The lining of the right lower pocket and the left inside buttonhole area. Markings are definitely reproduction. A desirable tunic. (Excellent). 300.00 - 350.00

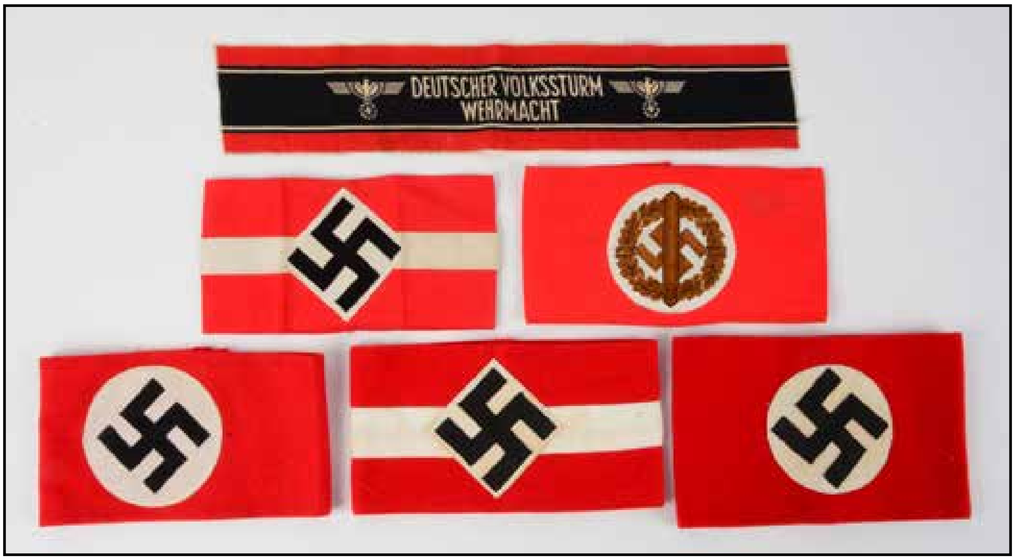
1342 - GERMAN WORLD WAR II SS UTILITY WORK JACKET.
Unworn SS drill jacket in golden brown HBT material. Jacket is maker marked to a clothing factory and also has six sets of size markings. Jacket is dated 1939 and has a six button front, closed by six aluminum pebbled buttons. Two outer front pockets are also closed by two buttons, and all buttons are secured to the uniform via metal loops. Three brown pressed paper buttons are inside the collar, in order to attach the collar liner. Two of the same buttons are also present inside near the collar, presumably to attach the same collar liner. Tunic also has a hidden interior draw tape and two aluminum belt support hooks. A very uncommon jacket in unissued condition. (Excellent).
300.00 - 350.00

1343 - GERMAN WORLD WAR II DRILL UNIFORM SET.
Wehrmacht issue drill jacket and trousers set, nicely marked with size markings. Jacket is closed by four Luftwaffe style tan glass buttons. Five smaller buttons are present inside to affix a collar liner. Three buttons are present to secure collar closure. Jacket has a machine sewn zig-zag stitched SS sleeve eagle on left sleeve. A rank pip is hand sewn to the left sleeve as well. Trousers have five metal buttons in fly area, and six more around outside waist to attach suspenders. Only markings are numbers written with pencil inside waistband. Unworn condition, with minor area of aging and a couple of stains. (Very Good). 300.00 - 350.00



LOT - 1344

1344 - LOT OF 3: GERMAN WORLD WAR II PARADE DRESS BELT BUCKLES.
Lot contains a Luftwaffe (A), Heer (B), and Political Leader (C) parade dress belt buckles. (A) An aluminum stamped Luftwaffe buckle with a silver wash, and an attached Luftwaffe eagle in gold. No maker mark. Silver wash is about 80% present, and finish on eagle is very nice. Very good. (B) A stamped aluminum Heer buckle with no finish, and no markings. Minor wear where it has been attached. Very good. (C) A pot metal Political Leader's buckle with a "RZM M4/ 40" maker's mark. Prong assembly is in aluminum. Rough condition. (Fair - Very Good). 300.00 - 350.00



LOT - 1345

1345 - LOT OF 6: THIRD REICH ARMBANDS.
Lot contains six original Third Reich Armbands. Two of the armbands represent the Hitler Youth organization and are 4"x 8" in size; both are machine made, one is in wool and the other in a woven cloth fabric. Another two armbands are Nazi party political armbands and both are made from wool; one is 5" x 8", while the other is 4 – 1/2" x 8". The smaller one has an RZM tag present on the inside. Another armband represents the SA sports organization, is 4" x 8", and is made from a light cotton weave. There is a RZM tag present on the insider. The sixth armband is for "Deutscher Volksturm Wehrmacht" or the late war German people's army. Its full dimensions are 3" x 16", and made from a printed light cotton weave. (Excellent). 300.00 - 400.00

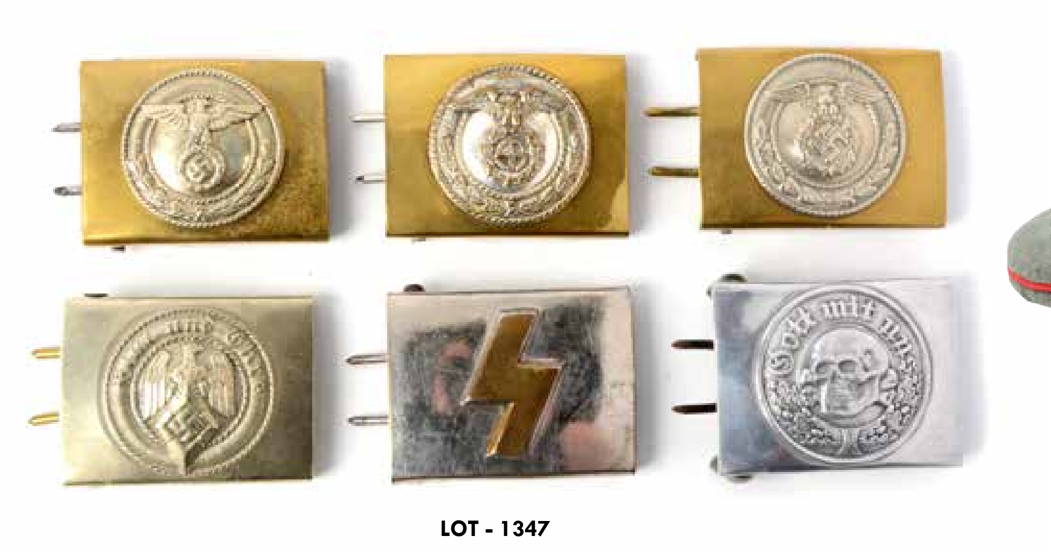
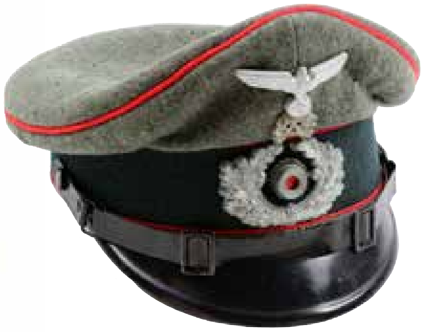
LOT - 1346

1346 - GERMAN WORLD WAR II MOTORCYCLIST ALL WEATHER OVERCOAT.
Jacket is in a blue grey oil skin fabric with green wool collar. Coat has two angled pockets with buttons on outside, and one slash pocket on right side. Sleeves have two cotton "wind cuffs" and two buttons. Upper shoulder area is lined. Pocket liner on left inside had what appears to be unit markings, but they are illegible. Last two digits are "37" and another set of markings read "F.W. Gr. 1". Shoulder lining has a wine linen tag sewn to it, but the markings are also illegible. Overcoat has an inner belt with three adjustment buttons. Oil skin is worn. (Good). 300.00 - 350.00



LOT - 1347



LOT - 1348

1347 - LOT OF 5: GERMAN WORLD WAR II BUCKLES.
Lot contains five German WWII belt buckles. Three of the buckles are for the SA (Sturm Abteilung). All three buckles are made from a two-piece construction. The main body is stamped brass, while the political emblem is made from nickel silver. The emblems are soldered to the main body at two points. One buckle represents the 1920's SA emblem and has a nickel plated prong assembly made from steel. The other two buckles represent two variations of the 1930's SA emblem. The prong assembly of the one with the larger swastika has a brass prong assembly with a steel pin through the center, and the other has a nickel plated steel prong assembly. None of the three SA buckles have any markings on them. The remaining two belt buckles represent the Hitler Youth organization. The standard one with the "Blut und Ehre" (Blood and Honor) motto is made from nickel silver, and both the prong assembly and the catch are made from brass, with a steel pin going through the prong assembly. The other Hitler Youth buckle is made from nickel plated steel: the main body, the catch, and the prong assembly. This HJ buckle has the single rune emblem on the face. (Very Good). 250.00 - 300.00

1348 - GERMAN WORLD WAR II ARTILLERY ENLISTED VISOR CAP.
Lot contains a German World War II Army enlisted visor cap with red piping representing the artillery branch. Cap has the maker's emblem of 3 oak leaves, as well as the size stamping of "55" inside the cap on the head shield. Cap has a full gray leatherette sweatband with a gray head liner. Enlisted chinstrap is also present with painted steel buckles. Cap eagle and wreath are correct and original, and made from stamped metal with prong attachment. Original Panzer skull has been attached for an unknown reason. Cap is made from field gray wool with red wool piping. Original insignia appears to have been added postwar. A 4" piece of the headliner is detached from the cap up front. Visor has a number of moth holes, especially on the rear near the piping. The wool is also damaged on the rear between the sweatband and the cap band. (Fair - Good). 200.00 - 250.00

LOT - 1349

1349 - U.S. WORLD WAR II 101ST AIRBORNE MEDIC'S HELMET.
Featured in the book Heroes in our midst by LTC (Ret.) John R. Angolia. U.S. fixed bail medic's airborne helmet to the 3 Battalion, 501st Parachute Infantry Regiment, 101st Airborne Division. The helmet has the original World War II painted finish and has a medic's emblem painted on the front in white and red paint. Helmet also has the 501st PIR diamond painted on the both sides in white, as well as a NCO horizontal bar painted in white on the rear. There is a small painted dash in front of the two 501st diamonds on the sides. All six emblems exhibit the correct wear and aging for a helmet which is 70 plus years old. Liner is correct airborne style and appears to be named to a Private. Name and other details are illegible. It is likely the soldier was promoted to a NCO and retained the same helmet and liner assembly. Lot also contains a color photocopy of the page in a book where the helmet was featured. Liner has extensive damage to the webbing. The liner is also cracked on top. Helmet has several dents on the top and extensive freckling and spotting throughout. Helmet also has a 2" crack to the left front of the medic's emblem. A unique opportunity to own a rare helmet. (Fair). 1,800.00 - 2,000.00
